# *Acknowledgement*

*First and before all, I feel always indebted to God for giving me the life chance to continue my first scientific effort.*

*I would like to express my deep appreciation and gratitude to Prof. Dr. Omar Fathi Osman Prof. of internal medicine and clinical hematology Ain – Shams University , for his kind guidance and, supervision and encouragement, his comments and advice that made the work organized and meaningful.*

*I am also indebted to Prof. Dr. Hala Ahmed Talkan Prof. Of clinical pathology Ain- Shams University for her great effort and her precious advice.*

*I would also like to express my deep appreciation and gratitude for Dr. Maha El Zimmaty Lecturer of internal medicine Ain-Shams*

*University whose support and sincere guidance go beyond every evaluation.*

*I would also like to express my gratitude to Dr. Hanan Hamed Lecturer of internal medicine Ain- Shams University for her great efforts and advices.*

*Last but not least, I am greatly appreciating the moral help of my father, my husband and my little Mohammed, all were always supplying me with the feeling of hope, love and encouragement.*

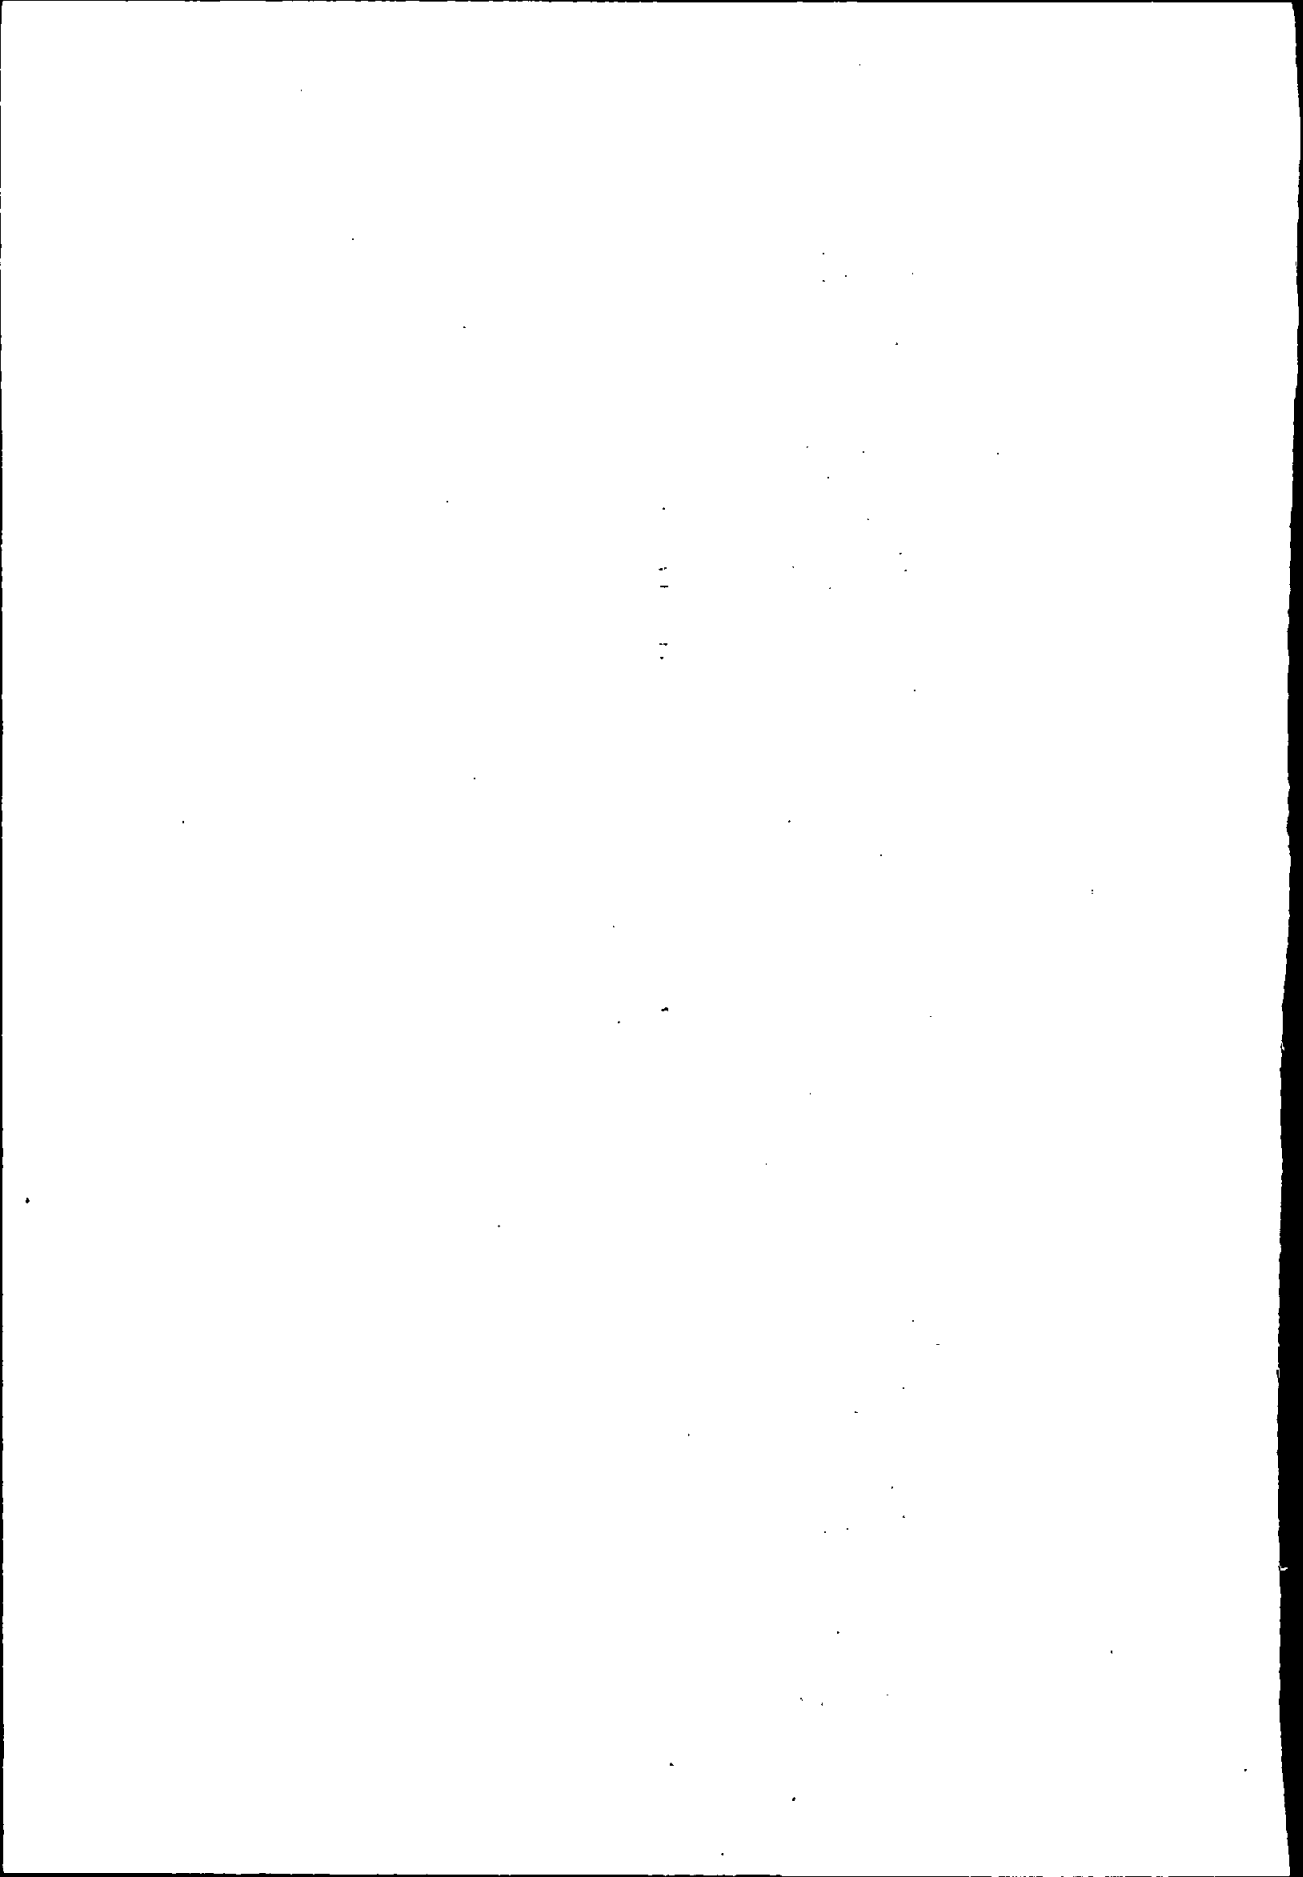

# Contents

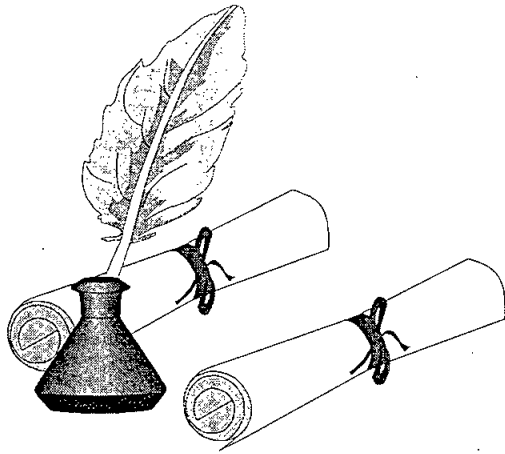

Introduction and Aim of work	1
Review of Literature	
I- Oncogenes and Tumor suppressor genes	2
Classification and Characterization of oncogenes and their proteins	
• Role of oncogenes and tumor suppressor genes.	
• Genetic alterations involving oncogenes and tumor suppressor genes.	
II- P53 tumor suppressor gene	14
• Structure of p53 gene and gene product.	
• Structure function relationship of p53.	
• P53 the guardian of the genome	
• P53 and Apoptosis	
• P53 genetic abnormalities.	
• Evidence of p53 involvement in tumourigenesis	
• P53 associated tumourigenesis	
III- Methods of analysis of p53 abnormalities and its clinical significance.	39
• Value of serological analysis of p53 antibodies	
• Clinical implications of detecting p53 alterations	

IV- P53 in relation to specific types of leukemia	45
Patients and Methods.	51
Results	59
Discussion	77
Conclusion	87
Summary	89
References.	92
Arabic summary.	

## *List of Abbreviations*

<i>BCR:</i>	Breakpoint cluster region
<i>DNA:</i>	Deoxyribonucleic acid
	Enzyme Linked immuno-sorbent assay
<i>KB:</i>	Kilo base
<i>KD:</i>	Kilo Dalton
<i>MDM2:</i>	Murine double minute
<i>PBS:</i>	Phosphate buffer saline
<i>RB:</i>	Retionblastoma
<i>HPVE6:</i>	Human papilloma virus
<i>UV:</i>	Ultraviolet
<i>APC:</i>	Adenomatus polypisis Coli
<i>NF1:</i>	Neurofibromatosis Type 1
<i>WT-1:</i>	Wilm's tumour type 1
<i>DCC:</i>	Deleted colorectal carcinoma.
