# **Fabrication and Characterization of Zinc Gallotelluride Thin films**

**Thesis**

Submitted for the Degree of Master for Teacher's Preparation in  
Science (Physics)

**By**

**Dalia Mohamed Abd El Basset Ahmed**

*B.Sc. and Education 2006 , Gen. Diploma (Physics) 2007,  
Spec. Diploma (Physics) 2008*

**To**

Department of Physics  
Faculty of Education  
Ain Shams University

**2011**

## **Approval sheet**

**Title** : Fabrication and Characterization of Zinc Gallotelluride Thin films.

**Candidate:** Dalia Mohamed Abd El Basset Ahmed.

**Degree** : Master for Teacher's Preparation in Science (Physics).

### **Board of Advisors**

Date of presentation:     /     / 2011

## **Acknowledgement**

The author wishes indebted with her utmost thanks to Prof. Dr/ **S.S. Fouad** for continuous supervision, valuable suggestions, encouragement and fruitful advice through this work.

Deepest gratitude to Dr/ **G.B. Sakr** for his advice, valuable help, encouragement during this study and fruitful advice throughout this work.

The author wishes to thank Dr/ **I.S. Yahia** for his valuable help, encouragement and fruitful advice throughout this work.

The author wishes to thank Prof. Dr / **F. Yakuphanoglu** Department of Metallurgical and Materials Engineering, Firat University, Elazig, Turkey, for his fruitful advice throughout this work and his laboratory facilities.

The author wishes to thank Dr / **Abd El Rahman Salam** Head of electron microscope and thin-film, Department of Solids, National Center for Research for his valuable suggestions, fruitful advice throughout this work and his laboratory facilities.

Finally, I am very much thankful to all the staff members and colleagues of semiconductor laboratory and all the members of physics department, Faculty of education, Ain Shams University.

Abstract	11
Summary	13
Introduction	17
<b>Chapter I: Theoretical background and literature review</b>	<b>24</b>
A- Theoretical background	24
1.1. Semiconductor substances	24
1.2. Chalcopyrite compounds	25
1.3. Defect chalcopyrite compounds	26
1.4. Structural properties of Defect chalcopyrite compounds	27
1.5. Semiconductor Heterostructures	28
1.6. Band theory and structural properties of amorphous semiconductors	30
1.7. Electrical conduction in amorphous semiconductors	34
1.7.1. Dc conduction in amorphous semiconductors	34
1.7.2. Ac conduction of amorphous semiconductors	38
1.7.3. Models for ac conduction	39
1.8. Dielectric properties of amorphous semiconductors	43
1.9. Switching and memory effects in amorphous semiconductors	46
1.10. Optical properties of thin films	49
1.11. Determination of the optical constants	51
B- Literature Review	54
<b>Chapter II: Experimental techniques</b>	<b>60</b>
2.1. Bulk sample preparation	60
2.2. Thin film samples preparation	61
2.3. Thickness measurements	63

2.4. Samples Annealing	66
2.5. Structural identification of the investigated samples	66
2.6. Current–voltage and capacitance- voltage analysis of the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	70
2.7. Complex impedance spectroscopy measurements for p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	71
2.8. Electrical measurements	72
2.9. Optical measurements	75
2.10. Switching phenomenon measurements	76
<b>Chapter III: Structural identification and optical properties of ZnGa<sub>2</sub>Te<sub>4</sub> thin films</b>	<b>79</b>
3.1. Structural identification of ZnGa <sub>2</sub> Te <sub>4</sub>	79
3.1.1. Energy dispersive X-ray analysis (EDX)	79
3.1.2. Differential Thermal Analysis (DTA)	80
3.1.3. X-ray diffraction patterns (XRD)	81
3.1.4. Transmission electron microscope (TEM)	85
3.1.5. Atomic Force Microscope (AFM)	87
3.2. Optical properties of ZnGa <sub>2</sub> Te <sub>4</sub> thin films	89
3.2.1. Spectral behaviour of the transmittance and reflectance	89
3.2.2. The Refractive index and absorption coefficient	90
3.2.3. Dispersion energy parameters of ZnGa <sub>2</sub> Te <sub>4</sub> thin films	92
3.2.4. Optical absorption at the fundamental edge	94
3.2.5. Determination of the dielectric constants	97
3.2.6. Determination of the relaxation time	98
3.2.7. Determination of the loss tangent	99
3.2.8. Determination of the optical conductivity	99

<b>Chapter IV: Investigation of dc conductivity and switching phenomenon of the defect chalcopyrite ZnGa<sub>2</sub>Te<sub>4</sub> compound</b>	101
4.1. Temperature dependence of the dc electrical conductivity ( $\sigma_{dc}$ ) for ZnGa <sub>2</sub> Te <sub>4</sub> thin film	101
4.2. Dynamic and Static current-voltage ( $I-V$ ) characteristics for ZnGa <sub>2</sub> Te <sub>4</sub> thin films	104
4.3. Temperature dependence of the threshold voltage $V_{th}$ of ZnGa <sub>2</sub> Te <sub>4</sub> thin film	105
<b>Chapter V: Analysis of the current voltage (<math>I-V</math>) characteristics of the nano-crystalline p-ZnGa<sub>2</sub>Te<sub>4</sub>/n-Si heterojunction diode (HJD)</b>	111
5.1. Dark current-voltage analysis of the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	111
5.2 The Reverse current-voltage characteristics analysis of the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	123
<b>Chapter VI: Analysis of the capacitance-voltage (<math>C-V</math>) characteristics of the nano-crystalline p-ZnGa<sub>2</sub>Te<sub>4</sub>/n-Si heterojunction diode (HJD)</b>	125
6.1. Analysis of ( $C-V$ ) and ( $G-V$ ) characteristics for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	125
6.2. Analysis of series resistance for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	133
6.3. Analysis of Dielectric properties of the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	138
<b>Chapter VII: Complex impedance spectroscopy of the nano-crystalline p-ZnGa<sub>2</sub>Te<sub>4</sub>/n-Si heterojunction diode (HJD)</b>	145
7.1. Impedance spectrum analysis for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	145
7.2. Electrical conductivity analysis for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	153

7.2.1. Temperature dependence of dc electrical conductivity for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	154
7.2.2. Frequency and temperature dependence of ac electrical conductivity for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	155
7.3. Dielectric properties of the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	161
7.3.1. Frequency and Temperature dependencies of the dielectric constant for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	161
7.3.2. Frequency and Temperature dependencies of the dielectric loss for the p-ZnGa <sub>2</sub> Te <sub>4</sub> /n-Si HJD	163
Conclusion	167
