Physics Department

Fabrication and Characterization of Some Ceramic Scaffolds

By

Hesham Ibrahim El Dessouki Ibrahim Asaker

A thesis

*Submitted to Physics Dept., Faculty of Science-
Al Azhar university (2013)*

For

M.Sc. Degree in Physics

Under the Supervision of

- Prof. Dr. Ismail Kashif Mohammad Hany

*Professor of Solid state physics, Head of Physics Dept.,
Faculty of Science, Al Azhar University*

- Prof. Dr. Salma Mohammad Hussein Naga

*Professor of Ceramics Chemistry and Technology, Ceramics Dept.,
National Research Centre*

- Prof. Dr. Bothaina M. Abdel Mon'em EL Hady

*Professor of Polymers and biomaterials, Biomaterials Dept.,
National Research Centre*

- Dr. Hesham Foli Mohammad El Maghrabi

*Researcher of Ceramics Chemistry and Technology, Ceramics Dept.,
National Research Centre*

قَالَ تَعَالَى: أَعُوذُ بِاللَّهِ مِنَ الشَّيْطَانِ الرَّجِيمِ

﴿الرَّحْمَنُ ۝ ۱﴾ عِلْمَ الْقُرْآنِ ۝ ۲﴾ خَلَقَ

الْإِنْسَانَ ۝ ۳﴾ عِلْمَهُ الْبَيَانَ ۝ ۴﴾ الشَّمْسُ وَالْقَمَرُ

بِحُسْبَانٍ ۝ ۵﴾ وَالنَّجْمُ وَالشَّجَرُ يَسْجُدَانِ ۝ ۶﴾ ﴿

صدق الله العظيم

(الرحمن: ۱ - ۶)

ACKNOWLEDGEMENT

Acknowledgement

This thesis would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study.

First and foremost, I must acknowledge and thank The Almighty Allah for blessing, protecting and guiding me throughout this period. I could never have accomplished this without the faith I have in the Almighty.

I would like to express my deep and sincere gratitude to my supervisor *Prof. Dr. Ismail Kashif Mohammad Hany* for the continuous support of my M.Sc. study and research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research. I consider myself fortunate to work under his supervision.

I have been indebted in the preparation of this thesis to my supervisor *Prof. Dr. Salma Mohammad Hussein Naga* whose patience and kindness, as well as her academic experience, have been invaluable to me. I attribute the level of my Master degree to her encouragement and effort and without her this thesis would not have been completed or written. One simply could not wish for a better or friendlier supervisor.

I would also wish to express my gratitude to *Prof. Dr. Bothaina M. Abdel Mon'em EL Hady* for extended discussions and valuable research point suggestions which

have contributed and guided me in my thesis. Her understanding, encouraging and personal guidance have provided a good basis for the present thesis.

I am grateful to *Dr. Hesham Foli Mohammad El Maghrabi* for helping me to learn that there is more than one way to approach a problem. He is a brilliant scientist, and I am sure he will be an amazing professor.

I would like to express my sincere and deep gratitude to *Dr. M. Salah Wahsh* who was not a part of the supervision group but helped me out, (a wonderful person with great lab skills who was nice to carry on the practical work). I will forever be grateful to him.

I owe a huge debt of gratitude to *Prof. Dr. M. El Gohary* who selected me to the Master Class.

My special appreciation goes to *Assist. Prof. Dr. Saad Abdel Moneim Abdel Azeem El Nemr*, who was there for me during the thesis writing to help me proof reading, giving suggestions and for everything he has done for me.

I am ever grateful to my first teacher, *Mr. Hassan Ali "An engineer"*, for all that he taught me during the first few years, for his support and generous care during my life.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence.

I owe a huge debt of gratitude to my brother, *Mr. Zein El Abedien Yossof Ezz El Dein*, who was always beside me during the happy and hard moments, during my life, to push me and motivate me. I can't see the shape of my life without him.

My huge debt of gratitude also goes to my brother, *Mr. Abdullah Mohammad Ishaq*, for sticking by my side, even when I was irritable and depressed and also for every moment he gave it to me and I spent with him.

Personally, I would like to thank my big family, my friends and colleagues for supporting me throughout the years, financially, practically and with moral support, especially my parents.

I owe my loving thanks to my wife "*Amira*", my sons "Mohammad and Mahmoud" and my little two daughters "Marwa and Mariam". They have lost a lot due to my research. Without their encouragement and understanding it would have been impossible for me to finish this work.

CONTENTS

	Page . NO.
ACKNOWLEDGMENT	
CONTENTS	I
ABBREVIATIONS	IV
SUMMARY	IX
CHAPTER I	1
I. INTRODUCTION	1
I.1. Scope and objectives of the present work	2
I.2. Thesis outline	2
• Aim of the work	4
CHAPTER II: LITERATURE REVIEW	6
II.1. Major Problems of implant Materials	8
II.2. Bioceramics	8
II.3. Polymeric Biomaterials	10
II.3.1. Natural polymers	11
II.3.2. Synthetic polymers	11

List of Contents

II.4. Production of Bioactive Composites	15
II.4.1. Physico-chemical route	15
II.4.2. Thermo-mechanical route	17
II.5. Titanium Dioxide-Titania (TiO₂)	19
II.6. Organic-inorganic hybrids prepared via sol-gel technique .	21
II.7. Simulated Body Fluid (SBF)	24
II.8. Previous research work	26
II.9. Future trends: sol–gel derived bioactive nanocomposites	47
CHAPTER III	50
III.1. Experimental Methods	50
III. 1.1. Materials	50
III.1.2. Methods of preparation	52
III.1.2.1. Preparation of Ca–SiO₂-PDMS ormosil	52
III.1.2.2. Preparation of Ca–SiO₂-PDMS ormosils with titanium n-butoxide additions.	54

III.2. CHARACTERIZATION	56
III.2.1. Infra- Red analysis (IR)	56
III.2.1.1. FT–IR Spectroscopy	56
III.2.1.2. Experimental Setup	58
III.2.1.3. Applications	60
III.2.2. X-ray diffraction analysis (XRD)	61
III.2.3. Weight Loss percentage	63
III.2.4. <i>In vitro</i> test (using Simulated Body Fluid)	63
III.2.5. Hardness test	64
III.2.6. Microstructure investigation by (Scanning electron microscope (SEM)	66
CHAPTER IV	69
IV. RESULTS & DISCUSSION	69
IV.1. FTIR	69
IV.2.The X-ray diffraction analysis (XRD)	76
