

**Studies on phosphate solubilizing fungi isolated  
from rocks and agriculture soil for improvement  
of maize plant growth**

**Thesis**

**Submitted in partial fulfillment of the requirements of the  
degree of Master of Science  
(Microbiology)**

**BY**

**Peter Farag Fouad Aziz**  
(B.Sc. Microbiology, 2008)

**Supervisors**

**Dr. Naziha Mohamed Hassanein**

Professor of Microbiology, Microbiology Department, Faculty of Science, Ain  
Shams University.

**Dr. Lobna Abd El-Aziz Ahmed Moussa**

Assistant Professor of Microbiology, Microbiology Department, Agriculture  
Research Center.

**Department of Microbiology  
Faculty of Science  
Ain Shams University  
(2012)**

## ACKNOWLEDGEMENT

*First and foremost, I feel always indebted to Allah, the most beneficent and merciful. I can do nothing without Him*

*I would like to express my deep gratitude and thanks to my dear supervisor Dr. **Naziha Mohamed Hassanein**, Professor of Microbiology, Department of Microbiology, Ain shams university, for her help, encouragement, continuous advice and her expert supervision to bring this thesis to more than satisfactory finish. She always patient, perfect in work organization and the best advisor. I am proud to be one of her students and I hope that she is satisfied with me.*

*A great thanks to Dr. **Lobna Abd El-Aziz Ahmed Moussa**, assistant professor of Microbiology, Agriculture research center for her supervision, support, encouragement, valuable advices and constant help.*

*A deep thank to **Microbiology Department** and all my Colleagues in microbiology department for their assistance, support and for providing a suitable environment during my work.*

## Approval sheet

### **Studies on phosphate solubilizing fungi isolated from rocks and agriculture soil for improvement of maize plant growth**

By

**Peter Farag Fouad Aziz**

B.Sc. Microbiology, Faculty of Science,  
Ain Shams University, 2008

#### Supervisors

**Prof. Dr. Naziha Mohamed Hassanein**

Professor of Microbiology,  
Faculty of Science,  
Ain Shams University.

#### Approved

**Dr. Lobna abd El-Aziz Moussa**

Assistant Professor of Microbiology,  
Agriculture Research Center.

#### Examination committee

**Prof. Dr. Rawia Gamal Fathy**

Emeritus Professor of Microbiology  
Faculty of Agriculture,  
Ain shams University.

**Prof. Dr. Ahmed Ibrahim El-Dewany**

Professor of nature products of chemistry  
National Research Center

**Prof. Dr. Naziha Mohamed Hassanein**

Professor of Microbiology,  
Microbiology Department,  
Faculty of Science, Ain Shams University.

**Date of examination 24 / 2/ 2013**

**Approval date / /**

**University Council approved / /**

**This dissertation has not been previously  
submitted for any degree at this or at any  
other university**

**Peter Farag Fouad Aziz**

<b>List of Tables</b>	
<b>List of Figures</b>	
<b>List of Abbreviations</b>	
<b>Abstract</b>	
<b>Chapter I: Introduction</b> .....	1
<b>Chapter II: Review of literature</b>	
1. Biofertilizers.....	5
1.1 Definition of biofertilizers.....	5
1.2 Advantages of biofertilizers.....	5
1.3 Types and classification of biofertilizers.....	6
2. Phosphate solubilization.....	7
2.1 Importance of P for plants and microorganisms.....	7
2.2 Phosphorus in the soil system and its availability to plants.....	10
2.3 Phosphate solubilizing microorganisms.....	15
2.3.1 Phosphate solubilizing fungi.....	16
2.3.2 Phosphate solubilizing bacteria.....	17
2.3.3 Phosphate solubilizing actinomycetes.....	18
2.4 The rationale for plant inoculation with phosphate solubilizing fungi.....	19
2.5 Screening and selection of phosphate-solubilizing fungi.....	21
2.6 Mechanisms of phosphate solubilization.....	22
2.7 Mode of application of phosphate solubilizing fungi.....	30
3. Rocks and rock phosphate.....	31
3.1 Rocks and microorganisms.....	31
3.2 Rock phosphate.....	32
3.2.1 Factors affecting rock phosphate dissolution.....	33
3.2.2 Influence of plant species on rock phosphate dissolution.....	33
3.2.3 Phosphorus solubilizing biofertilizers.....	35
3.2.4 RP solubilization by fungi.....	36
3.2.5 Egyptian rock phosphate.....	38
4. Maize.....	39

