SOME OPERATIONS ON GRAPHS

THESIS
SUBMITTED
FOR THE DEGREE
OF
DOCTOR OF PHILOSOPHY (Ph.D)
IN SCIENCE
(PURE MATHEMATICS)
BY

Shereen Adel Abd El Rahman Mousa

Assistant lecturer ,Department of Mathematics
University College for Women
Ain Shams University

SUPERVISORS

Prof. Dr.Gamal A.F. Isamil
Professor of Pure Mathematics
University College for Women
Ain Shams University

Prof. Dr. Mabrouk M. S. El-Ghoul
Professor of Pure Mathematics
Head of Mathematics department
Faculty of Science
Tanta University

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

(رَبِّ اَوْزَعْنِي اِنَّ اَشْكُرُ نِعْمَتَكَ
الَّتِي اَنْعَمْتَ عَلَيَّ وَعَلَى وَالِدَيَّ وَ
اِنَّ اَعْمَلَ صَالِحًا تَرْضَاهُ وَاَصْلِحْ لِي
فِي ذُرِّيَّتِي اِنِّي تَتَّبِعُ الْبِرَّ وَاِنِّي مِنَ
الْمُسْلِمِينَ)

صدق الله العظيم

Ain Shams University

Prof. Dr. Mabrouk M. S. El-Ghoul
Professor of Pure Mathematics
Head of Mathematics department
Faculty of Science
Tanta University

Acknowledgment

First of all I should express my thankfulness to "ALLAH" who gave me the health, power and help to achieve this work.

I wish to express my sincere thanks and heartily grateful to my supervisor Prof. Dr. Gamal A.F. Ismail, professor of pure Mathematics, University College for Women, Ain Shams University, for her useful comments and valuable suggestions which substantially improved the final product with continuous help and warm encouragement.

All my thanks and deepest appreciation to my supervisor Prof.Dr. Mabrouk M.S. El-Ghoul, Professor of Pure Mathematics, Faculty of Science, Tanta University for suggesting the subject matter of this thesis , his sincere supervisions , valuable discussions and extreme patience .His valuable advice and his constructive criticisms have been most helpful at all stages .

My passion, love gratitude to my husband, my parents , and my brothers who always gives me sincerely and endlessly in return for nothing. My duty is to express my great to all the staff members of mathematics department for interest and facilities they offered.

Shereen Adel

ABSTRACT

SUMMARY

Chapter 1	Basic Concepts	1
	1.1: Chaos theory	1
	1.2 : Graph.....	5
	1.3: Abstract graph.....	8
	1.4: Oriented abstract graph.....	9
	1.5: Some types of graphs.....	10
	1.5.1: Empty graph.....	10
	1.5.2: Null graph.....	10
	1.5.3: Simple graph.....	10
	1.5.4: Multiple graph.....	10
	1.5.5: Complete graph.....	11
	1.6: Connected and disconnected graph.....	12
	1.7: Matrices.....	12
	1.7.1: Adjacent matrix.....	12
	1.7.2: Incidence matrix.....	13
	1.8: Tree.....	14
	1.8.1: Rooted tree.....	16
	1.9: Knots	16
	1.10: Chaotic graph.....	17
	1.11: Folding and unfolding of graph.....	17
	1.12: Retracts.....	19
Chapter 2	Chaotic General Tree and it's Chains	21
	2.1: Introduction.....	21
	2.2: General tree	22
	2.3: Chains.....	27
	2.4: The chaotic circle.....	27
	2.5: The chaotic sphere.....	28
	2.6: The chaotic cylinder.....	28
	2.7: Chaotic chain	30
	2.8: Chaotic general tree.....	31

Chapter 3	Folding of the Chaotic General Tree and it's Chains	39
	3.1: Introduction.....	39
	3.2: Folding of the chaotic general tree and it's chains	40
Chapter 4	Some Operations on Tree with Knots	61
	4.1: Introduction.....	61
	4.2: Tree with knots.....	62
	4.2.1: Folding of the tree with knots.....	63
	4.2.2: Retraction of the tree with knots	73
	4.2.3: Dispersion of the tree with knots.....	77
Chapter 5	Some Operations on Chaotic Tree with Knots	81
	5.1: Introduction.....	81
	5.2: Chaotic knot.....	82
	5.3: Chaotic tree with knot.....	82
	5.4: Folding of the chaotic tree with knot	83
	5.4.1: Folding of the chaotics.....	83
	5.4.2: Folding of the geometry.....	89
	5.5: Connected sum of the chaotic tree with knots.....	97
	5.5.1: Connected sum of the geometry.....	98
	5.5.2: Connected sum of the chaotics.....	111

ABSTRACT

ABSTRACT

Shereen Adel Abd El Rahman Mousa. Some Operations On Graphs . Doctor of philosophy in Science dissertation of pure Mathematics, University College for women, Ain Shams University.

The main purpose of this thesis is to study some operations on graphs. The thesis is divided into five chapters:

In **Chapter One**, we present some different notions of geometric topology which is useful to follow up in our work.

In **Chapter Two**, we defined the chaotic general tree. The adjacent, incidence, area, volume, edge area, edge volume, area volume matrices will be introduced. The chains of the chaotic general tree will be identified.

The results of this chapter are published in "International journal of pure and applied mathematics", Vol.70, No.5, 711-722,(IF:0.23.), Bulgaria.

In **Chapter Three**, we will introduce the folding of the chaotic general tree and its chains. The variation of the adjacent, incidence, area, volume, edge area, edge volume, area volume matrices of the chaotic general tree under the folding are discussed. The relations between the folding of the chaotic general tree and their chains will be deduced.

The results of this chapter are published in "journal of mathematics research", Vol.3, No. 4, 118-132, Canada.

Chapter Four , we will define a new type of trees called "Tree with knots". The representation of these trees by matrices will be obtained. Some geometric transformations on the new trees are discussed. Also the variations of the matrices under these operations are achieved.

The results of this chapter are accepted for publication in "Advance in pure mathematics ", U.S.A.

Chapter Five is divided into two sections. In section one, we will define the chaotic tree with knots together with its adjacent and incidence matrices. The limit of foldings on it are deduced. The corresponding changes in the adjacent and incidence matrices under these transformations are achieved.

The results of this section are accepted for publication in "Journal of mathematical archive", Vol. 3, No. 4, 975-982, (I.F.=0.8), India.

In section two, all cases of the connected sum of the tree with knots are induced.

The results of this section are accepted for publication in "Studies in Mathematical Sciences", Vol. 4, No. 1, Canada.

Keywords: Graph, Chaos, Folding, Retraction, Tree.

A decorative border with a repeating geometric pattern of interlocking lines, resembling a Celtic or Art Deco style, surrounds the central text.
