

**REGENERATIVE POTENTIAL OF  
IMMATURE PERMANENT TEETH  
WITH NECROTIC PULP**

**A CLINICAL AND HISTOPATHOLOGICAL STUDY**

*Thesis*

Submitted for partial fulfillment of Doctor Degree in  
**Endodontics**

By

**Shady Ali Hussein**

B.D.S. M.Sc.

Faculty of Dentistry – Ain Shams University

Faculty of Dentistry  
Ain Shams University  
2013

# **Supervisors**

**PROF. DR.**

**HOSSAM TAWFIK**

**Professor of Endodontics  
Dean of Faculty of Dentistry  
Ain Shams University**

**PROF. DR.**

**AHMED ABDELRAHMAN HASHEM**

**Professor of Endodontics  
Endodontics Department  
Faculty of Dentistry  
Ain Shams University**

**PROF. DR.**

**ASHRAF MOHAMED**

**ABDEL-RAHMAN ABU-SEIDA**

**Professor of Surgery, Anesthesiology & Radiology  
Department of Surgery, Anesthesiology & Radiology  
Faculty of Veterinary Medicine,  
Cairo University**

II

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا  
عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

ω

# Acknowledgment

I would like to express my deep gratitude to

**PROF. DR.**

**HOSSAM TAWFIK**

Dean of Faculty of Dentistry, Ain Shams University for his valuable guidance and effort throughout my academic and clinical work.

My sincere appreciation to

**PROF. DR.**

**AHMED ABDELRAHMAN HASHEM**

for his valuable supervision and unlimited support

My deep appreciation to

**PROF. DR.**

***ASHRAF MOHAMED ABDEL-RAHMAN ABU-SEIDA***

for his sincere help , cooperation and encouragement during this study.

Special thanks to

**ALL STAFF MEMBERS OF THE ENDODONTICS DEPARTMENT**

Faculty of Dentistry, Ain Shams University

*To my Dearest Father ...*

*... To my Lovely Mother*

*To my Dear wife...*

*... To my Sweet Brother & Sister*

*To my little Kids...*

# LIST OF TABLES

---

<b>Table No.</b>	<b>Title</b>	<b>Page</b>
1	The mean, standard deviation (SD) values and results of Kruskal-Wallis test for the comparison between increase in root length in the five groups.....	72
2	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between increase in root length through different time periods in each group.....	74
3	The mean percent, standard deviation (SD) values and results of Kruskal-Wallis test for the comparison between increase in dentin thickness in the five groups.....	82
4	The mean percent, standard deviation (SD) values and results of Friedman's test for the comparison between increase in dentin thickness through different time periods in each group.....	84
5	The mean, standard deviation (SD) values and results of Kruskal-Wallis test for the comparison between apical closure % in the five subgroups .....	88
6	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between apical closure % through different time periods in each group .....	89
7	The mean, standard deviation (SD) values and results of Kruskal-Wallis test for the inflammatory cell counts among the five groups. ....	94
8	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between inflammatory cell counts through different time periods in each group.....	98
9	Frequencies (n), percentages and results of Chi-square test for the comparison between prevalence of bone resorption in the five groups .....	101

---

---

<b>10</b>	Frequencies (n), percentages and results of McNemar's test for the comparison between prevalence of bone resorption through different time periods in each group.....	<b>103</b>
<b>11</b>	The mean, standard deviation (SD) values and results of Kruskal-Wallis test for the comparison between hard tissue formation scores in the four groups.....	<b>107</b>
<b>12</b>	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between hard tissue formation scores through different time periods in each group.....	<b>110</b>
<b>13</b>	The mean, standard deviation (SD) values and results of Kruskal-Wallis test for the comparison between vital tissues scores in the four groups.....	<b>113</b>
<b>14</b>	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between vital tissues scores through different time periods in each group.....	<b>117</b>
<b>15</b>	Frequencies (n), percentages and results of Chi-square test for the comparison between prevalence of apical closure in the five groups.....	<b>119</b>
<b>16</b>	Frequencies (n), percentages and results of McNemar's test for the comparison between prevalence of apical closure through different time periods in each group.....	<b>121</b>
<b>17</b>	The mean, standard deviation (SD) values and results of Mann-Whitney U test for the comparison between increase in root length in the two groups.....	<b>125</b>
<b>18</b>	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between increase in root length through different time periods in each group.....	<b>128</b>
<b>19</b>	The mean, standard deviation (SD) values and results of Mann-Whitney U test for the comparison between increase in dentin thickness in the two groups.....	<b>131</b>

