## **Acknowledgement**

*I would like to express my scincer gratitude to prof. Dr. Massarat Bakr Saddik Osman, head of the Department of Physics, Faculty of Girls, Ain Shams University, prof. Dr. Sanaa Ahmed Fayek, professor of physics, Natinal Center for Radiation Research and Technology (NCRRT), and Dr. Ahmed Hussein Ashour assistant professor of physics, (NCRRT), for their sincer help, stimulated suggestions and suggesting the planning of this research point. I am deeply indebeted to them for their kind supervision, contineous encouragement and providing all facilities which made this work possible.*

*Many thanks are also due to all collegues and staff members of Radiation Physics Department (NCRRT) and groups of irradiation facilities at (NCRRT) for their helps and facilities provided throughout this work.*

*I would like to express my heartfully thanks to Prof. Dr. Ahmed El-Hamalawy, professor of physics and Dean of the High Institute for Optics Technology, for his very great help throughout this work. Deep and heartfully thanks to him for providing me with all the required chemicals, experimental facilities and also constant stimulating ideas and suggestions throughout the period of the work.*

*Many thanks to Dr. Mohamed Tahir Dawood, assistant professor of Physics, Faculty of Electronic Engineering, Menoufia University, for his valuable help and constant encouragement during the research.*

*My deep Thanks also to Mrs. Seham Hamdy for her great support and contineous encouragement during the research and to Mr. Khalid Romaih, Atomic Energy Authority, for his valuable help and kind support.*
