ALEXANDRIA UNIVERSITY
FACULTY OF ENGINEERING

OXYGEN-ALKALINE PULPING OF RICE STRAW

A Thesis

Submitted to the Chemical Engineering Department
in partial fulfillment of the requirements
for the Degree of Master of Science

By

Aml Eskander Mikhael

B.Sc. Chem. Engineering

SUPERVISED BY

Prof. Dr. Mohamed Ahmed El-Taraboulsi

Chemical Engineering Department

Faculty of Engineering,

Alexandria University

Dr. El-Said Ahmed Abd El-Rehim

Research and Development Department

Raketa Pulp and Paper Mill

ALEXANDRIA

1995

1-21

1-21

We certify that we have read this thesis, and in our opinion it is fully adequate, in scope and quality as a dissertation for the degree of master of science.

Exam. committee:

Prof. Dr. M.A. El-Taraboulsi
Department of Chemical Engineering
Alexandria University.

Moh. A. El-Taraboulsi

Dr. E.A. Abd El-Rehim
Department of Research and Development
Rakta Pulp and Paper Mill, Alexandria.

El-Sayed Abd El-Rehim

Prof. Dr. B.A. Gbreel
Department of Chemical Engineering
Alexandria University.

ACKNOWLEDGMENT

I would like to express my sincere appreciation and gratitude to Prof. Dr. Mohamed A. El-Taraboulsi, Professor of Pulp and Paper technology, Faculty of Engineering, Alexandria University for his meticulous supervision, valuable guidance, consistent advice, encouragement and continuous help.

I am greatly indebted to Dr. El-Said A. Abd El-Rehim, the head of Research and Development, RAKTA Pulp and Paper Mill Alexandria, for his valuable continuous guidance, sincere help and facilities in doing this experimental research at RAKTA Mill laboratories.

I consider it is my duty to express my deep thanks to all staff members and technicians of RAKTA Company who offered me great help during this work.

I. OBJECTIVES OF THE STUDY	1
I.1. Introduction.	1
I.2. Objectives.	2
II. LITERATURE REVIEW	3
II.1. Introduction to various pulping methods.	3
II.1.1. Mechanical pulping.	3
II.1.2. Chemical pulping.	3
II.1.3. Semichemical pulping.	4
II.2. Alkaline pulping processes.	4
II.2.1. Reactions in alkaline pulping.	6
II.2.2. Variables affecting the alkaline pulping.	6
II.2.2.1. Effect of chip size.	8
II.2.2.2. Effect of liquor sulfidity.	8
II.2.2.3. Effect of alkali charge.	10
II.2.2.4. Effect of time and temperature.	10
II.2.2.5. Effect of liquor to good ratio.	13
II.2.2.6. Batch and continuous digesters.	13
II.2.3. Recent alkaline pulping using anthraquinone additive.	14
II.2.4. Alkaline-Oxygen pulping.	18
II.3. Pulping processes of straws.	26
II.3.1. Alkaline pulping of rice straw.	26

II.3.2. Alkaline-Oxygen pulping of straws.	29
II.3.3. Operational problems in pulping and chemical recovery plants of silica rich fibrous raw materials.	38
II.3.3.1. Problems in raw material handling operations.	38
II.3.3.2. Problems in pulping.	40
II.3.3.3. Problems in evaporation.	40
II.3.3.4. Problems in recovery furnace.	44
II.3.3.5. Problems in recausticizing operation.	44
II.3.4. The desilication methods.	45
II.3.4.1. Sources of silica.	45
II.3.4.2. Chemistry of silica and silica precipitation mechanism.	45
II.3.4.3. Effect of raw material handling on silica entering digester.	50
II.3.4.4. Effect of pulping conditions on the solubility of silica.	50
II.3.4.5. Physico-chemical properties of black liquor of agriculture residues.	52
II.3.4.6. Desilication by lime addition.	54
II.3.4.7. Desilication by pH reduction.	59
II.3.5. Biological methods for pollution abatement of silica rich black liquors.	65
II.4. Introduction to bleaching.	67
II.4.1. Common bleaching sequences.	67
II.4.2. Bleaching stages.	68
II.4.2.1. Chlorination stage.	68

II.4.2.2. Caustic extraction.	69
II.4.2.3. Hypochlorite bleaching.	70
II.4.2.4. Chlorine dioxide bleaching.	70
II.4.2.5. Oxygen bleaching.	71
II.4.2.6. Peroxide bleaching.	72
II.4.3. Environmental aspects of bleaching.	73
II.4.3.1. Abatement of bleach plant pollution.	76
II.4.3.2. Purification of bleach plant effluents.	77
III. EXPERIMENTAL PART.	79
III.1. Raw material.	79
III.1.1. analysis of raw material.	79
III.1.1.1. Dry content.	79
III.1.1.2. Ash.	80
III.1.1.3. Silica.	80
III.2. sodium hydroxide pretreatment of rice straw.	82
III.2.1. Laboratory procedure for sodium hydroxide pretreatment of rice straw.	82
III.2.2. Percentage yield.	82
III.2.3. Analysis of NaOH pretreated rice straw.	82
III.2.4. Analysis of pretreated screen liquor filtrate.	83
III.2.4.1. Residual alkali.	83
III.2.4.2. Total Solids.	83
III.2.4.3. Ash.	84
III.2.4.4. Silica.	84
III.2.4.5. Suspended and dissolved silica.	84
III.2.4.6. Chemical Oxygen Demand COD.	85

