Acknowledgment

First, thanks are all due to **God** for blessing this work until it has reached its end, as a part of his generous help throughout my life.

I would like to express my deepest gratitude to **Prof. Dr. Soheir Abbas Sadek**, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for her great support and continuous encouragement throughout this whole work. It is really a great honor to work under her guidance and supervision.

I am truly grateful to **Ass. Prof. Dr. Hala Amin Hasan Ali**, Assistant Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for her close supervision, sincere help, valuable suggestions and continuous encouragement throughout the whole work.

My deepest appreciation and grateful thanks are due to **Dr. Gehan Abd El-Halim Ali Gomaa**, Lecturer of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for her kind advice and her great efforts throughout this work.

Osama Abd El-Aziz

List of Contents

	PAGE
Introduction	1 - 3
Chapter (1): Pathophysiological Effects of Burn Injuries and Its Classification	4 - 59
Chapter (2): ICU Management of Burned Patients	60 - 191
Summary	192 - 193
References	194 - 229
Arabic Summary	1 - 2

List of Tables

No.	Table	Page
Table (1):	Most common types of burn injury by age group.	4
Table (2):	Functions of the skin.	8
Table (3):	Burn wound classification.	11
Table (4):	Summary of American Burn Association burn severity categorization.	17
Table (5):	Mediators of the inflammatory response.	20
Table (6):	Major elements of the definition of Acute Lung Injury (ALI) and Adult Respiratory Distress Syndrome (ARDS).	26
Table (7):	Main etiologies of ARDS.	26
Table (8):	Stages of ARDS.	29
Table (9):	Physiologic alteration after burn injury.	34
Table (10):	Normal distribution of body water.	54
Table (11):	Glasgow Coma Scale (GCS).	66
Table (12):	Assessment of airway (to intubate or not to intubate).	74
Table (13):	Phases of smoke inhalation injury.	78
Table (14):	Symptoms of carbon monoxide intoxication.	79
Table (15):	Treatment of carbon monoxide and cyanide toxicity.	81
Table (16):	Factors to consider in the mechanical ventilation of patients with extensive burn injuries.	83
Table (17):	Adult burn resuscitation formulas.	87
Table (18):	Pharmacologic therapies for relief of burn pain and anxiety.	106
Table (19):	ARDS mortality.	117
Table (20):	Lung function in survivors of ARDS.	118
Table (21):	Hemodynamic support.	121

No.	Table	Page
Table (22):	Enzymatic debridement agents commonly used in burn care.	127
Table (23):	Topical preparations for burn wounds and skin grafts.	129
Table (24):	Temporary coverings for burn wounds.	134
Table (25):	Curreri formula.	142
Table (26):	Vitamin and trace mineral supplementation guidelines.	145
Table (27):	Enteral feeding formulas - Selected products and characteristics.	149
Table (28):	Intravenous crystalline amino acid solutions for parenteral nutrition.	155
Table (29):	Salt forms of intravenous electrolyte additives for parenteral nutrition.	156
Table (30):	Selected PN formulations with varying NPC:N and total volume.	159
Table (31):	Laboratory data and diagnostic tests used in evaluating the nutrition regimen.	163
Table (32):	Physical defense mechanisms against infection and their alteration by burn injury.	169
Table (33):	Common chemical agents.	183
