ACKNOWLEDGEMENT

First of all thanks to God

I wish to express my deepest gratitude and thanks to Prof. Dr. Nagwa Youssef, Professor of Dermatology and Venereology, Ain Shams University, for giving me the privilege of being under her supervision in this thesis. Her constant encouragement and constructive guidance were of paramount importance for the invitation and progress of this work.

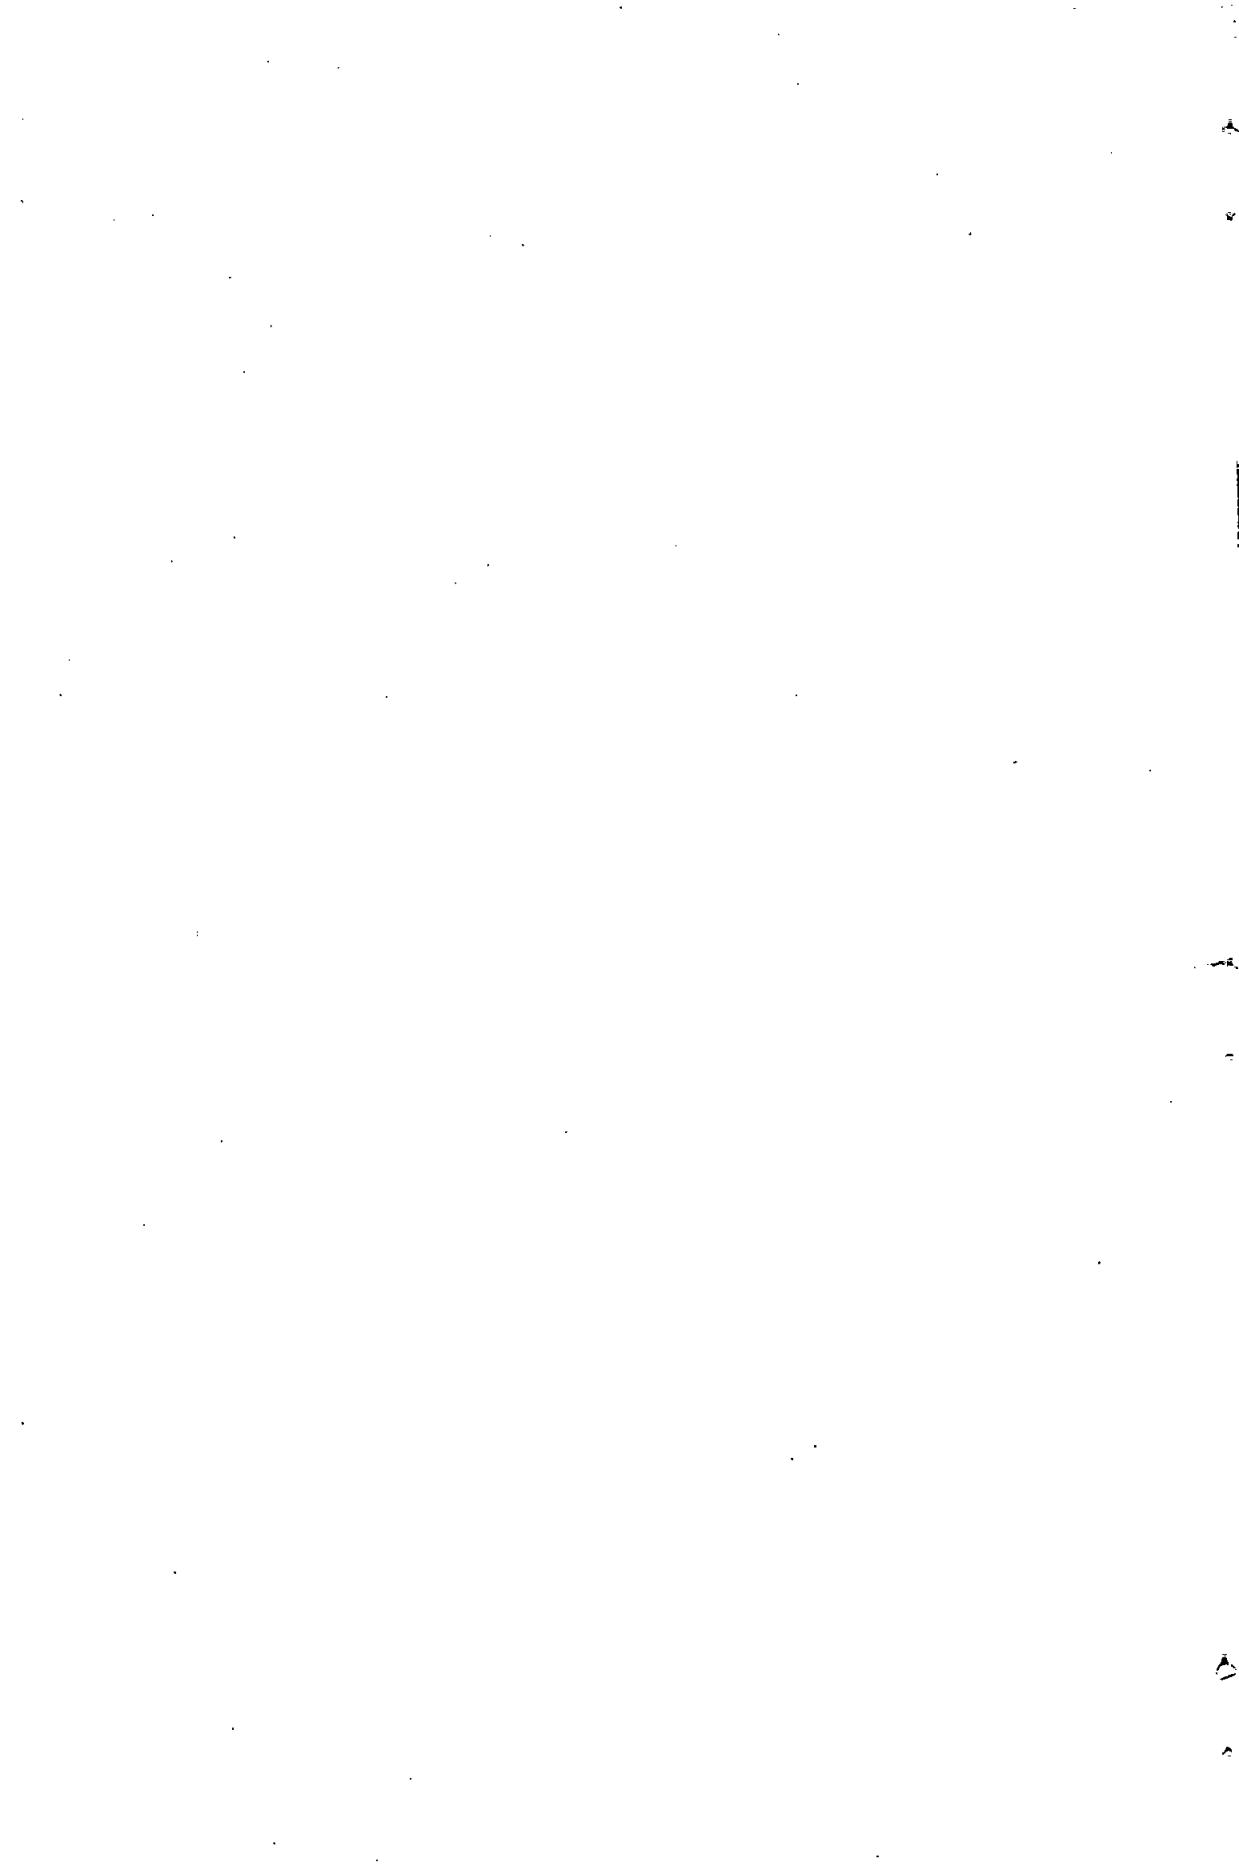

I would like to express my sincere thanks to Prof. Dr. Nader Fouad Ragab, Professor of Dermatology and Venereology, Ain Shams University, for his remarkable effort, considerable help, and continuous supervision and guidance which were the major factors behind the completion of this thesis.

I am deeply indebted to Prof. Dr. Mohamed El-Sawy, Professor of Pediatrics, Ain Shams University, for the great help and facilities he offered me which were the cornerstone for this work and also for his continuous cooperation and supervision all to the end of this thesis.

I would like to extend my sincere gratitude to Prof. Dr. Mohamed Salama, Professor of Genetic Engineering, Ain Shams University, for the continued support and assistance he provided me with during the production of the thesis.

Also, I wish to thanks all my professors and colleagues for their continuous help all through.

Al-Hassan M. El-Hefnawy

I N D E X

Introduction and Aim of Work. p. 1

Review of Literature.