4.1 Introduction.....	39
4.2 Taxonomy.....	40
4.3 Description of maize plant.....	41
4.4 Varieties of maize plant.....	42
4.5 Economic importance.....	44
4.6 Maize in Egypt.....	45
4.6.1 Varieties of Egyptian maize.....	45
4.6.2 Maize production in Egypt.....	46
4.7 Effect of PSMs on growth, yield and phosphorous economy.....	47
<b>Chapter III: Materials and Methods</b>	
1. Analytical properties of soils.....	50
2. Isolation and identification of fungi from rhizosphere soils and rocks.....	50
2.1 Isolation of fungi from rhizosphere soil.....	50
2.2 Isolation of fungi from rocks.....	51
2.3 Identification of fungi isolated from rhizosphere soil and rocks.....	51
3. Selection of PSF using solubilization index (SI).....	52
4. <i>In vitro</i> studies.....	53
4.1 Effect of PSF isolated from rhizosphere soils and rocks on pH change of phosphate media .....	53
4.2 Estimation of available phosphorus concentration on PB media.....	53
4.3 Determination of phosphatases activity of PSF.....	55
4.4 Effect of different fungicides on the selected PSF.....	57
4.5 Quantitative assay of cytotoxicity.....	58
4.6 Quantitative determination of organic acids production by PSF using HPLC.....	59
4.7 <i>In vitro</i> antagonistic activity of the PSF against each other.....	61
5. Greenhouse studies.....	62
5.1 Soil test.....	62
5.2 Preparation of fungal inoculum.....	62
5.3 Preparation of seeds and pot treatments.....	62
5.4 Maize growth assessment.....	64

6. Soil experiments.....	64
6.1 Determination of pH change of rhizosphere soil of maize treated with PSF.....	64
6.2 Effect of PSF on phosphorus availability in soil amended with rock phosphate.....	65
6.3 Fluorescein diacetate (FDA) hydrolysis assay.....	66
6.4 Isolation, counting and identification of fungi from rhizosphere of maize plants treated with the selected PSF.....	67
7. Media used.....	68
7.1 Isolation media.....	68
7.1.1 Media used for isolation of fungi from rhizosphere and rocks.....	69
7.2 Selection media.....	70
7.3 Identification media.....	70
7.3.1 Media used for the genus <i>Aspergillus</i> .....	70
7.3.2 Media used for the genus <i>Pencillium</i> .....	71
7.3.3 Media used for general Mucorales.....	72
7.3.4 Media used for dematiaceous Hyphomycetes.....	72
7.3.5 Media used for the genus <i>Fusarium</i> .....	72
8. Statistical analysis.....	72
<b>Chapter IV: Results</b>	
1. Analytical properties of soils.....	73
2. Isolation and identification of fungi isolated from rhizosphere soils and rocks.....	74
2.1 Isolation of fungi from rhizosphere soils.....	74
2.2 Isolation of fungi from rocks.....	78
3. Selection of PSF using solubilization index (SI).....	80
4. <i>In vitro</i> studies.....	89
4.1 Effect of PSF on pH change of phosphate media.....	89
4.2 Quantitative estimation of available phosphorus concentration on PB media.....	92
4.3 Quantitative estimation of phosphatases activity of PSF.....	99
4.4 Effect of different fungicides on the selected PSF.....	105
4.5 Quantitative assay of cytotoxicity.....	109
4.6 Quantitative determination of organic acids production by PSF using HPLC.....	112
4.7 <i>In vitro</i> antagonistic activity of the PSF against each other.....	116
5. Greenhouse studies.....	119
5.1 Analytical properties of experimental soil.....	119
5.2 Effect of the selected phosphate solubilizing fungi on some growth and yield parameters of maize plants.....	120
