ACKNOWLEDGEMENTS

No words could express my gratitude to **prof Dr. El zarif Abdel -Naby Ali** Professor of surgery, Faculty of medicine Ain Shams University for his continuous encouragement, fruitful remarks and generous kindness throughout the various phases of this work. his care, advice and support are unforgettable. He has been like a father to me.

Fortunately, this study has been meticulously revised and advised by . Dr. **Ahmed Abdel-aziz abou zeid**. Assistant Professor of surgery, Faculty of medicine Ain Shams University He read every word, elaborated every idea and has offered me a really distinguished guidance and superb care. I owe him much for the time and effort he generously provided. I can never describe my feelings towards his kindness, precious advice and endless patience which I have found whenever needed or expected.

It was indeed an honour to have been supervised by **prof. Dr. Ragaa Amin Fawzy**. Professor of Pathology Faculty of medicine Ain Shams University I must thank her for her kind supervision, continuous support, and unfailing helpfulness.

Words do fail when I come to express my sincerest appreciation to **Dr Hanaa Amer**. Lecture of clinical pathology she has led the practical part of the work, which has been the core issue of the study. With great patience, she sustained and directed me. I must acknowledge her efforts, and thank her for being caring and understanding.

I do feel indebted to **Dr Maha Alzematiy** Lecturer of internal medicine who generously

helped me to rearrange my ideas and guided me whenever I asked.

Behind the completion of this work has stood the support of some of my professors and colleagues, who have given me much without even waiting for recognition. I am indebted to all of them and I hope I get the opportunity of being serviceable to them.

Lastly but not least, I would like to thank every patient who participated in this study.
