INHIBITION OF THE ACIDIC CORROSION OF C-STEEL BY 5-ARYLAZOTHIAZOLES

By

Megahed A. Latif El-Hefny

B.Sc. in Chemistry
(Mansoura University 1981)

A Thesis

Submitted by Partial Fulfillment of the Requirements for the
Master Degree of Science in Chemistry (Physical Chemistry)

SUPERVISED BY

Prof. Dr. A. S. Fouda

Professor of Physical Chemistry

Faculty of Science

and Head of Chemistry Department

Mansoura University

Prof. Dr. A. A. Abdel Fattah

Professor, of Physical Chemistry

Faculty of Science

Chemistry Department

Benha University.

Prof. Dr. M. Abdallah

Professor of Physical Chemistry

Faculty of Science

Chemistry Department

Benha University

٢٧١١

2006

Approval Sheet

Title :

Inhibition of The Acidic Corrosion of C-Steel by 5- Arylazothiazoles

Name: Megahed A.Latif El-Hefny

Supervisors:

Name	Position	Signature
Prof. Dr. A.S.Fouda	Professor of Physical Chemistry and Head of Chemistry Department Faculty of Science Mansoura University.	
Prof. Dr. A. A. Abdel Fattah	Professor of Physical Chemistry Faculty of Science Benha University	
Prof. Dr. M. Abdallah	Professor of Physical Chemistry Faculty of Science Benha University	

Head of Chemistry Department

*Vice-Dean
For Graduate studies
and Research*

Dean of Faculty

NOTE

The present thesis is submitted to the faculty of science, Benha University in partial fulfillment for the requirements of Master Degree of Science in Chemistry.

Beside the work carried out in thesis, the candidate :

Megahed A. Latif El-Hefny Daoud, has pursued the following post graduate courses for one academic year:

- 1- Nuclear Chemistry.
- 2- Quantum Theory and Molecular Spectroscopy.
- 3- Solid State Chemistry.
- 4- Selective Course (different forms of corrosion and protection against corrosion)
- 5- Analytical Chemistry (Instrumental analysis).
- 6- Thermodynamic Chemistry.
- 7- English Language.

Head of Chemistry Department.

Prof. Dr: H.A. Dessouki

Al- Quran Al-Karem

Indeed We have sent Our Messengers with clear proofs, and revealed with them the Scripture and the balance (justice) that mankind may Keep up justice. And We brought Forth iron wherein is mighty power (in matters of war), as well as many benefits for mankind, that Allah may test who it is that will help him (His religion), and His Messengers in the unseen. Verily, Allah is All-Strong, All-Mighty.

(Surah Al-Hadid 25)

ACKNOWLEDGEMENT

Praise be to Allah, Who guided us to this; and in no way could we have been guided, unless Allah has guided us.

I owe a well-deserved debt of deep gratitude to Prof. Dr. A. S. Fouda, Professor of Physical Chemistry Faculty of Science and Head of chemistry department, Mansoura University, Prof. Dr.A. A. Abdel Fattah, Professor, of Physical Chemistry Faculty of Science, Benha University and Prof. Dr. M.Abdallah, Professor of Physical Chemistry Faculty of Science, Benha University for their invaluable help and support throughout the past period while preparing my thesis, right from the inception phase till the very end are highly appreciated.

I would like to express my deepest gratitude and appreciation to my parents, my wife & my sons for their invaluable help, continual encouragement and moral supports.

Finally, and to all of those, I would really like to say:

There are no words to match my gratitude'.

Megahed A. Latif El-Hefny

WITH ALL MY LOVE
THIS
WORK IS DEDICATED TO

*All my family, my friends, my teachers and
the person whose always encouraged me to
achieve it, and finally to everyone helped me
in this work.*

Megahed A. Latif El-Hefny

Contents

Item	Page
List of Figures -----	i
List of Tables -----	vii
1- Introduction	
1.1- Preliminary Consideration -----	1
1.2- Electrochemical Nature of Steel Corrosion -----	2
1.2- (i) Hydrogen Ion Reduction -----	3
1.2- (ii) Oxygen Reduction -----	4
1.3- Forms of Corrosion-----	5
1.3.1- General Corrosion -----	5
1.3.2- Galvanic Corrosion -----	5
1.3.3- Concentration Cell Corrosion -----	8
1.3.4- Pitting Corrosion -----	8
1.3.5- Intergranular Corrosion -----	9
1.3.6- Stress Corrosion Cracking -----	9
1.3.7- Dealloying -----	9
1.3.8- Erosion Corrosion -----	10
1.4- Corrosion Prevention -----	10
1.4.1- Prevention Based on the Environment -----	10
1.4.2- Prevention Based on the Metal -----	11
1.4.3- Prevention Based on Protective Coating -----	11
1.4.4- Prevention Based on Electrochemistry -----	12
1.4.4-(i) Anodic Protection -----	12
1.4.4-(ii) Cathodic Protection -----	12

1.5- The Limitation and Uses of Inhibitors -----	12
1.6- Correlation Between Inhibition and Stability of Organic Compounds--	13
16.1- Inhibition by Chemically Stable Surface Active Organic Compounds	13
1.6.2-Inhibition by Surface Active Chemically Unstable Organic Compounds	14
1.6.2.1- Types of Chemical Transformation -----	14
1.7- Literature Survey on Corrosion Inhibition of Carbon Steel -----	16
Aim of the present work -----	69

2- Experimental Techniques

2.1- Materials.-----	70
2.1.1- Chemical Composition of Material Samples.-----	70
2.2- Chemical and Solutions.-----	70
2.2.1- Chemicals.-----	70
2.2.1.1-Organic Additives:-----	70
2.2.1.2-Sulfuric Acid. (BDH grade) -----	72
2.2.2- Solutions. -----	72
2.2.2-a- Sulfuric Acid -----	72
2.2.2-b- Inhibitor Solution -----	72
2.3- Experimental Techniques.-----	72
2.3.1- Chemical Technique (Weight Loss Method).-----	72
2.3.2- Electrochemical Technique (Galvanostatic PolarizationMethod).---	73
2.3.2-(a)- Electrochemical Cell -----	73
2.3.2-(b)- Electrodes -----	75
2.3.2-(b)-i) Working Electrodes -----	75
2.3.2-(b)- ii) Reference Electrodes -----	76
2.3.2-(b)- iii) Auxiliary Electrodes -----	76
2.3.2-(b)- iv) Working procedure-----	76

3- Results and discussion

Section (A)

Studying the Corrosion Inhibition of Carbon Steel in Sulfuric Acid by Some 5-Arylazothiazole Derivatives Using Chemical Technique.

Introduction-----	78
3.1- Effect of Inhibitor Concentrations -----	82
3.2- Adsorption Isotherms -----	91
3.3- Effect of Potassium Iodide -----	97
3.4- Effect of Substituted Group -----	98
3.5- Effect of Temperatures -----	107
3.6- Activation Parameters of Inhibition Process -----	133

Section (B)

Studying the Corrosion Inhibition of Carbon Steel in Sulfuric Acid by Some 5-Arylthiazole Derivatives Using Electrochemical Technique

3.7- Galvanostatic Polarization Measurements -----	149
3.8- Adsorption Isotherms -----	165
