Occlusion of Primary Dentition in Egyptian and Yemeni Children. A Comparative Study

Thesis

**Submitted to Faculty of Dentistry, Ain Shams University in
Partial Fulfillment of the Requirements for the
Master's Degree in
Pediatric Dentistry**

By

Mohammed Zaki Mohammed Khalifa

B.D.S(2006)

Faculty of Dentistry, Aden University/ Yemen

Faculty of Dentistry

Ain Shams University

2012

Supervisors

Assoc. Prof. Dr. Ahmed Kamal Omran

Associate Professor of Pediatric Dentistry
Department of Pediatric Dentistry and Orthodontic
Faculty of Dentistry, Ain Shams University

Assoc. Prof. Dr. Ahlam Hibatulla Ali

Associate Professor of Orthodontic
Department of Preventive, Orthodontic and Pediatric Dentistry
Faculty of Dentistry, Aden University

Acknowledgement

First of all, I would like deeply to thank *ALLAH*, the Almighty, for having made everything possible by giving me the support, encourage and strength to perform this work.

I would like to express my deepest gratitude to my supervisor *Assoc. Prof. Dr. Ahmed Omran*, Associate Professor of Pediatric Dentistry, Faculty of Dentistry, Ain Shams University, for the unselfishness, encouragement and guidance demonstrated during the whole study.

I am also deeply appreciated and obligated to my supervisor *Assoc. Prof. Dr. Ahlam Hibatulla*, Associate Professor of Orthodontic, Faculty of Dentistry, Aden University, for her kindness and great attitude throughout this study.

I would like to thank all the staff members of the Pediatric Dentistry and Dental Public Health Department, Faculty of Dentistry, Ain Shams University, starting from the head, *Prof. Dr. Amr AbdElaziz*, for their endless encourage , support and kindness.

Sincere thanks to my family, relatives and friends who gave me encouragement and support.

Finally, I am also deeply indebted to all those who contributed to my success, especially German Academic Exchange Service (DAAD).

List of Tables

<i>Table NO.</i>	<i>Title of the Table</i>	<i>Page No.</i>
1	Number of children included in the study.	40
2	The mean arch length of maxillary and mandibular arches for Egyptian boys and girls	69
3	The mean arch length of maxillary and mandibular arches for Yemeni boys and girls	70
4	Comparison between the mean arch length of maxillary and mandibular arches for Egyptian versus Yemeni children	70
5	The mean intercanine width of maxillary and mandibular arches for Egyptian boys and girls	72
6	The mean intercanine width of maxillary and mandibular arches for Yemeni boys and girls	72
7	Comparison between the mean intercanine width of maxillary and mandibular arches for Egyptian versus Yemeni children	73
8	The mean intermolar width of maxillary and mandibular arches for Egyptian boys and girls	74

Table NO.	<i>Title of the Table</i>	Page No.
9	The mean intermolar width of maxillary and mandibular arches for Yemeni boys and girls	75
10	Comparison between the mean intermolar width of maxillary and mandibular arches for Egyptian versus Yemeni children	75
11	Correlation between intermolar and intercanine width of maxillary and mandibular arches for Egyptian and Yemeni children	77
12	Arch relationship in the transverse plane for Egyptian boys and girls	80
13	Arch relationship in the transverse plane for Yemeni boys and girls	81
14	Comparison between arch relationship in the transverse plane for Egyptians and Yemenis	82
15	Comparison between tooth width in maxillary and mandibular right and left sides in Egyptian preschool children	84
16	Comparison between tooth width in the maxillary and mandibular right and left sides in Yemeni preschool children	86
17	Comparison between maxillary deciduous teeth in Egyptian versus Yemeni preschool children	88

<i>Table NO.</i>	<i>Title of the Table</i>	<i>Page No.</i>
18	Comparison between mandibular deciduous teeth in Egyptian versus Yemeni preschool children	90
19	Anteroposterior molar relationship for Egyptian boys and girls	92
20	Anteroposterior molar relationship for Yemeni boys and girls	93
21	Comparison between anteroposterior molar relationship for Egyptians and Yemenis	94
22	Anteroposterior canine relationship for Egyptian boys and girls	96
23	Anteroposterior canine relationship for Yemeni boys and girls	97
24	Comparison between anteroposterior canine relationship for Egyptians and Yemenis	98
25	Distribution of overjet among Egyptian boys and girls	99
26	Distribution of overjet among Yemeni boys and girls	100

