Under Supervision of

Prof.Dr.Samir Mahmoud Hassan Bedir
Professor of anesthesia and intensive care
Faculty of Medicine- Ain Shams University

Prof.Dr.Hoda Omar Mahmoud Ali
Assistant professor of anesthesia and intensive care
Faculty of Medicine –Ain Shams University

Dr. Fahmy Saad Latif
Lecturer in anesthesia and intensive care
Faculty of Medicine – Ain Shams University

Ain Shams University
Faculty of Medicine

2002

Acknowledgement

I wish to express my highest gratitude and respect to **Professor Dr. Samir Mahmoud Bedir**, Professor of Anesthesiology, Ain-Shams University, Faculty of Medicine for his enthusiastic encouragement, valuable suggestion and continuous guidance. His help and supervision made this work possible.

I am greatly indebted to **Professor Dr. Hoda Omar Mahmoud** for her patience, guidance and constructive assistance, that she displayed during all the period of my work. She gave me much of her time, knowledge and fruitful advice.

I would like also to express my sincere appreciation and gratitude to **Dr. Fahmy Saad Latif** for his patience and continuous support, his valuable criticism, suggestions and observations throughout all the details of this work. He was always generous in time and effort.

Contents

Chapter I :	Introduction	1
Chapter II:	Physiology of oxygen transport.....	3
Chapter III:	Physiological effects of hemodilution.....	16
Chapter IV:	Physiological effects of hypotension and its surgical implications.	29
Chapter V:	The combination of hemodilution and controlled hypotension, physiology and clinical application.	47
Chapter VI:	Complications of the combined technique.....	76
Summary	.....	83
References	.....	87
Arabic Summary		

List of Tables

Table		Page
2-1	Concentration of oxygen and carbon dioxide in whole blood.	6
2-2	Relative influence of anemia and hypoxemia on aretrial oxygenation.	7
2-3	Parameters of oxygen and carbon dioxide transport.	12
5-1	Recommended techniques for the combination of acute normovolemic hemodilution and controlled hypotension.	75

List of Figures

Figure		Page
2-1	Oxygen-hemoglobin dissociation curve.	8
3-1	ANHD-Induced Vasodilation is nitric oxide (NO) Mediated.	28