III.2.4.7. Biochemical Oxygen Demand BOD.	86
III.3. Soda pulping of alkali pretreated rice straw.	90
III.3.1. Apparatus used for digestion.	90
III.3.2. Laboratory procedure for soda pulping.	93
III.3.3. Pulp washing and screening.	94
III.3.4. Quantitative pulp analysis.	94
III.3.4.1. Percentage yield.	94
III.3.4.2. Percentage ash.	94
III.3.4.3. Percentage silica.	95
III.3.4.4. Permanganate Number.	95
III.3.4.5. Quantitative analysis of the black liquor.	96
III.3.4.5.1. Determination of total solids.	96
III.3.4.5.2. Determination of ash.	97
III.3.4.5.3. Determination of silica.	97
III.3.4.5.4. Foam properties of black liquor.	97
III.4. Alkali-Oxygen pulping of alkali pretreated rice straw.	98
III.4.1. Apparatus used for digestion.	98
III.4.2. Laboratory procedure for alkali-oxygen pulping.	98
III.4.3. Pulp washing and screening.	100
III.4.4. Quantitative pulp analysis.	100
III.4.5. Quantitative analysis of the black liquor.	100
III.4.6. Beating curve of alkali-oxygen pulp.	100
III.5. bleaching of rice straw pulps.	102
III.5.1. P-H bleaching of alkali pretreated soda and alkali-oxygen rice straw pulps.	102
III.5.1.1. Experimental conditions of the peroxide stage (P).	102

III.5.1.2. Experimental conditions of the hypochlorite stage (H).	103
III.5.1.3. Procedure for analysis of hydrogen peroxide.	103
III.5.1.4. Procedure for analysis of hypochlorite solution.	104
III.5.1.5. Percentage yield of P-H bleached pulps.	104
III.5.1.6. % GE brightness of P-H bleached pulps.	105
III.5.1.7. Physical properties of P-H bleached pulps.	105
III.5.2. E-H-H bleaching of alkali pretreated soda pulps.	105
III.5.2.1. Experimental conditions of the E stage.	105
III.5.2.2. Experimental conditions of the first H stage.	106
III.5.2.3. Experimental conditions of the second H stage.	106
III.5.2.4 Evaluation of E-H-H bleached pulps.	106
III.5.2.5. Beating curve of RAKTA (E-H-H) bleached rice straw pulp.	107
III.5.3. H-H bleaching of alkali pretreated alkali- oxygen pulps.	107
III.5.3.1. Experimental conditions of the first hypochlorite stage. (H).	107
III.5.3.2. Experimental conditions of the second hypochlorite stage (H).	108
III.5.3.3. Evaluation of (H-H) bleached pulps.	108
III.5.3.4. Pentosans of (H-H) bleached pulps.	108
III.5.3.5. Beating curve of (H-H) bleached pulp.	112
IV. RESULTS AND DISCUSSION.	113
IV.1. Introduction.	113
IV.2. Sodium hydroxide pretreatment of rice straw.	125

IV.2.1. Effect of NaOH dosage on silica reduction of unwashed and water washed rice straws.	125
IV.2.2. Effect of liquor to good ratio.	125
IV.2.3. Effect of NaOH pretreatment temperature.	129
IV.2.4. Effect of NaOH pretreatment time.	129
IV.2.5. Effect of washing on silica reduction of NaOH pretreated rice straw.	130
IV.2.6. Material balance of NaOH pretreatment of (water washed) rice straw.	130
IV.2.7. Suggested method for pollution control of pretreatment waste liquor.	132
IV.3. Soda pulping of alkali pretreated rice straw.	133
IV.3.1. Effect of amount of NaOH.	133
IV.3.2. Effect of cooking temperature.	135
IV.3.3. Effect of anthraquinone additive.	135
IV.3.4. Silica material balance of alkali pulped (alkali pretreated) rice straw.	136
IV.4. Alkaline-oxygen pulping of alkali pretreated rice straw	139
IV.4.1. Silica material balance of alkali-oxygen (alkali pretreated) rice straw.	146
IV.4.2. Effect of alkali-oxygen pulping on reducing the black liquor foam.	146
IV.4.3. Alkali-oxygen prebleaching of (alkali pretreated) rice straw soda pulp.	146
IV.4.4. Effect of alkali-oxygen pulping and alkali-oxygen prebleaching on pulp freeness.	149
IV.5. Bleaching of alkali pretreated soda pulps and alkali	151

pretreated alkali-oxygen rice straw pulps.	
IV.5.1. Peroxide (P). hypo (H) bleaching of water washed, alkali pretreated soda and alkali-oxygen rice straw pulps.	151
IV.5.2. E-H-H bleaching of water washed and alkali pretreated rice straw soda pulps.	153
IV.5.3. H-H bleaching of alkali pretreated, alkali-oxygen rice straw pulps.	155
IV.6. Economical evaluation of the suggested process of alkali pretreatment followed by alkali, or alkali-oxygen digestion and chemical recovery.	159
