Department of Physiology

Studies On Physiological Safety Of Rinderpest Vaccine In Sheep

*A Thesis presented
by*

Laila Abd El-Azeem Sadeek Ahmed

M.V.Sc. (1993), (Physiology) Cairo University
for Ph.D. Vet. Degree
(Physiology)

Under Supervision of

Prof. Dr. Soad Awad Mansour

Prof. of Physiology
Faculty Veterinary Medicine,
Cairo University

Prof. Dr.

Abd El-Kader A. Zaki

Prof. of Physiology
Faculty Veterinary Medicine,
Cairo University

Dr.

Mohamed Ahmed Mouaz

Head of Rinderpest Department,
Vet. Serum and Vaccine Research
Institute, Abbasia, Cairo

{ 1998 }

B. L. K. S.

APPROVAL SHEET

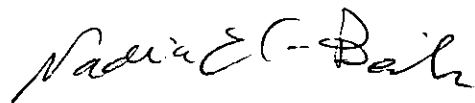

This is to approve that the discretion presented by **LAILA ABD EL-AZEEM SADEEK AHMED** to Cairo University entitled "**STUDIES ON PHYSIOLOGICAL SAFETY OF RINDERPEST VACCINE IN SHEEP**" for Ph.D. degree, has been approved by the examining committee.

Committee

Signature

PROF. DR. NADIA MOHAMED EL-BEH

Professor of Physiology,
Faculty of Science
Ain Shams University.

PROF. DR. MAGDY KHALAF SOLIMAN

Professor of Physiology,
Faculty of Veterinary Medicine
Cairo University.

PROF. DR. SOAD AWAD MONSOUR

Professor of Physiology,
Faculty of Veterinary Medicine
Cairo University.
(Supervisor)

PROF. DR. ABD EL - KADER AHMED ZAKI

Professor of Physiology,
Faculty of Veterinary Medicine
Cairo University.
(Supervisor)

Acknowledgement

I would like to express my sincere gratitude to **Prof. Dr. Soad Awad Mansour**, Professor of Physiology, Faculty of Vet. Med., Cairo Univ., for the valuable help, continuous encouragement and advises offered to me throughout this study.

My sincere appreciation is offered to **Prof. Dr. Abd El-Kader Ahmed Zaki**, Professor of Physiology, Faculty of Vet. Med., Cairo Univ., for guidance, advises, help and laboratory facilities offered.

I acknowledge gratefully the encouragement of **Prof. Dr. Mohamed Ahmed Mouaz**, Head of Rinderpest Department, Vet. Serum and Vaccine Research Institute, Abbasia, Cairo for his supervision and providing all facilities to accomplish this work.

I wish to thank **Prof. Dr. Afaf Mohamed Azoz**, Professor of Physiology, Faculty of Vet. Med., Cairo Univ., for her assistance.

My special appreciation is due to **Dr. Ahmed Hussein Moustafa**, Senior research, Rinderpest Department, Vet. Serum and Vaccine Research Institute, Abbasia, Cairo for his constant willing help.

I am very grateful to **Dr. Mohamed Hassan Khodier**, Senior research, Rinderpest Department, Vet. Serum and Vaccine Research Institute, Abbasia, Cairo for his sincere guidance, great help and giving a hand whenever needed.

A special consideration must be referred to Staff members of Rinderpest Department, Vet. Serum and Vaccine Research Institute, Abbasia, Cairo, for their help and kindness.

This work was supported in part by a grant for Scientific Research made by the Egyptian Academy for Scientific Research and Technology entitled "Studies on the Epizootology of Rinderpest Disease in Egypt and Methods for its Control".

Contents

	Page
1. Introduction	1
2. Review of Literature	3
1. Rinderpest disease	3
2. Tissue culture rinderpest vaccine	11
3. The haemograms and leukograms	24
4. Liver functions	30
5. Kidney functions	40
6. The enzymatic activity of alkaline phosphatase (Alp) and lactate dehydrogenase (LDH) enzyme in the leucocytic extracts	45
7. The anti-idiotypic (AIA) of tissue culture rinderpest vaccine	46
3. Material and Methods	62
4. Result	94
5. Discussion	177
6. Summary	99
7. References	204
Arabic Summary.	

List of Tables

Table	Title	Page
1	Estimation of rectal temperature of sheep before and after inoculated with TCRPV (field and 100 field dose)	90
2	Rinderpest neutralizing antibody titres (\log_{10}) in sheep vaccinated with TCRPV (field and 100 field dose)	93
3	Estimation of haematological picture in sheep before and after inoculation with TCRPV (field and 100 field dose)	96
4	Estimation of leucocytic picture in sheep before and after inoculation with TCRPV (field and 100 field dose)	103
5	Estimation of total protein, albumin, globulin and albumin/globulin ratio in sheep before and after inoculation with TCRPV (field and 100 field dose)	111
6	Estimation of liver function tests in sheep before and after inoculation with TCRPV (field and 100 field dose)	116
7	Estimation of kidney function tests in sheep before and after inoculation with TCRPV (field and 100 field dose)	121
8	Estimation of the activity of alkaline phosphatase enzyme (Alp) in the leucocytic extract in sheep before and after inoculation with TCRPV (field and 100 field dose)	125
8	Estimation of the activity of lactate dehydrogenase enzyme (LDH) in the leucocytic extract in sheep before and after inoculation with TCRPV (field and 100 field dose)	125

