Burn Care: Educational Program for Nurses professional Development

Thesis
Submitted for Partial fulfillment
Of Doctorate Degree of
Nursing Science
D.N.Sc.
By

Manal Salah Hassan
Assistant Lecturer at Faculty of Nursing
Ain Shams University

Supervised by

Prof. Dr. Moustafa Hemeda
Head of Plastic Surgery and Burn Unit
Faculty of Medicine
Ain Shams University

Prof. Dr. Magda Abd Elaziz
Professor of Medical Surgical of nursing
Faculty of Nursing
Ain Shams University

Ass. Prof. Dr. Mahasen Ibrahim Abd-Elsattar
Assistant Professor of Medical Surgical Nursing
Faculty of Nursing
Ain Shams University

2001

Acknowledgements

First and foremost, I full always indebted to God, the most kind and the most merciful.

I would like to express my deepest gratitude to Professor Dr. ***Moustafa Hemeda,*** *Professor of Plastic Surgery, Ain Shams university, for his kind and generous attitude towards me during my work under his supervision and I would like to thank him for the bright illuminating remarks that guided me all throughout my work.*

I would like to thank very much Professor ***Dr. Magda Abd Elaziz****, Professor of Medical and Surgical Nursing, Ain Shams university, for her great help and advice which with no doubt paved the way for the production and completion of his work.*

I would like as well to express my deep appreciation to Assistant Professor ***Dr. Mahasen Ibrahim Abd El-sattar,*** *assistant professor of Medical Surgical Nursing, Ain Shams University, for her valuable help and support all through my work.*

Special thanks for ***Dr. Salah Naser****, Lecturer of Plastic surgery and Head of Burn Unit, Ain Shams University, and all the staff of the Burn Unit and Plastic Surgery department who helpful me through this work and to whom I want to express my deepest gratitude.*

Dedication

To my father and my mother
To my brothers
And last, but by far least to
My husband
To my children
Who have and will always is the source of inspiration for all my endeavors

Manal Salah Hassan

I-Introduction. ----------1
II- Aim of the study.----------3
III- Review of literature
Part (1)
–Anatomy and physiology of skin.----------4
-Function of the skin.----------6
Part(2)
Burn injury:
-Definition of burn injury.----------8
-Types and incidence of burn injury.----------8
-Degrees and classification of burn injury.----------11
-Factors determining the severity of burn injury.------17
Part (3):
Pathophysiological changes following burn injury:
-Local changes----------18
- Systemic changes.----------20
Part (4):
- Complications of burn injury.----------23
Part (5):
Management of burn injury
- Prognosis of burn injury----------25
- Stages of burn injury----------25
- First aid----------.----------27
- Triage criteria for transferring the burn victims to the Burn Center----------29
- Nursing management
Nursing management during the emergent phase----29
Nursing management during the acute phase---------32
Nursing management during the rehabilitative phase42
Part (6):
- Nurses role in patient health education----------47

Part (7):
- Nurses role in burn prevention----------50

Part (8):
- Nursing role in professional development.----------52

IV- Subjects and Methods. ----------58
V- Results of the study. ----------69
VI- Discussion. ----------117
VII- Conclusion.----------134
VIII- Recommendations.----------135
IX- Summary.---------- ---137
X- References.----------141
XI- Appendixes
XII- Arabic Summary.

List of Tables

Page

Table (1): Characteristics of study group----------70

Table (2): Differences between nurses' level of knowledge regarding the general score in pre and post program implementation. ----------75

Table (3): Differences between nurses' level of knowledge in pre and post program implementation regarding the content item scores. ----------77

Table (4): Nurses attitudes towards the victim with burn injury 80

Table (5): Differences between nurses' level of performance in pre and post program implementation.----------81

Table (6): Differences between inadequate nurses' performance in relation to 3 observation throughout the period of the study- 84

Table (7): Comparisons between the total nurses satisfactory knowledge and performance before and after the program implementation.---------- 85

Table (8): Nurses' satisfactory knowledge in relation to their age.---------- 87

Table (9): Nurses' satisfactory performance in relation to their age.---------- 89

Table (10): Nurses' satisfactory knowledge in relation to their qualification.---------- 91

Table (11): Nurses' satisfactory performance in relation to their qualification.---------- 93

Table (12): Nurses' satisfactory knowledge in relation to their years of experience.---------- 95

Table (13): Nurses' satisfactory performance in relation to their years of experience.---------- 97

Table (14): Nurses' satisfactory knowledge in relation to their training program.---------- 99

Table (15): Nurses' satisfactory performance in relation to their training program.---------- 101

Table (16): Demographic characteristics of patients under study. 103

Table (17): Differences between essential nursing activities for oxygenation maintenance before and after the program implementation.----------106

Table (18): Differences between essential nursing activities for circulation maintenance before and after the program implementation.----------107

Table (19): Differences between essential nursing activities for fluid and electrolytes maintenance before and after the program implementation.---------- 108

Table (20): Differences between essential nursing activities for mobility maintenance before and after the program implementation.---------- 109

Table (21): Differences between essential nursing activities for skin integrity maintenance before and after the program implementation.---------- 110

Table (22): Differences between essential nursing activities for nutritional maintenance before and after the program implementation.---------- 111
