**MANAGEMENT OF PAROXYSMAL
SUPRAVENTRICULAR TACHYCARDIAS IN
PATIENTS WITH AND WITHOUT
STRUCTURAL HEART DISEASES**

B1-807

Thesis

Submitted to the faculty of medicine,

University of Alexandria

for partial fulfillment of the requirement for

**Master degree in
Critical Care Medicine**

By

YASSER ZAKARIA MAHMOUD MANSOUR

(M. B. B. Ch.)

*Resident in Emergency Hospital Faculty of Medicine
Mansoura University*

**Faculty of Medicine
Alexandria University**

2002

Supervisors

Prof. Dr.

TAREK HUSSEIN EL-BADAWY

Professor of Internal Medicine
Faculty of Medicine
Alexandria University

Prof. Dr.

HELMY MAHFOWZ ABOU BAKR

Professor of Cardiology
Faculty of Medicine
Mansoura University

Dr.

MAGDY ABDEL MONEM RASHWAN

Assist Professor of Cardiology
Faculty of Medicine
Alexandria University

2002

ACKNOWLEDGEMENT

Before and above all, my thanks to **ALLAH**.

I wish to express my deep appreciation and sincere gratitude for ***Professor Dr. Tarek Hussein El-Badawy***, Professor of Internal Medicine, Alexandria Faculty of Medicine for his keen supervision, kind support, valuable guidance and precious criticism that enriched this work. I owe to him a great deal of respect, my deepest thanks for his continuous help and encouragement to perform this research.

I am very grateful and truly indebted for ***Professor Dr. Helmy Mahfowz Abou Bakr***, Professor of Cardiology, Faculty of Medicine, Mansoura University, for his kind encouragement, continuous support and great help for the facilitation of all difficulties to accomplish this work. I owe to him a great deal of thanks and deepest feelings.

Words are not enough to express my particular thanks, sincere appreciation and great respect to ***Assistant Professor Dr. Magdy Abdel Monem Rashwan***, Assis. Professor of Cardiology, Faculty of Medicine, Alexandria University for his close support, valuable directions, sincere assistance, generous cooperation and encouragement.

• ARABIC SUMMARY	

LIST OF TABLES

1- Causes of cardiac arrhythmias.	12
2- Age distribution of verapamil group (group I).	46
3- Age distribution of D.C. group (group II).	46
4- Age distribution of adenosine group (group III).	46
5- Sex distribution among studied groups.	48
6- Symptoms of presentation of patients in studied groups.	48
7- Underlining heart diseases of studied patients.	51
8- the current medications of studied patients.	52
9- Pulse rate before, during and after verapamil administration.	54
10- Pulse rate before, during and after adenosine administration.	55
11- Pulse rate before, during and after D.C. administration.	56
12- Systolic blood pressure before, during and after verapamil administration.	58
13- Systolic blood pressure before, during and after D.C. administration.	59
14- Systolic blood pressure before, during and after adenosine administration.	60
15- Diastolic blood pressure before, during and after verapamil administration.	64

16- Diastolic blood pressure before, during and after D.C. administration.	65
17- Diastolic blood pressure before, during and after adenosine administration.	66
18- Respiratory rate before, during and after verapamil administration.	68
19- Respiratory rate before, during and after D.C. administration.	69
20- Respiratory rate before, during and after adenosine administration.	70
21- Serum potassium in verapamil group.	72
22- Serum potassium in D.C. group.	72
23- Serum potassium in adenosine group.	72
24- Electrocardiographic (ECG)-diagnosis of studied patients.	77
25- Echocardiographic findings in studied patients.	78
26- Doses of drugs and energy of D.C. used for management of studied patients.	80
27-Dose number used for restoration of sinus rhythm in studied patients.	83
28- Time for response after verapamil administration in minutes.	85
29- Time for response after D.C.shock administration in minutes.	85
30- Time for response after adenosine administration in minutes.	85

LIST OF FIGURES

1- Mechanism of AV nodal reentry.	14
2- Age distribution among studied groups.	47
3- Symptoms of presentation of patients in studied groups.	49
4- Pulse rate before and after management of studied patients.	57
5- systolic blood pressure changes with different management.	61
6- diastolic blood pressure changes with different management.	67
7- Correlation between serum potassium and before treatment and response time.	73
8- Echocardiographic findings in studied patients.	79
9- Doses of verapamil and adenosine used for management of studied patients.	81
10- Energy of DC used for management of studied patients.	82
11- Doses numbers used for restoration of sinus rhythm.	84
12- Time for response after management.	86

ABBREVIATIONS

ATP	adenosine triphosphate
AV-node	atrioventricular node
Ca ⁺	calcium ion
cAMP	cyclic adenosine monophosphate
CK	creatine kinase
CK-MB	creatine kinase myocardial band
CPR	cardiopulmonary resuscitation
DADs	delayed afterdepolarization
DC	direct current
EADs	early afterdepolarization
ECG	electrocardiography
K ⁺	potassium ion
Na ⁺	sodium ion
MV	milivolt
LDH	lactic acid dehydrogenase
Ti	transient inward
S.V.T.	supraventricular tachycardia
P.S.V.T.	paroxysmal supraventricular tachycardia
W.P.W.	Wolff-Parkinson-White syndrome

Introduction