---

---

<b>20</b>	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between increase in dentin thickness through different time periods in each group.....	<b>134</b>
<b>21</b>	The mean, standard deviation (SD) values and results of Mann-Whitney U test for the comparison between percent of apical closure in the two groups .....	<b>137</b>
<b>22</b>	The mean, standard deviation (SD) values and results of Friedman's test for the comparison between percent of apical closure through different time periods in each group.....	<b>140</b>

# LIST OF FIGURES

---

<b>Fig. No.</b>	<b>Title</b>	<b>Page</b>
1	Schematic drawing of the classification of samples.....	32
2	Showing administration of general anesthesia.....	35
3	Access cavity preparation in lower premolar using high-speed hand piece.....	35
4	Showing pulp extirpation.....	36
5	Showing injection of triple antibiotic past.....	36
6	Showing collection of the blood sample.....	39
7	Showing separation of the blood into 2 zones after centrifugation.....	39
8	Showing Collection of the clear plasma fluid.....	40
9	Plasma fluid injected in the root canal.....	40
10	Showing Unsealing of the collagen package.....	41
11	Collagen pieces after been cut with the scalpel.....	41
12	Collagen piece during insertion in the root canal.....	42
13	Injection of the PPP over the collagen.....	42
14	Mixing of the MTA.....	43
15	Insertion of the MTA to seal the pulp chamber.....	43
16	Access cavity in the upper anterior immature tooth.....	54
17	Tooth after application of triple antibiotic past and sealing with temporary filling.....	54
18	Application of 17% EDTA liquid for 2 minutes.....	55
19	Drawing of the 10 ml blood sample form the forearm.....	58
20	The centrifugation device.....	58
21	5ml blood sample after centrifugation for 7 minutes and separation of the red zone before complete coagulation.....	59
22	Plasma fluid after aspiration in the syringe.....	59
23	Plasma fluid 10 min after injection in the canal start to coagulate by body temperature.....	60

---

<b>Fig. No.</b>	<b>Title</b>	<b>Page</b>
24	The remaining plasma fluid in the syringe after coagulation by warming it by holding the tube for a while in the hand. The coagulation verified by pulling the syringe plunger out and the clot stands stood.....	60
25	Application of the collagen over the fibrin clot .....	61
26	Collagen piece after packing under the CEJ over the PRF .....	61
27	Injection of the white MTA using MTA carrier.....	62
28	MTA after condensation in the cavity .....	62
29	Sealing the cavity with glass inomer cement .....	63
30	Collagen pieces after being cut by scalpel.....	63
31	Insertion of the collagen piece in the canal.....	64
32	Collagen piece after being inserted in the canal.....	64
33	Injection of the PPP over the collagen.....	65
34	PPP after being injected over the collagen to fill the canal to the CEJ.....	65
35	Sealing the orifice with white MTA .....	66
36	Bar chart representing mean increase in root length in different groups .....	73
37	Line chart representing mean increase in root length through different periods in each group.....	75
38	showing a representative sample of group I (1 week) subgroup (a); Revascularization a: preoperative radiograph. b: radiograph Postoperative .....	76
39	showing a representative sample of group II (3 weeks) subgroup (a); Revascularization a: preoperative radiograph. b: radiograph Postoperative .....	76
40	showing a representative sample of group III (3 months) subgroup (a); Revascularization a: preoperative radiograph. b: radiograph Postoperative .....	77
41	showing a representative sample of group I ( 1 week) subgroup (b); PRF a: preoperative radiograph. b: radiograph Postoperative.....	86
42	showing a representative sample of group II (3 weeks)	88