Chapter (I)

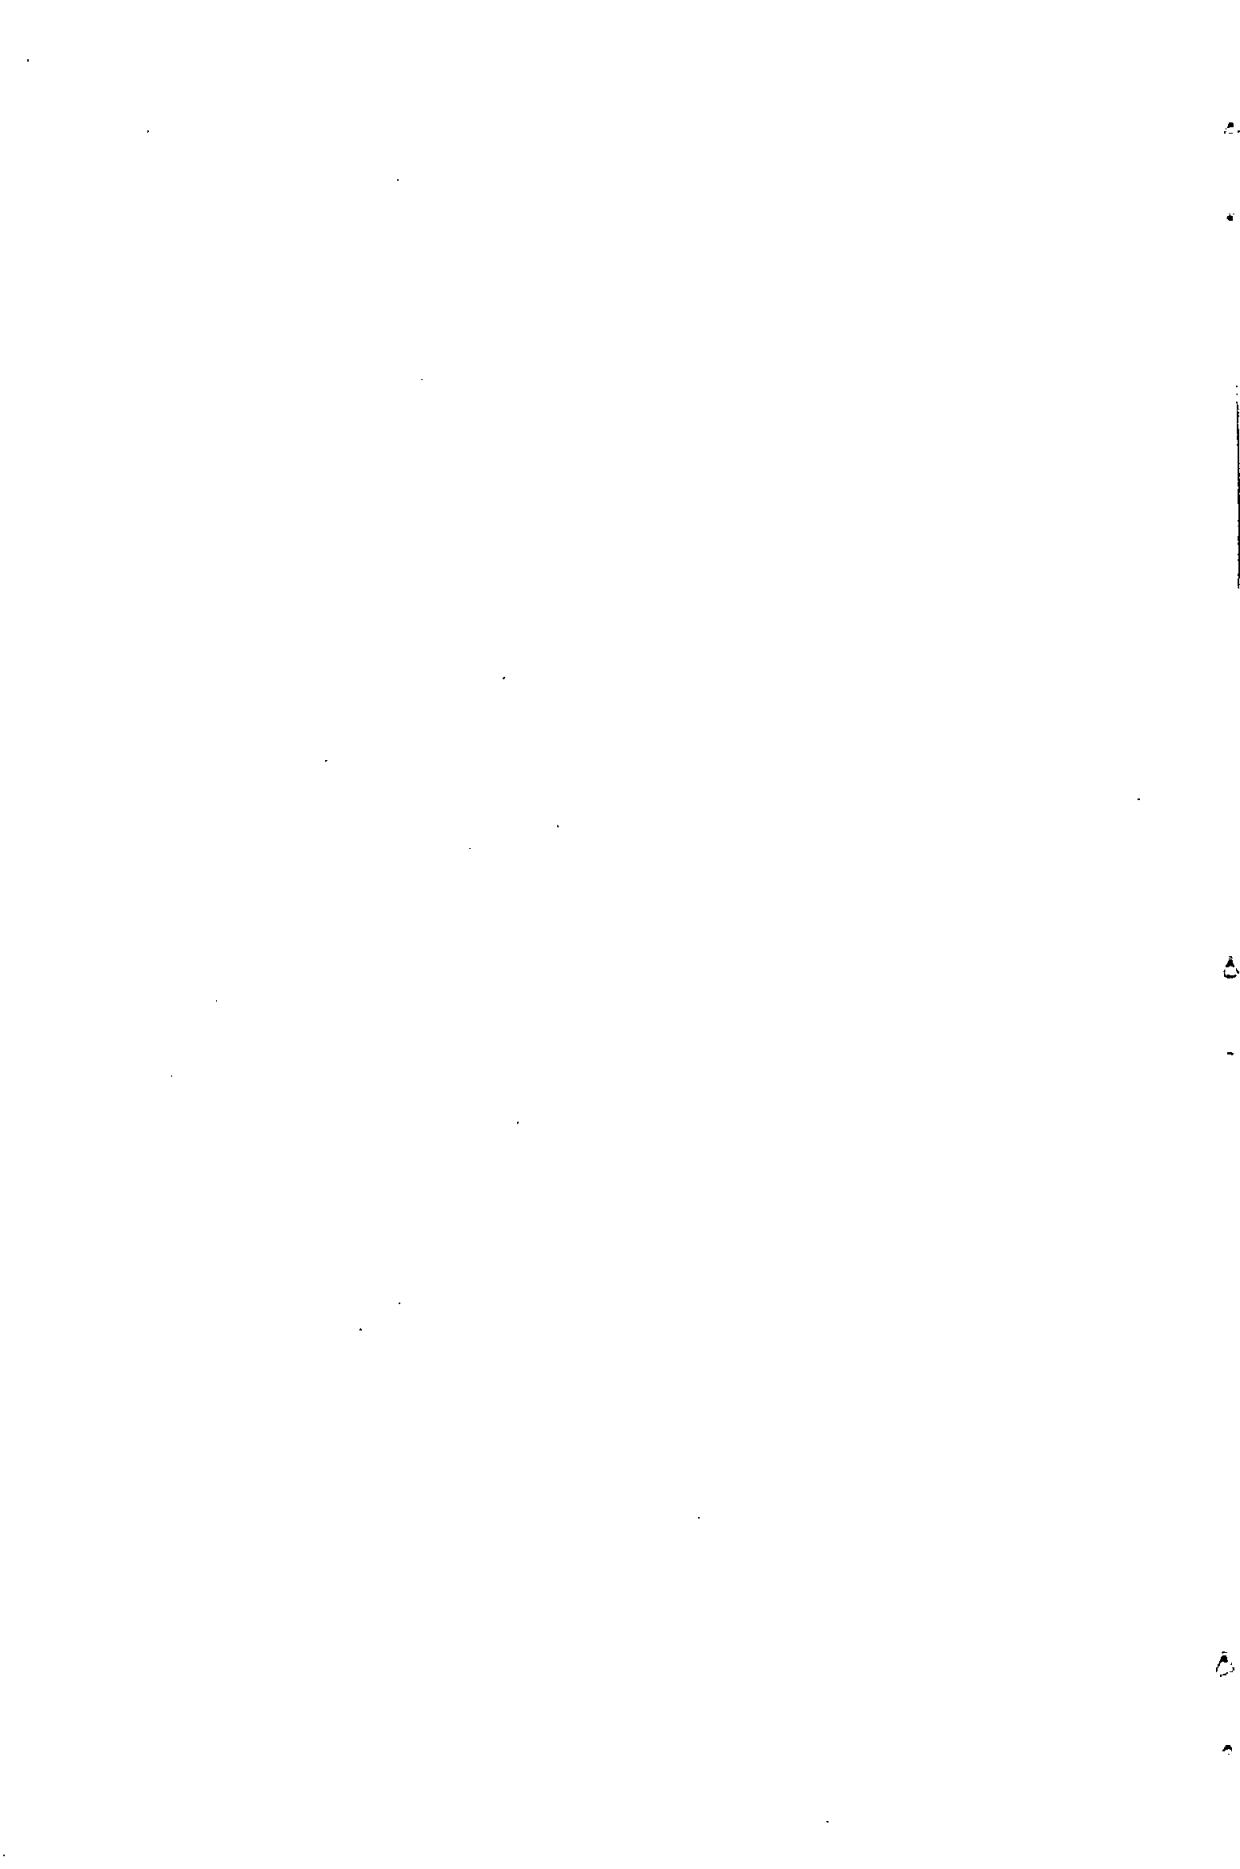

DNA BASIC STRUCTURE AND FUNCTION

- | | |
|------------------------------|-------|
| (A) DNA Structure. | p. 3 |
| (B) DNA Organization. | p. 8 |
| (C) DNA Replication. | p. 12 |

Chapter (II)

