

Faculty of Science Biochemistry department

Assessment of Protein Oxidation-Related Biomarkers in Children with Autism Spectrum Disorder

A Thesis

Submitted for the degree of Master of Science in Biochemistry As a partial fulfillment for requirements of the Master of Science

Presented by

Nermine Ezz-Eldine Ahmed Helmy

(B.Sc. Biochemistry/Chemistry, 2011)

Under supervision of

Prof. Dr. Shadia Abdel-Hamid Fathy

Professor of Biochemistry Faculty of Science Ain Shams University Prof. Dr. Naglaa Mostafa Sherif

Professor of Biochemistry Faculty of Science Ain Shams University

Prof. Dr. Mona Anwar Mohammed

Professor of Medical Biochemistry Medical Division National Research Centre

Declaration

This Thesis has not been submitted for a degree at this or any other University

Nermine Ezz-eldine Ahmed

Faculty of Science Biochemistry department

Biography

Name Nermine Ezz-Eldine Ahmed

Helmy

Date of Graduation June 2011,

Biochemistry/Chemistry department, Faculty of

Science, Ain Shams University

Degree awarded B.Sc. in Biochemistry and

chemistry

Acknowledgement

First and foremost thanks to Allah the most Beneficent and merciful.

I would like to express my deepest gratitude and appreciation to **Prof. Dr. Shadia Abel Hamid Fathy,** Prof. of Biochemistry, faculty of Science, Ain Shams University, for her valuable guidance and supervision throughout this work in spite of her responsibilities. It is a pleasure to work under her supervision.

I am very much indebted to **prof. Dr. Naglaa Mostafa**Sherif, Prof of biochemistry, Faculty of Science, Ain-Shams
University for her kind supervision, valuable advice,
constructive criticism and indispensable help throughout
this work.

Great appreciation and thanks go to prof. Dr. Mona
Anwar Mohammed, professor of Medical Biochemistry,
children with Special Needs Department, National
Research Center, for her kind instructions and advice that
were very valuable both in selecting and completing this
work.

My deep gratitude, appreciation and thanks go to **Prof. Dr.**Nagwa Abdel Meguid Mohamed, Prof. of Human Genetics, children with Special Needs Department, National Research Center, for her kind instructions and help in completing this work.

I would like also to express my deepest gratitude and great thanks to **Dr. Adel Ferig Abou Zied Hashish**,
Assistant professor of, Medical Biochemistry, children with Special Needs Department, National Research Center.

I also extend my great thanks to **Dr. Mona Anwar Elbana**, Researcher of Biochemistry, Medical Biochemistry Department, National Research Center, for her generous help and continuous support throughout this work.

2. Subjects and Methods	42
2.1. Subjects	42
2.2. Methods	44
• Quantitative determination of 3-nitrotyrosine (3-NT) concentration using ELISA.	45
• Quantitative determination of Protein carbonyl (PC) concentration using ELISA.	49
• Quantitative determination of plasma nitrate/nitrite (NOx).	54
2.3. Statistical analysis.	57
3. Results	60
• Incidence of the mild, moderate, and severe ASD children among the total patients group.	60
• Plasma concentration of NO in the ASD children group.	61
 Plasma concentration of 3-NT in the ASD children group. Plasma concentration of PC in the ASD children group. 	62 63
 Plasma concentration of NO, 3-NT, and PC in the mild, 	
moderate, and severe ASD children groups.	65
• Results of Receiver Operating Characteristic (ROC) curve analysis.	68
• Correlation analysis between the severity of ASD clinical features (CARS score) and the measured biomarkers.	79
• Regression analysis for the measured biomarkers.	86
4. Discussion	89
Summary	100
