GENERAL VERSUS REGIONAL ANESTHESIA IN AMBULATORY SURGERY

*Thesis Submitted for the Partial Fulfillment of the
M.D. Degree in Anesthesiology*

By

Ehab Hamed Abdel Salam

*M.B.B.Ch., M.Sc., Anesthesiology
Faculty of Medicine, Ain Shams University*

Supervised By

Prof. Dr. Abdel Aziz Mohammad Yousef
*Professor of Anesthesiology and Intensive Care
Faculty of Medicine, Ain Shams University*

Prof. Dr. Abdel Salam Mourad Kasem
*Professor of Anesthesiology and Intensive Care
Faculty of Medicine, Ain Shams University*

Prof. Dr. Raafat Abdel Azeem Hammad
*Professor of Anesthesiology and Intensive Care
Faculty of Medicine, Ain Shams University*

Prof. Dr. Elham Abdel Latif Siam
*Professor of Anesthesiology and Intensive Care
Faculty of Medicine, Ain Shams University*

Acknowledgment

Thanks to Allah Almighty and most merciful who helped and allowed me to accomplish this work.

I would like to express my sincere appreciation and deep gratitude to Prof. Dr. Abdel Aziz Yousef, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his continuous encouragement, and moral support during the accomplishment of this work. It is a great honor to work under his supervision.

I would also like to express my special thanks and true appreciation to Prof. Dr. Abdel Salam Mourad Kasem, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his helpful supervision and valuable instructions during the accomplishment of this work.

My deepest thanks and sincere appreciation are due to Prof. Dr. Raafat Abdel Azeem, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his valuable advice, great effort and kind cooperation throughout this work.

It gives me a great pleasure to express my true appreciation and deep gratitude to Prof. Dr. Elham Abdel Latif Siam, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for her helpful comments and valuable instructions throughout the completion this work.

List of Contents

	Page
<i>Introduction</i>	1
<i>Aim of the work</i>	3
<i>Review of literature</i>	
Outpatient anesthesia	4 - 19
Anesthetic techniques	20 - 58
Recovery and discharge criteria	59 - 65
<i>Patients and methods</i>	66 - 72
<i>Results</i>	73 - 102
<i>Discussion</i>	103-111
<i>Conclusion</i>	112
<i>Summary</i>	113-116
<i>References</i>	117-132
<i>Arabic summary</i>	1-3

List of Tables

<i>No.</i>	<i>Table</i>	<i>Page</i>
<i>Table 1</i>	Operative procedures suitable for ambulatory surgery	<i>6</i>
<i>Table 2</i>	Elements of the preoperative visit	<i>8</i>
<i>Table 3</i>	Laboratory test recommendations for asymptomatic healthy patients scheduled to undergo non-blood loss peripheral procedures under general anesthesia	<i>9</i>
<i>Table 4</i>	Use of Anxiolytic-Sedative Drugs as Premedication of Adult Outpatients.	<i>13</i>
<i>Table 5</i>	Risk factors for postoperative nausea and vomiting	<i>15</i>
<i>Table 6</i>	Prophylactic regimens used to decrease gastric volume and to increase pH in outpatients	<i>18</i>
<i>Table 7</i>	Comparison of currently available intravenous anesthetics for use during ambulatory anesthesia	<i>23</i>
<i>Table 8</i>	Comparison of currently available inhaled anesthetics for use during ambulatory anesthesia	<i>30</i>
<i>Table 9</i>	Recovery times after discontinuation of isoflurane or desflurane	<i>33</i>
<i>Table 10</i>	Rapid tracheal intubation with succinylcholine or Nondepolarizing Relaxant	<i>39</i>
<i>Table 11</i>	Relation of anesthetic technique to the incidence of postoperative complications after outpatient surgery	<i>57</i>
<i>Table 12</i>	Postanesthetic recovery score.	<i>60</i>

<i>Table 13</i>	Psychomotor tests used to assess cognitive recovery from anaesthetic and analgesia drugs	<i>61</i>
<i>Table 14</i>	Modified Postanesthesia Discharge Scoring System	<i>62</i>
<i>Table 15</i>	Proposed Fast-Track criteria for PACU bypass	<i>64</i>
<i>Table 16</i>	Sedation score	<i>67</i>
<i>Table 17</i>	Age, weight of patients, duration of surgery and their statistical analysis among the three groups	<i>74</i>
<i>Table 18</i>	Sex of patients and its statistical analysis in the three groups	<i>74</i>
<i>Table 19</i>	Systolic blood pressure changes (mmHg) and their statistical analysis in the three groups	<i>77</i>
<i>Table 20</i>	Diastolic blood pressure changes (mmHg) and their statistical analysis in the three groups	<i>78</i>
<i>Table 21</i>	Systolic blood pressure changes (mmHg) within each group at different times and its statistical analysis	<i>79</i>
<i>Table 22</i>	Diastolic blood pressure (mmHg) within each group at different times and its statistical analysis	<i>79</i>
<i>Table 23</i>	Heart rate changes and their statistical analysis in the three groups at different times	<i>82</i>
<i>Table 24</i>	Heart rate changes within each group at different times	<i>83</i>
<i>Table 25</i>	Oxygen saturation (%) changes and their statistical analysis in the three groups	<i>86</i>
<i>Table 26</i>	Aldrete's recovery score and its statistical comparison in the 3groups	<i>85</i>
<i>Table 27</i>	PADSS and the statistical comparison in the 3groups	<i>90</i>

<i>Table 28</i>	Other discharge criteria and their statistical comparison in the 3 groups	91
<i>Table 29</i>	Postoperative pain assessment and its statistical analysis in the three groups	94
<i>Table 30</i>	Assessment of the need for analgesia and its statistical analysis in the three groups	95
<i>Table 31</i>	Incidence of nausea, vomiting and antiemetic drug consumption and their statistical analysis in the three groups.	97
<i>Table 32</i>	Assessment of patient satisfaction and its statistical analysis among the 3 groups	99
<i>Table 33</i>	Cost of drugs and PACU and their statistical analysis in the 3 groups.	101
