LIST OF TABLES

Table	Page
Table (1): Qualitative phytochemical screening of the defatted methanol extracts of <i>Allium</i> species.	120
Table (2): Total phenolic and flavonoid contents of the defatted methanolic extracts of <i>Allium</i> species.	120
Table (3): Total phenolic and flavonoid contents from different fractions derived from the defatted methanol extracts of <i>Allium cepa</i> (ssp. red onion) and <i>Allium porrum</i> .	121
Table (4): DPPH scavenging activity, total antioxidant capacity and reducing power of the defatted methanol extracts of <i>Allium</i> species.	122
Table (5): DPPH scavenging activity, total antioxidant capacity and reducing power of fractions derived from the defatted methanolic extract of <i>Allium cepa</i> (ssp. red onion) and <i>Allium porrum</i> .	123
Table (6): Cytotoxic activity of the defatted methanolic extracts and fractions derived from <i>Allium cepa</i> (ssp. red onion) and <i>Allium porrum</i> .	124
Table (7): UV spectral data λ_{\max} (nm) of compound 1.	136
Table (8): UV spectral data λ_{\max} (nm) of compound 2.	138
Table (9): UV spectral data λ_{\max} (nm) of compound 3.	140
Table (10): UV spectral data λ_{\max} (nm) of compound 4.	142

Table (11): ^1H and ^{13}C -NMR spectral data of compound 4	143
Table (12): ^1H and ^{13}C -NMR spectral data of compound 5	148
Table (13): ^1H and ^{13}C -NMR spectral data of compound 6	153
Table (14): Characterization of fraction (IV) derived from EtOAc column by using HPLC-DAD and HPLC-ESI-MS/MS.	158
Table (15): Characterization of fraction (II) derived from n-BuOH column by using HPLC-DAD and HPLC-ESI-MS/MS.	194-195