Table	Title	Page
9	Potency of anti-idiotypic by direct method of ELISA. The optical density (OD) of ten idiotype sera of sheep against their homologous anti-idiotypic sera prepared in goats	130
10	Estimation of rectal temperature (°C) in sheep after inoculation with anti-idiotypic (AIA) of rinderpest virus	132
11	Estimation of the anti-idiotypic antibody titres (log ₁₀) in sheep after inoculation with the anti-idiotypic of rinderpest virus (AIA)	135
12	Estimation of haematological picture in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV.	138
12	Estimation of haematological picture in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV.	143
13	Estimation of total leucocytic count (thousands/mm ³) and differential leucocytic count (%) in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV	145
14	Estimation of the total protein, albumin, globulin (g/dl) and albumin/globulin ratio in sheep before and after inoculation with the anti-idiotypic (AIA) of tissue culture rinderpest vaccine	152
15	Estimation of the liver function tests in sheep before and after inoculation with the anti-idiotypic (AIA) of tissue culture rinderpest vaccine	157
16	Estimation of kidney function tests in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV	162

List of Figures

Figure	Title	Page
1	Estimation of rectal temperature of sheep before and after inoculated with TCRPV (field and 100 field dose)	91
2	Rinderpest neutralizing antibody titres (\log_{10}) in sheep vaccinated with TCRPV (TCRPV) (field and 100 field dose)	94
3.a.	Estimation of haemoglobin content (g/dl) in sheep before and after inoculation with TCRPV (field dose)	97
3.b.	Estimation of RBCs count (million/ mm^3) in sheep before and after inoculation with TCRPV (field dose)	98
3.c.	Estimation of packed cell volume (volume %) in sheep before and after inoculation with TCRPV (field dose)	99
3.d.	Estimation of erythrocyte sedimentation rate (mm/hour) in sheep before and after inoculation with TCRPV (field dose)	100
4.a.	Estimation of total leucocytic count (thousands/ mm^3) in sheep before and after inoculation with TCRPV (field dose)	104
4.b.	Estimation of lymphocyte percent in sheep before and after inoculation with TCRPV (field dose)	105
4.c.	Estimation of neutrophil percent in sheep before and after inoculation with TCRPV (field dose)	106

Figure	Title	Page
4.d.	Estimation of monocyte percent in sheep before and after inoculation with TCRPV (field dose)	107
4.e.	Estimation of eosinophil percent in sheep before and after inoculation with TCRPV (field dose)	108
5.a.	Estimation of total protein (gm %) in sheep before and after inoculation with TCRPV (field dose)	112
5.b.	Estimation of albumin (gm %) in sheep before and after inoculation with TCRPV (field dose)	113
5.c.	Estimation of globulin (gm %) in sheep before and after inoculation with TCRPV (field dose)	114
6.a.	Estimation of ALT (u%) in sheep before and after inoculation with TCRPV (field dose)	117
6.b.	Estimation of AST (u%) in sheep before and after inoculation with TCRPV (field dose)	118
6.c.	Estimation of Alp (u%) in sheep before and after inoculation with TCRPV (field dose)	119
7.a.	Estimation of urea-nitrogen (mg%) in sheep before and after inoculation with TCRPV (field dose)	122
7.b.	Estimation of creatinine (mg%) in sheep before and after inoculation with TCRPV (field dose)	123
8.a.	Estimation of Alp (u/mm ³) in the leucocytic extract of sheep before and after inoculation with TCRPV (field dose)	126

Figure	Title	Page
8.b.	Estimation of LDH (u/mm^3) in the leucocytic extract of sheep before and after inoculation with TCRPV (field dose)	128
10	Estimation of rectal temperature ($^{\circ}\text{C}$) in sheep after inoculation with anti-idiotypic (AIA) of rinderpest virus	133
11	Estimation of the anti-idiotypic antibody titres (\log_{10}) in sheep after inoculation with the anti-idiotypic of rinderpest virus (AIA)	136
12.a.	Estimation of haemoglobin content (gm/dl) in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV.	139
12.b.	Estimation of red cell counts ($\text{million}/\text{mm}^3$) in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV.	140
12.c.	Estimation of packed cell volume (volume %) in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV.	141
12.d.	Estimation of erythrocyte sedimentation rate (mm/hour) in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV.	142
13.a.	Estimation of total leucocytic count ($\text{thousands}/\text{mm}^3$) and differential leucocytic count (%) in sheep before and after inoculation with the anti-idiotypic (AIA) of TCRPV	145
