Project

SYNTHESIS AND APPLICATION OF SOME NEW DYES  
DERIVED FROM COUMARIN AND PHENOXAZINE  
DERIVATIVES

A THESIS

Submitted to Chemistry Department,  
Faculty of Science at Sohag, Assiut University

For  
The Degree of Doctor of Philosophy of  
Science (Chemistry)

Presented by

Hassan Mahmoud Mostafa  
B. Sc. & M. Sc. (Chemistry)

Supervised By

Prof. Dr. Salah Shakra  
Prof. of Applied Organic Chemistry  
Textile Research Division  
National Research Centre  
Calro

Prof. Dr. Abdel-Badih A. G. Ghattas  
Prof. of Organic Chemistry  
Assiut University  
Faculty of Science  
Sohag

Dr. Hosam Abdel-Ghany  
Ass. Prof. of Organic Chemistry  
Assiut University  
Faculty of Science  
Sohag

1994

SYNTHESIS AND APPLICATION OF SOME NEW DYES  
DERIVED FROM COUMARIN AND PHENOXAZINE  
DERIVATIVES

#### ACKNOWLEDGEMENT

*"I do thank Allah for all gifts he gave me"*

The author wishes to express his deep thanks and sincere gratitude to Prof. Dr. Salah Shakra, Textile Research Division, National Research Centre, Dokki, Cairo, Egypt, for his invaluable help, helpful advices and discussions through this work.

He also wishes to express his deep thanks and sincere gratitude to Prof. Dr. Abdel-Badiah A.G. Ghattas, Professor of Organic Chemistry, Faculty of Science at Sohag, for suggesting the topic of investigation, continuous supervision and valuable discussions.

He also expresses his thanks to Dr. Hosam Abdel-Ghany, Ass. Professor of Organic Chemistry, Faculty of Science at Sohag, for his suggestions, kind supervision and encouragement.

I have the pleasure to express my thanks to prof. Dr. A.A. El-Samahy, vice-president of Assiut University, Prof. Dr. A.K. El-Shafei, Former Dean of Faculty of Science at Sohag and Prof. Dr. F.M. El-Cheikh, Chairman of Chemistry Department, Faculty of Science at Sohag, for continuous facilities and encouragement offered through this work.

Finally, the author wishes to express his deepest thanks to all staff members and colleagues in Chemistry Department, Faculty of Science at Sohag for their kind cooperation.

H.M. Mostafa

## CONTENTS

SUMMARY.....	i
INTRODUCTION.....	1
Disperse dyes.....	1
1.1. Definition.....	1
1.2. Their development and application.....	1
1.3. Synthetic polymer fiber.....	2
1.3.1. Polyester.....	3
1.4. Cause of affinity of disperse dyes.....	3
1.5. The mechanism of dyeing of polyester fibers with disperse dyes	5
1.6. Dyeing of polyester fibers with disperse dyes.....	7
1.6.1. Carrier dyeing of polyester fibers.....	9
1.6.2. High temperature dyeing of polyester fibers.....	13
1.6.3. Thermal dyeing of polyester fibers.....	14
Reactive-disperse dyes.....	16
2.1. Definition.....	16
2.2 Evaluation of reactive-disperse dyes applicable to blended.....	
polyester fibers.....	16
2.3. The dyeing of fiber mixture.....	22
2.4. Alkaline hydrolysis of reactive dyes.....	27
Acid dyes.....	28
3.1. Definition.....	28
3.2. Historical background.....	28
3.3. Uses.....	29
3.4. Cause of affinity.....	29
3.5. Classification of acid dyes.....	29
3.5.1. According to their chemical structure.....	29
3.5.2. According to dyeing methods.....	31
3.6. Mechanism of the acid dyeing process.....	32
3.7. Acid dyeing.....	35
3.8. Dyeing assistants in acid dyeing.....	35

<b>EXPERIMENTAL</b> .....	37
4.1. Instrumentation and measurements.....	37
4.2. Synthesis of dyestuff.....	38
4.3. Materials and chemicals for dyeing.....	55
4.4. Methods of dyeing.....	56
4.5. Testing.....	59
<b>RESULTS AND DISCUSSION</b> .....	63
<b>Disperse dyes</b> .....	63
5.1. Synthesis of some aromatic amines coupling component.....	63
5.2. Synthesis of azo disperse dyes derived from 6-Aminocoumarin and 3-Aminophenoxazine-1-carboxylic acid.....	64
5.3. Application of the prepared disperse dyes.....	81
5.4. Electrical and optical properties of some disperse dyes.....	83
5.4.1. Dipole moment.....	83
5.4.2. Visible spectra.....	87
5.4.3. Light fastness.....	91
5.5. Relation between Dipole moment, Light fastness and $\lambda_{\text{max}}$ for... some monoazo disperse dyes.....	94
5.6. Relation between Light fastness of colorants and their..... concentration in the substrate.....	96
5.7. Fastness characteristic of the dyed fabrics.....	98
5.7.1. Sublimation fastness.....	98
5.7.2. Washing fastness.....	102
5.7.3. Perspiration fastness.....	105
5.7.4. Rubbing fastness.....	111
<b>Reactive-disperse dyes</b> .....	114
6.1. Synthesis of reactive-disperse dyes derived from..... 6-Aminocoumarin.....	114
6.2. Application of the prepared reactive-disperse dyes.....	119
6.3. Assessment of colour measurement.....	121
6.4. Fastness characteristic of the dyed fabrics.....	123
6.4.1. Light fastness.....	123
6.4.2. Washing fastness.....	125
6.4.3. Perspiration fastness.....	128
6.4.4. Rubbing fastness.....	131

Acid dyes.....	133
7.1. Synthesis of acid dyes derived from 6-Aminocoumarin.....	133
7.2. Application of the prepared acid dyes.....	135
7.3. Study of the optimum dyeing condition.....	136
7.3.1. Effect of time.....	136
7.3.2. Effect of temperature.....	138
7.3.3. Effect of dye concentration.....	139
7.3.4. Effect of liquor ratio.....	140
7.3.5. Effect of sulphuric acid concentration.....	141
7.4. Fastness characteristic of the dyed fabrics.....	142
7.4.1. Light fastness.....	142
7.4.2. Washing fastness.....	142
7.4.3. Perspiration fastness.....	143
7.4.4. Rubbing fastness.....	144