Table NO.	<i>Title of the Table</i>	Page No.
27	Comparison between the distribution of overjet among Egyptians and Yemenis	101
28	Distribution of overbite among Egyptian boys and girls	102
29	Distribution of overbite among Yemeni boys and girls	103
30	Comparison between the distribution of overbite among Egyptians and Yemenis	104
31	Comparison of the mean overbite and overjet for Egyptian versus Yemeni preschool children	106
32	Correlation between overbite and overjet for Egyptian versus Yemeni preschool children	107
33	Distribution of spacing and crowding among Egyptian boys and girls	109
34	Distribution of spacing and crowding among Yemeni boys and girls	110
35	Comparison of spacing and crowding among Egyptians and Yemenis	111

<i>Table NO.</i>	<i>Title of the Table</i>	<i>Page No.</i>
36	Distribution of primate spaces among Egyptian boys and girls	113
37	Distribution of primate spaces among Yemeni boys and girls	114
38	Comparison of primate spaces among Egyptians and Yemenis	115
39	Comparison of the mean primate spaces in maxilla and mandible of Egyptian versus Yemeni preschool children	116

List of Figures

<i>Fig NO.</i>	<i>Title of the Figure</i>	<i>Page No.</i>
1	Classification of primary molar terminal relations	21
2	Presenting colored simple story on the wall	39
3	Fluoride gel application	43
4	Selecting the proper upper impression tray	44
5	Selecting the proper Lower impression tray	44
6	Digital caliper (INSIZE Electronic Caliper, 1112-150, Austria)	50
7	Measuring mesiodistal crown width.	51
8	Arch length measurement.	52

<i>Fig NO.</i>	<i>Title of the Figure</i>	<i>Page No.</i>
9	Measuring of intercanine width.	53
10	Measuring of intermolar width.	10
11	Flush terminal plane.	55
12	Distal step.	56
13	Mesial step.	57
14	Class I canine relationship.	58
15	Class II canine relationship.	59
16	Class III canine relationship.	60
17	Measuring overbite.	61

<i>Fig NO.</i>	<i>Title of the Figure</i>	<i>Page No.</i>
18	Measuring overjet.	62
19	Anthropoid in the upper arch.	63
20	Anthropoid in the lower arch.	63
21	Generalized spacing.	64
22	Localized spacing.	64
23	No spacing.	65
24	Crowding.	65
25	Comparison between the mean arch length of maxillary and mandibular arches in Egyptian versus Yemeni pre-school children	71
26	Comparison between the mean intercanine width of maxilla and mandible in Egyptian versus Yemeni pre-school children	74

<i>Fig NO.</i>	<i>Title of the Figure</i>	<i>Page No.</i>
27	Comparison between the mean intermolar width of maxilla and mandible in Egyptian versus Yemeni pre-school children	76
28	Correlation between intermolar and intercanine width in the maxilla of Egyptian preschool children	78
29	Correlation between intermolar and intercanine width in the maxilla of Yemeni preschool children	78
30	Correlation between intermolar and intercanine width in the mandible of Egyptian preschool children	79
31	Correlation between intermolar and intercanine width in the mandible of Yemeni preschool children	79
32	Comparison between the patterns of arch relationship in the transverse plane among Egyptian versus Yemeni pre-school children	83
33	Comparison between the mean width of teeth in the maxilla and mandible of both sides among Egyptian pre-school children	85
34	Comparison between the mean width of teeth in the maxilla and mandible of both sides among Yemeni pre-school children	87
35	Comparison between maxillary deciduous teeth in Egyptian versus Yemeni preschool children	89

<i>Fig NO.</i>	<i>Title of the Figure</i>	<i>Page No.</i>
36	Comparison between mandibular deciduous teeth in Egyptian versus Yemeni preschool children	91
37	Comparison between the patterns of molar relationship in Egyptian versus Yemeni pre-school children	95
38	Comparison between the patterns of canine relationship in Egyptian versus Yemeni pre-school children	98
39	Comparison between the patterns of overjet in Egyptian versus Yemeni pre-school children	101
40	Comparison between the patterns of overbite in Egyptian versus Yemeni pre-school children	105
41	Comparison between the mean overbite and overjet in Egyptian versus Yemeni pre-school children	106
42	Correlation between overbite and overjet in Egyptian children	108
43	Correlation between overbite and overjet in Yemeni children	108
44	Comparison between spacing and crowding in Egyptian versus Yemeni pre-school children	112
