

Molecular Mechanisms of Modulatory effects of Naturally Occurring Compounds on the Efficacy of Cancer Therapy

Thesis Submitted for the Degree of PhD in Pharmaceutical Sciences
(Pharmacology & Toxicology)

By

El-Shaimaa Abdel Razek A. Arafa

M.Sc Pharmacology, Cairo University

Assistant Lecturer of Pharmacology & Toxicology

Faculty of Pharmacy, Beni-Suef University

Under the Supervision of

Prof. Dr. Hekma A. Abdel Latif

Professor and Head of Pharmacology &
Toxicology Department
Faculty of Pharmacy
Cairo University

Prof. Dr. Mostafa E. El-Sayed

Professor of Pharmacology & Toxicology
Faculty of Pharmacy
Cairo University

Prof. Dr. Helmy Moawad

Professor of Pharmacology & Toxicology
Faculty of Pharmacy
Cairo University

Prof. Dr. Altaf A. Wani

Professor of Biochemistry
Radiology Department
James Cancer Hospital and Research Institute
The Ohio State University, USA

Dr. Mohamed A. El-Mahdy

Assistant professor of Pharmacology & Toxicology
Faculty of Pharmacy, El-Azhar University
Radiobiology department, The Ohio State University, USA

Faculty of Pharmacy

Cairo University

2009

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

“قَالُوا سِيِّدُنَا إِنَّكَ لَا تَعْلَمُ لَنَا إِلَّا
مَا عَلِمْتَنَا إِنَّكَ أَنْتَهُ الْعَلِيهِ
الْحَكِيمُ”

صَدَقَ اللَّهُ الْعَظِيمُ

(البقرة ٣٢)

Dedicated to my father

Prof. Dr. Abdel Razek A. Arafa

My first teacher and guidance

Acknowledgements

I am sincerely grateful to Prof. Dr. Hekma A. Abd El-Latif, Professor and head of Pharmacology & Toxicology department, Faculty of Pharmacy, Cairo University for her keen supervision, deep experience, generous assistance and kind relation. I would also like to express to her my gratitude for being patient with me during all the stages of this work and for her critical reviews for the dissertation.

I wish to express my sincere gratitude and profound thanks to Prof. Dr. Mostafa E. El-Sayed, Professor of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University who was not only a supervisor but also a father to me I really wish to thank him for his kindness, indispensable remarks, generous assistance and continuous encouragement. You taught me how to do good science and how to be problem-solver.

I want to express my gratitude to Prof. Dr. Helmy Moawad, Professor of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University for his kindness, patience, creative suggestions, valuable discussions, generous assistance, sincere help and time that he sacrificed for me.

I wish to thank my advisor Prof. Dr. Altaf A. Wani, Professor of Biochemistry, The Ohio State University for the opportunity to partake in research that has been an excellent intellectual journey and for his guidance, support, kindness and always providing great opportunity for his students.

A simple thank you could never be enough for Dr. Mohamed El-Mahdy, assistant professor of Pharmacology & Toxicology, Faculty of Pharmacy, El-Azhar University and The Ohio State University, for all the support you have given. You taught me everything I know in the field of molecular biology, and shaped me into the scientist I am today.

*I wish to thank all present and past lab members at The Ohio State University, especially **Bassant Barakat** and **Hany Arab** for their friendship, encouragement and continued support.*

My gratitude should be extended to include all my colleagues in the Department of Pharmacology & Toxicology, Faculty of Pharmacy, Beni-Suef University for their continuous cooperation and moral support.

*I owe a very special thank you to my husband **Hany Mostafa** and to my kids **Mohamed** and **Salma** for their daily encouragement and endless patience, especially throughout the last three years.*

*Finally, I would like to express my gratitude to my mother who, although separated by distance, has been with me through every step of the way. I would like to extend my gratitude to my brothers **Mohamed** and **Ahmed**, my sister **Aliaa** and their families for believing in me and supporting me.*

El-Shaimaa A. Arafa

List of Abbreviations

Apaf-1	Apoptotic-protease-activating-factor-1
BAD	Bcl-2-associated death protein
CA-125	Cancer antigen 125
CAD	caspase-activated DNase
Caspases	cysteine-aspartic acid proteases
Cdk	Cyclin-dependent kinase
Cis	Cisplatin
CKIs	Cyclin-dependent kinase inhibitors
COX-2	Cyclooxygenase 2
dATP	Deoxyadenosine triphosphate
DDP	diamminedichloroplatinum
ELISA	Enzyme-linked immunosorbent assay
ERK1/2	Extracellular signal-regulated kinases
FADD	Fas- associated death domain adapter protein
Fas L	Fas-Ligand
HER2/neu	Human epidermal growth factor 2
FKHRL	forkhead family transcription factor
GSK3β	Glycogen synthase kinase 3 β
HCT-116	Human colon cancer cells
ICAD	Inhibitor of caspase-activated DNase
IKBs	Inhibitors of NF- κ B
IKK	Inhibitor of NF- κ B kinase
JNK	c-Jun N-terminal kinases
MAPK	Mitogen-activated protein kinase

MDM2	The murine double minute
MOPS	3-morpholinopropanesulfonic acid
mTOR	mammalian target of rapamycin
MTT	(3-[4,5-dimethylthiazole-2-yl]-2,5-diphenyltetrazolium bromide
NER	Nucleotide excision repair
NF-κB	Nuclear factor κ B
P70S6K	Ribosomal protein S6 kinase
PDK	Pyruvate dehydrogenase kinase
PI3K	Phosphatidylinositol-3-kinase
PIP2	Phosphatidylinositol-4,5- diphosphate
PIP3	Phosphatidylinositol-3, 4, 5-triphosphate
PKB	Protein kinase B
Plks	Polo-Like Kinases
PTEN	Phosphatase and tensin homolog
tBid	Truncated Bid
TBST	Tris-buffered saline-tween
TG	Tangeretin
TNF	Tumor necrosis factor
TRADD	TNF receptor-associated death domain adapter protein
VDAC	Voltage-dependent anion channel
z-VAD-FMK	N-Benzoyloxycarbonyl-Val-Ala-Asp(O-Me) fluoromethyl ketone