<b>Fig. No.</b>	<b>Title</b>	<b>Page</b>
	subgroup (b) ; PRF a: preoperative radiograph. b: radiograph Postoperative.....	
<b>43</b>	showing a representative sample of group III (3 months) subgroup (b) ; PRF a: preoperative radiograph. b: radiograph Postoperative.....	<b>78</b>
<b>44</b>	showing a representative sample of group I ( 1 week) subgroup (c) ; Collagen + PPP a: preoperative radiograph. b: radiograph Postoperative.....	<b>79</b>
<b>45</b>	showing a representative sample of group II ( 3 weeks) subgroup (c) ; Collagen + PPP a: preoperative radiograph. b: radiograph Postoperative.....	<b>79</b>
<b>46</b>	showing a representative sample of group III (3 months) subgroup (c); Collagen + PPP a: preoperative radiograph. b: radiograph Postoperative .....	<b>80</b>
<b>47</b>	Bar chart representing mean percent increase in dentin thickness in different groups. ....	<b>83</b>
<b>48</b>	Line chart representing mean percent increase in dentin thickness through different periods .....	<b>85</b>
<b>49</b>	Line chart representing mean percent increase in dentin thickness through different periods .....	<b>88</b>
<b>50</b>	Line chart representing mean apical closure percent through different periods in each group.....	<b>90</b>
<b>51</b>	Bar chart representing mean inflammatory cell counts in different groups .....	<b>94</b>
<b>52</b>	Photomicrograph showing dense inflammatory cells infiltration in group I subgroup (a) (X400).....	<b>95</b>
<b>53</b>	Photomicrograph showing moderate inflammatory cells infiltration (score 2) group I subgroup (c) (X400) .....	<b>95</b>
<b>54</b>	Photomicrograph showing mild inflammatory cell infiltration (score 1) group II subgroup (a) (X400) .....	<b>96</b>
<b>55</b>	Line chart representing mean inflammatory cell counts through different periods in each group.....	<b>98</b>
<b>56</b>	Bar chart representing prevalence of bone resorption .....	<b>101</b>

<b>Fig. No.</b>	<b>Title</b>	<b>Page</b>
57	Photomicrograph showing apical root resorption group II subgroup (C) (x40).....	102
58	Photomicrograph showing apexification in subgroup III c (X100).....	102
59	Bar chart representing prevalence of bone resorption in different groups .....	104
60	Bar chart representing mean hard tissue formation scores in different groups.....	107
61	Bar chart representing mean hard tissue formation scores in different groups.....	108
62	Photomicrograph showing newly deposited hard tissue in subgroup III a (X200).....	108
63	Photomicrograph showing newly deposited hard tissue in subgroup III a (X100).....	109
64	Photomicrograph showing newly deposited hard tissue in subgroup III b (X400).....	109
65	Line chart representing mean hard tissue formation scores through different periods in each group.....	111
66	Bar chart representing mean vital tissues scores in different groups .....	114
67	Photomicrograph of a representative sample for subgroup III a; showing tissue in-growth up to apical third of the canal. (X100).....	114
68	Photomicrograph of a representative sample for group III B; showing tissue in-growth up to middle third of the canal. (X100).....	115
69	Photomicrograph of a representative sample for subgroup III a; showing higher magnification for the regenerated tissue showing dense fibrous connective tissue, fibroblasts and numerous blood vessels (X400).....	115
70	Line chart representing mean vital tissues scores through different periods in each group.....	117
71	Bar chart representing prevalence of apical closure in different groups. ....	119

<b>Fig. No.</b>	<b>Title</b>	<b>Page</b>
<b>72</b>	Photomicrograph showing apical closure in group III A (X40).....	<b>120</b>
<b>73</b>	Photomicrograph showing apexification in group III C (X100).....	<b>120</b>
<b>74</b>	Line chart representing prevalence of apical closure through different periods in each group.....	<b>122</b>
<b>75</b>	: Bar chart representing mean increase in root length in the two groups .....	<b>125</b>
<b>76</b>	Representative case for group I “Revascularization”; A: preoperative radiograph B : three month follow up radiograph C : six months up radiograph D : 9-months follow up radiograph E : 12 - months follow up radiograph .....	<b>126</b>
<b>77</b>	Representative case for group II “PRF”; A: preoperative radiograph B: three month follow up radiograph C: six month follow up radiograph D: 9-month follow up radiograph. E: 12-month follow up radiograph.....	<b>127</b>
<b>78</b>	Line chart representing mean increase in root length through different periods in each group.....	<b>129</b>
<b>79</b>	Bar chart representing mean increase in dentin thickness in the two groups .....	<b>131</b>
<b>80</b>	Representative case for group I “Revascularization”; A : immediate postoperative radiograph B: three month follow up radiograph C: six month follow up radiograph D: 9-month follow up radiograph. E: 12 - month follow up radiograph.....	<b>132</b>
<b>81</b>	Representative case for group II “PRF”; A: immediate postoperative radiograph B: three month follow up radiograph C: six month follow up radiograph D: 9-month follow up radiograph. E: 12-month follow up radiograph. ....	<b>133</b>
