STUDIES ON SOME BIOLOGICAL RESPONSES
OF MALE AND FEMALE LOCAL CHICKS TO
THE ANTIÖSTROGENIC DRUG TAMOXIFEN

By

MAYSA MOUSTAFA HANAFY

B.SC. Agric. (Poultry Production) Alexandria Univ. 1992
M.SC. Agric. (Poultry Production) Alexandria Univ. 1995

Thesis

Submitted in Partial fulfillment of the
Requirements for the Degree

OF

DOCTOR OF PHILOSOPHY

IN

AGRICULTURAL SCIENCES
(Poultry Production)

Department of Poultry Production
Kafr El-Sheikh, Faculty of Agriculture
Tanta University
2001

B E L Y A
APPROVAL SHEET

TITLE OF THESIS: STUDIES ON SOME BIOLOGICAL RESPONSES OF MALE AND FEMALE LOCAL CHICKS TO THE ANTIÖSTROGENIC DRUG TAMOXIFEN

NAME OF CANDIDATE: MAYSA MOUSTAFA HANAFY

DEGREE: Ph.D. in Agric. Sci. (Poultry Production)

Thesis Approved By:

Prof. Dr. A.A. Darwish
Professor of Poultry Physiology, Department of Poultry Production, Fayoum, Faculty Of Agriculture, Cairo University

Prof. Dr. K.M. Saleh
Professor of Poultry Breeding, Department of Poultry Production, Kafr El-Sheikh, Faculty Of Agriculture, Tanta University

Prof. Dr. M.M. El-Habbak
Professor of Poultry Physiology and Head of Department of Poultry Production, Kafr El-Sheikh, Faculty Of Agriculture, Tanta University

Prof. Dr. Neamat A. Badawy
Professor of Poultry Nutrition, Department of Poultry Production, Kafr El-Sheikh, Faculty Of Agriculture, Tanta University
SUPERVISION COMMITTEE

Prof. Dr. Mohamed M. El-Habbak
Professor of Poultry Physiology,
Kafr El-Sheikh, Faculty of Agriculture,
Tanta University

Prof. Dr. Neamat A. Badawy
Professor of Poultry Nutrition,
Kafr El-Sheikh, Faculty of Agriculture,
Tanta University

Prof. Dr. Hanna M. Khalil
Professor of Poultry Physiology,
Animal Production Research Institute,
Agriculture Research Center,
Ministry of Agriculture
Acknowledgement

First of all prayerful thanks to our merciful god who give me every thing I have.

My sincere gratitude and deep appreciation to Prof. Dr. M.M. El-Habbak, Head of Poultry Production Department and Professor of Poultry Physiology, Kafr El-Sheikh, Faculty of Agriculture, Tanta University, for his direct supervision, suggesting the subject, continuous help and his advice during the work, preparation of manuscript and completion of this thesis.

Many thanks to Prof. Dr. Neamat A. Badawy, Professor of Poultry Nutrition, Kafr El-Sheikh, Faculty of Agriculture, Tanta University, for her kind
supervision of this study and continual helps throughout the work of the thesis.

Many deeply grateful acknowledgement are extended to Prof. Dr. Hanna M. Khalil, Professor of Poultry Physiology, Animal Production Research Institute, Agri. Res. Center, Ministry of Agriculture, for her kind supervision, advice for helping me in chemical analysis of this investigation and her valuable guidance.

Many thanks to Prof. Dr. A.I. ABD El-Ghani, Professor of Poultry Production, Animal Production Research Institute, Agri. Res. Center, Ministry of Agriculture, for providing facilities for this work.

Finally cardinal thanks are due to my family for their continuous encouragement and kind support.
## Contents

- Acknowledgement
- List of tables

### 1. INTRODUCTION

### 2. REVIEW OF LITERATURE

- 2.1. The antioestrogenic drug tamoxifen and its mode of action:
  - 2.1.1. Chemistry
  - 2.1.2. Biochemistry
  - 2.1.3. Toxicology
- 2.2. Factors determining the response of animals to tamoxifen treatment:
  - 2.2.1. Species of treated animal.
    - Rats
    - Mice
    - Hamsters
    - Rabbits
    - Guinea Pigs
    - Poultry
  - 2.2.2. Age of treated animal
  - 2.2.3. Doses of drug applied
  - 2.2.4. Route of administration
- 2.3. Response of birds to tamoxifen