DNA MUTATIONS

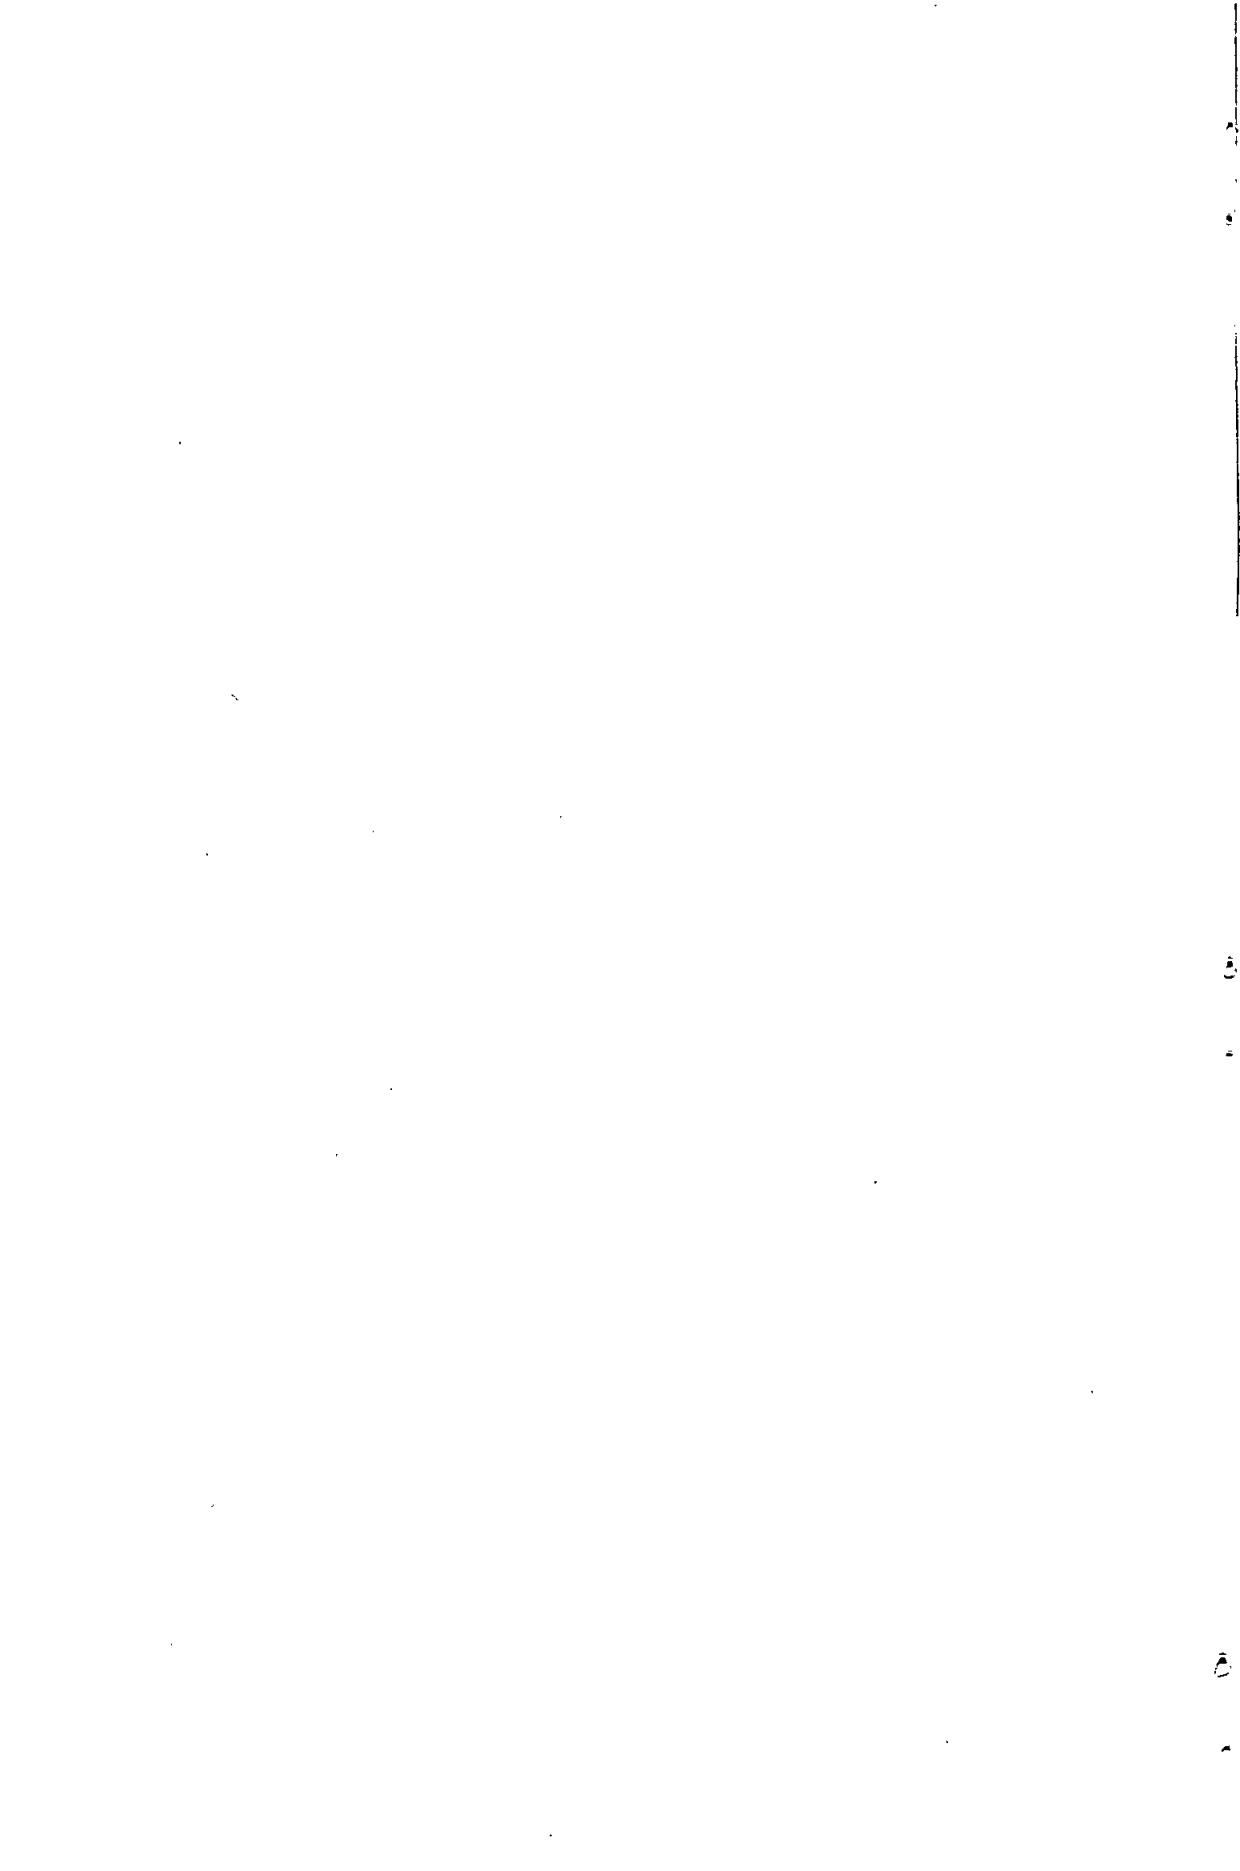

- | | |
|---|-------|
| (A) Types of Mutations. | p. 17 |
| (B) Structural effects of mutations on the protein | p. 21 |
| (C) Mutation in non-coding DNA. | p. 23 |
| (D) Functional effects of mutations. | p. 24 |

Chapter (III)

P 53 GENE AND PROTEIN

- | | |
|--|--------------|
| (A) P 53 Gene. | p. 27 |
| (B) Structure of P 53 Protein. | p. 31 |
| (C) Properties of Normal P 53. | p. 32 |
| (D) Properties of Mutant P 53. | p. 40 |
| (E) Interaction of P53 withh viral & cellular pr. | p. 41 |
| (F) Role of P 53 in control of cellular prolif. | p. 41 |
| (G) P 53 and Carcinogenesis. | p. 46 |
| (H) Role of P 53 in apoptosis. | p. 54 |
| (I) Detection of P 53. | p. 63 |
| (J) Therapeutic Implications of P 53. | p. 67 |

Chapter (IV)

DNA INSTABILITY SYNDROMES AND CARCINOGENESIS

- (A) Cancer genetics: p. 70
1. *Causes of cancer.*
2. *Cancer genes .*
- (B) Molecular basis of cancer. p. 89
- (C) Cell cycle. p. 92
- (D) Role of P53 in DNA repair p. 95
- (E) Mutagenesis xeroderma pigmentosum. p. 98

Chapter (V)

XERODERMA PIGMENTOSUM (XP)

- (A) Aetiology. p. 100
- (B) Specificity of repair defects in XP. p. 105
- (C) Complement group analysis in XP. p. 106
- (D) Variant complementation groups of XP. p. 109
- (E) Other defects in XP p. 113

(F) Clinical features.	p. 114
(G) specific complementation groups of XP	P. 121
(H) Diagnosis of XP.	p. 126
(I) Prenatal Diagnosis	p. 128
(J) Treatment of XP.	p. 133
(K) Gene therapy.	p. 135

Material and Methods:

(A) Patients selection	p. 146
(B) Detection of P 53 Mutations by	
PCR-SSCP Technique.	p. 147
1. DNA extraction from peripheral	
blood and tissue.	p. 147
2. Determination of purity and concent	
of the isolated DNA.	p. 151
3. B-PCR-SSCP analysis.	p. 152
