MALE SEX DEVELOPMENT; PHYSICAL AND HORMONAL PROFILE AMONG EPILEPTICS

Thesis

Submitted for partial fulfillment of
MD Degree in **PEDIATRICS**

By

Hussein Abd El-Rahman Attya

*Assist. Lecturer, Faculty of Medicine,
Sana'a University*

Supervised By

Prof. Dr. Hamed Mahmoud Shatla

*Prof. of Pediatrics and Dean of Faculty of Medicine
Faculty of Medicine, Ain Shams University*

Prof. Dr. Hamed Ahmed El-Khayat

*Prof. of Pediatrics
Faculty of Medicine, Ain Shams University*

Prof. Dr. Gihan Kamal Hassan Ali

*Prof. of Clinical pathology
Faculty of Medicine, Ain Shams University*

Prof. Dr. Mohammad Ossama Abdulghani

*Prof. of Neurology and Psychiatry
Faculty of Medicine, Ain Shams University*

**Faculty of Medicine

LIST OF TABLES

<u>Tab. No.</u>	<u>Title</u>	<u>Page</u>
1	Etiologic factors associated with epileptic seizures	15
2	Drugs associated with epileptic seizures.....	16
3	Commission on Classification and Terminology of the International League Against Epilepsy, 1981	19
4	Commission on Classification and Terminology of the International League Against Epilepsy, 1989	26
5	Differential diagnosis of epilepsy	46
6	Antiepileptic drugs for different types of seizures	51
7	Antiepileptic drugs	52
8	Sexual maturity rate staging	63
9	Descriptive data of epileptics and controls	90
10	Comparison between epileptics and controls as regards some descriptive data.....	91
11	Mean values of anthropometric measurements in patients versus controls	92
12	Mean values of anthropometric measurements of epileptics versus their matched controls in the three age groups	93
13	Mean values of gonadarche and mean age of spermarche in epileptics versus controls.....	94

14	Mean values of gonadarche in the three age groups of epileptics versus their matched controls	95
15	Comparison between the 2 nd and 3 rd age groups (IB and IC) epileptics and their age matched controls as regards pubarche staging	96
16	Mean values of hormonal profile in epileptics versus controls	97
17	Mean values of hormonal profile in the 1 st age group (IA) patients (8 to <14 years) versus their matched controls	99
18	Mean values of hormonal profile in the 2 nd age group (IB) patients (14 to 16 years) versus their matched controls	101
19	Mean values of hormonal profile in the 3 rd age group (IC) patients (above 16 years) versus their matched controls	103
20	Mean values of anthropometric measurements in primary versus symptomatic epileptics in the different age groups.....	105
21	Mean values of gonadarche and age of spermarch in primary versus symptomatic epileptics.....	106
22	Mean values of gonadarche in primary versus symptomatic epileptics in the different age groups	107

23	Mean values of hormonal profile in primary versus symptomatic epileptics	108
24	Mean values of hormonal profile in the 1 st age group (IA) patients with primary versus symptomatic epileptics	110
25	Mean values of hormonal profile in 2 nd age group (IB) with primary versus symptomatic epileptics	112
26	Mean values of hormonal profile in 3 rd age group (IC) with primary versus symptomatic epileptics	114
27	Mean values of anthropometric measurements in epileptic patients on monotherapy versus those on polytherapy	116
28	Mean values of anthropometric measurements in epileptics on monotherapy versus those on polytherapy in the three different age groups.....	117
29	Mean values of gonadarche and mean age of spermarche in epileptics on monotherapy versus those on polytherapy	118
30	Mean values of gonadarche in epileptics on monotherapy versus those on polytherapy in the three different age groups.....	119
31	Mean values of hormonal profile in epileptics on monotherapy versus those on polytherapy	120

32	Mean values of hormonal profile in 1 st age group (IA) epileptics on monotherapy versus those in polytherapy	121
33	Mean values of hormonal profile in 2 nd age group (IB) epileptics on monotherapy versus those on polytherapy	122
34	Mean values of hormonal profile in 3 rd age group (IC) epileptics on monotherapy versus those on polytherapy	123
35	Mean values of anthropometric measurements in epileptics with controlled seizures versus those with uncontrolled seizures.....	124
36	Mean values of anthropometric measurements in epileptics patients with controlled versus those with uncontrolled seizures in the three different age groups.....	125
37	Mean values of gonadarche and mean age of spermarche in epileptic patients with controlled versus those with uncontrolled epilepsy	126
38	Mean values of gonadarche in group (IA) patients with controlled versus uncontrolled epilepsy.....	127
39	Mean values of hormonal profile in patients with controlled versus uncontrolled epilepsy.....	128
40	Mean values of hormonal profile in 1 st age group (IA) epileptics with controlled versus those with uncontrolled epilepsy	129

41	Mean values of hormonal profile in 2 nd age group (IB) epileptics with controlled versus those with uncontrolled epilepsy	130
42	Mean values of hormonal profile in 3 rd age group (IC) epileptics with controlled versus those with uncontrolled epilepsy	131
43	Correlation between duration of epilepsy and each of anthropometric measurements, mean age of spermarche, gonadarche and hormonal profile among epileptics	132
44	Correlation between duration of epilepsy and each of anthropometric measurements, mean age of spermarche, gonadarche and hormonal profile among 1 st age group (IA) epileptics (8 to <14 years)	133
45	Correlation between duration of epilepsy and each of anthropometric measurements, mean age of spermarche, gonadarche and hormonal profile among 2 nd age group (IB) epileptics (14-16 years).....	134
46	Correlation between duration of epilepsy and each of anthropometric measurements, mean age of spermarche, gonadarche and hormonal profile among 3 rd age group (IC) epileptics (above 16 years).....	135

LIST OF FIGURES

<u>Fig. No.</u>	<u>Title</u>	<u>Page</u>
1	Etiology of epilepsy	14
2	The biosynthesis of sex steroid hormones	64
3	Mean values of gonadarche and mean age of spermarche in epileptics versus controls.....	94
4	Mean values of hormonal profile in epileptics versus controls	98
5	Mean values of hormonal profile in the 1 st age group (IA) patients (8 to <14 years) versus their matched controls	100
6	Mean values of hormonal profile in the 2 nd age group (IB) patients (14 to 16 years) versus their matched controls	102
7	Mean values of hormonal profile in the 3 rd age group (IC) patients (above 16 years) versus their matched controls	104
8	Mean values of gonadarche and age of spermarche in primary versus symptomatic epileptics.....	106
9	Mean values of hormonal profile in primary versus symptomatic epileptics	109
10	Mean values of hormonal profile in 1 st age group (IA) patients with primary versus symptomatic epileptics	111

- 11 Mean values of hormonal profile in 2nd age group (IB) with primary versus symptomatic epileptics113
- 12 Mean values of hormonal profile in 3rd age group (IC) with primary versus symptomatic epileptics115
