Metallogenic Studies On Wadi Fatira area, Eastern Desert, Egypt

By

**Ramadan Gharieb Haroun
(B.Sc, Geology)**

A Thesis

**Submitted in Partial Fulfilment of the Requirements
For
The Degree of Master of Science in Geology**

**Department of Geology
Faculty of Science
Ain Shams University**

TO MY FATHER
TO WHOM I OWE A LOT
AND MY FAMILY

Supervisors

Prof. Dr. A. M. Osman.

Professor of Economic Geology.

Faculty of Science, Ain Shams University.

Mr I. M. Shalaby

Ex-head of mines and quarries sector

Egyptian Geological Survey and Mining Authority.

Note

The present thesis is submitted by **Ramadan Ghareib Haroun** to the Faculty of Science, Ain Shams university in partial fulfilment for the requirements of the degree of Master of Science in Geology .

Beside the reseach work materialized in this thesis the candidate has attended Post-graduate courses (Structure Division) for one acadimic year (1991-1992), covering the following topics :

1-STRUCTURE GEOLOGY

2-SEDIMENTARY PETROLOGY

3-SEDIMENTATION

4-FIELD GEOLOGY

5-GEOMORPHOLOGY

6-GEOTECTONICS

7-STRATIGRAPHY

8-REMOTE SENSING

9-PALEONTOLOGY

10-GEOSTATICS AND BASIC LANGUAGE PROGRAMMING

11-ENGLISH LANGUAGE

Head of Geology

Department

Prof . Dr . Samir A. Awad

Abstract	
Chapter I : Introduction	1
1.1. General	1
1.2. Historical review on the gold Mineralization of Egypt	4
1.3. Aim and scope of the present study	13
1.4. Materials and Methods	13
Chapter II : Geology of Fatira Area	18
II.1. Historical review	18
II.2. Geologic setting	26
II.2.1. Metavolcanics	27
II.2.2. Metavolcanic tuffs and pyroclastics	31
II.2.3. Gabbroic rocks	32
II.2.4. Granodiorite	32
II.2.5. Adamellite	34
II.2.6. Dokhan volcanics	35
II.2.7. Alkali-granite	37
II.2.8. Post granitic dykes	39
II.3. Fatira Gold Mine	50
II.4. Structure	56
Chapter III : Petrography	74
III.1. Metavolcanics	74
III-1-a- Metadoleritic basalt	74
III-1-b- Meta basalt	75
III-1-c- Meta-andesite	78
III.2. Metavolcanic tuffs and pyroclastics	81
III-2-a- Andesitic tuffs	81
III-2-b- Lapilli tuffs	83
III.3. Metagabbro	83
III.4. Granodiorite	86
III.5. Adamellite	90

	<u>Page</u>
III.6. Dokhan volcanics	96
III.6.a. Andesite	96
III.6.b. Rhyolite	97
III.7. Alkali granite	99
III.8. Post granitic dykes	104
III.8.a. Basic dykes	104
III.8.a.1. Doleritic dykes	104
III.8.a.2. Basaltic dykes	107
III.8.b. Intermediate dykes	112
III.8.b.1. Trachyandesitic dyke	112
III.8.b.2. Andesitic dykes	115
III.8.c. Acidic dykes	120
III.8.c.1. Rhyolite	120
III.8.c.2. Rhyodacite	120
Chapter IV : Ore Mineralogy	122
IV.1. Gold	122
IV.2. Iron oxides	128
IV.3. Sulphide	143
IV.4. Titanium Minerals	154
IV.5. Scanning Electron Microscope (SEM) studies	164
IV.6. Paragenetic sequence.	184
Chapter V : Geochemistry	188
V.1. Introduction	188
V.2. Geochemical characteristics of Metavolcanic and volcanic rocks.	189
V.2.1. Petrochemical Nomenclature.	198
V.2.2. Magma type	200
V.2.3. Tectonic setting	203
V-3- Metagabbros	213
V.3.1. Classification	215
V.3.2. Magma type and tectonic setting	215
V-4- Granitic rocks	219
V.4.1. Classification	219
V.4.2. Magma type	229
V.4.3. Tectonic setting	234
V.4.4. Petrogenesis	242
Chapter VI : Summary and Conclusions	247
References	265
Arabic Summary	1-5

List of Figures

Fig.No.		<u>Page</u>
I.1	Location map of the studied area	2
I.2	TM image of the studied area	3
I.3	Sample location map of the studied area.	17
II.1	Geological map of Wadi Fatira area.	28
II.2	Geological sketch map of the dykes in the studied area	29
II.3-19	Field photographs illustrating different geological features.	30-48
II.15	Rose diagram of mafic and felsic dykes in the studied area.	46
II.20	Sample location map of Fatira Gold mine	51
II.21	Geological map of Fatira Gold mine	52
II.22-28	Field photographs illustrating different geological features.	54-57
II.29-31	Rose diagrams and Columnar chart for different joints dissecting the studied area.	60-62
II.32	Rose diagram and frequency percent table of the faults of the studied area.	64
II.33-36	Field photographs illustrating faults.	66-70
II.37	Rose diagrams and frequency percent table for dykes, faults and joints.	71
III.1-60	Photomicrographs illustrating mineral assemblages, textures of different rock units.	76-121
IV.14, 18, 19, 30, 34, 41	- XRD charts for different ore minerals	134-158

IV.1-48	Photomicrograph showing different minerals assemblages, textures in the studied rock units.	123-162
IV.49-71	SEM photos and EDX analyses for different ore minerals.	166-183
V.1-52	Variation diagrams showing different relationships between different chemical components.	199-245
VI.1	A simplified geotectonic model illustrating various stages of evaluation of the different rock units at the study area.	264

List of Tables

Table.No.		<u>Page</u>
II.1,2	Classification of the Egyptian basement rocks.	19-20
IV.(1-6)	Values of I/I_0 and d-spacings of some detected minerals by XRD and its standard ASTM cards.	133-157
IV.7	Results of Scanning Electron Microscope study.	165
IV.8	Paragenetic sequence of different ore minerals in the studied area.	186
V.1	Major oxides content (Wt%) of the volcanic and metavolcanic rocks.	191-192
V.2	Trace element (ppm) of the volcanic and meta-volcanic rocks.	193
V.3	CIPW norm values of volcanics and metavolcanics	195-196
V.4	World and Egyptian averages of some volcanic rocks.	197
V.5	Major oxides, trace elements contents and CIPW norm values of metagabbros.	116
V.6	Major oxides contents (Wt%) of granitoids.	121
V.7	Trace element content (ppm) of granitoids.	122
V.8	Normative values of granitoids.	123
V.9	Average of chemical composition of some well known granite types.	124
