## **ACKNOWLEDGMENT**

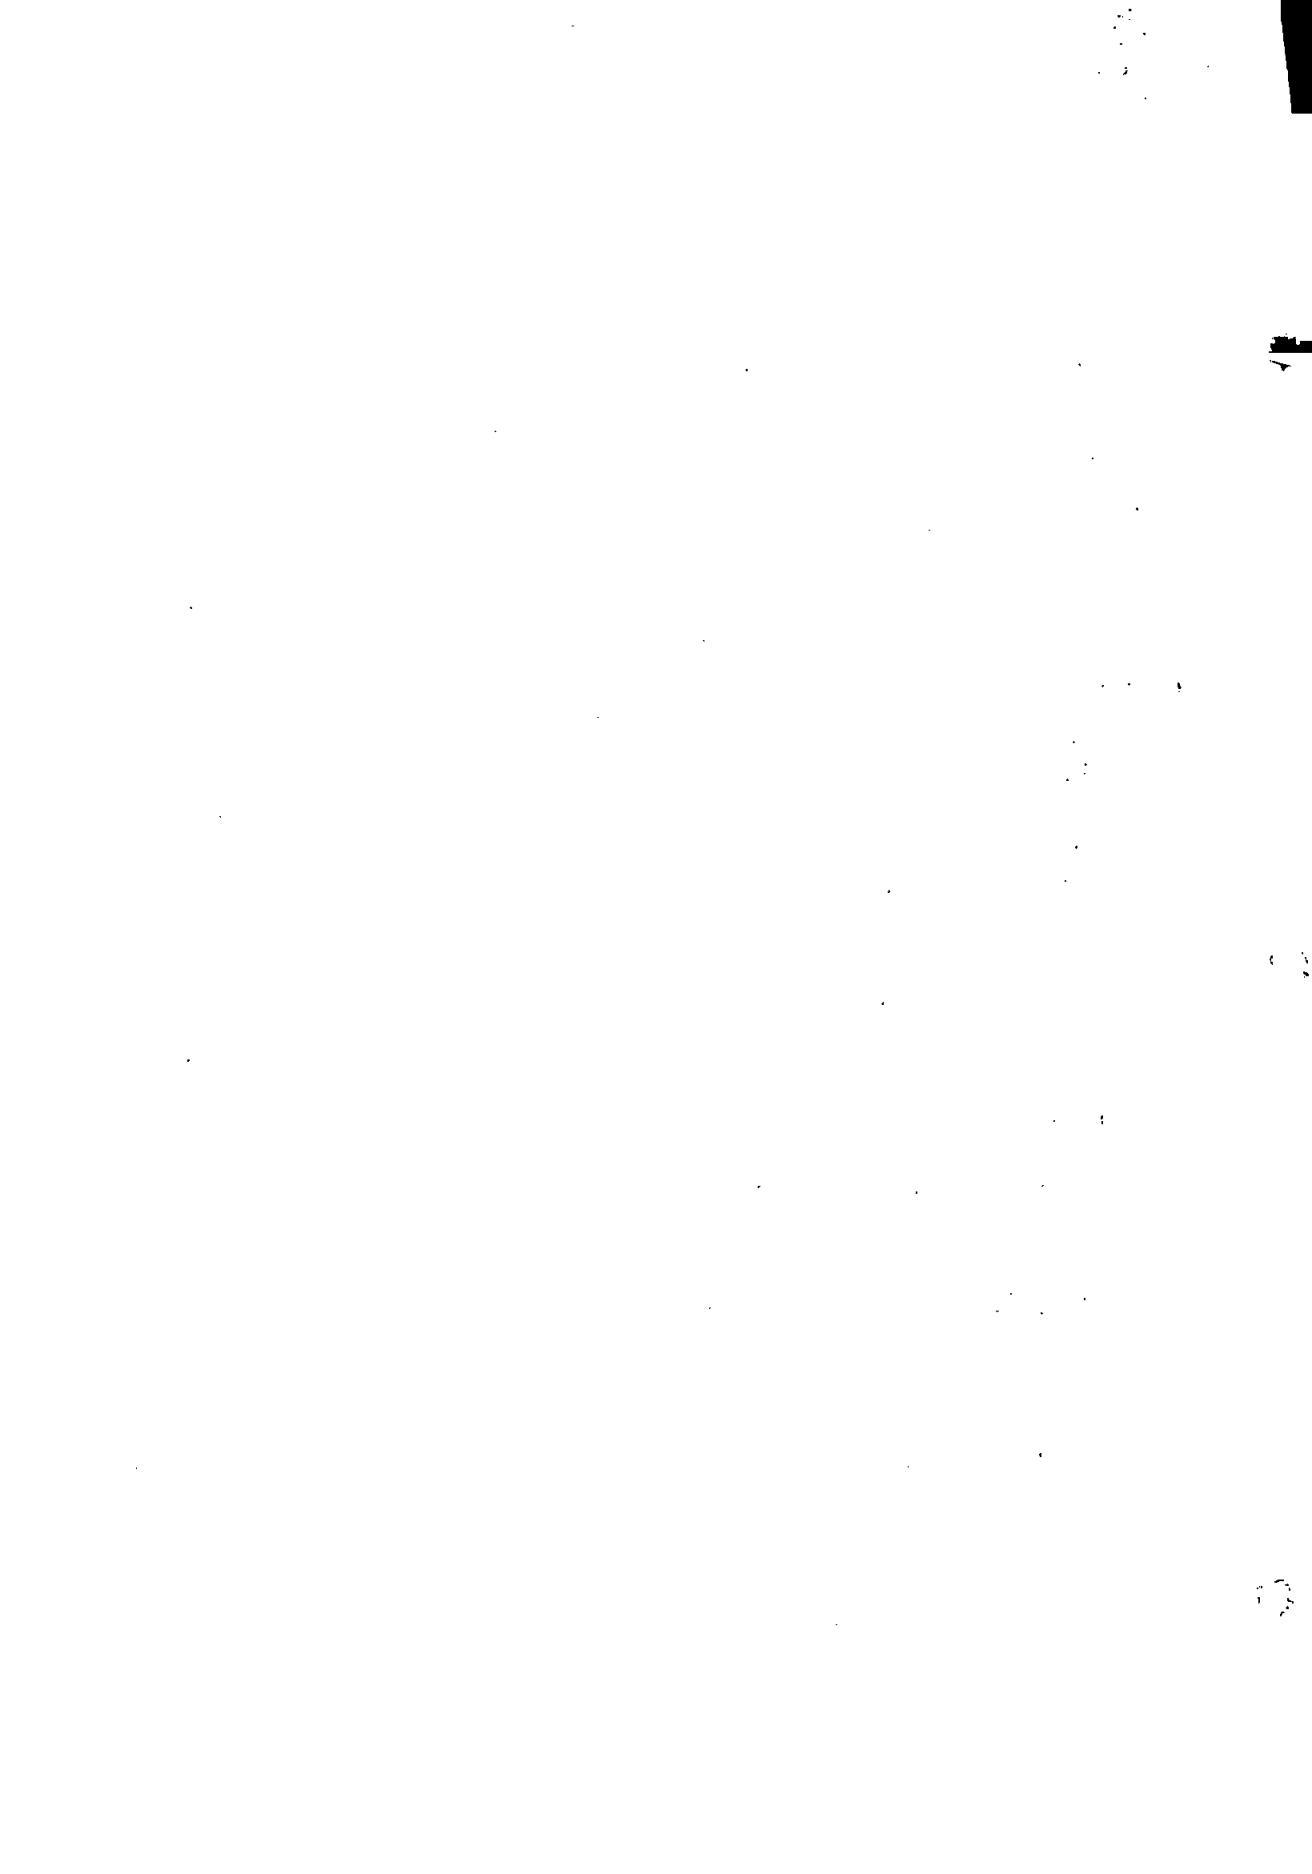

The author is deeply grateful to *Prof. Dr. A.H. Hanafy Ahmed*, Professor of Plant Physiology at the Faculty of Agriculture, Cairo University for his ideal supervision, willing advise, continuous encouragement, suggesting the problems and valuable help during the course of this investigation.

My thanks are directed to *Prof. Dr. M.K. Khalil*, Professor of Plant Physiology in the same Faculty for his keen supervision, fatherly attitude and valuable help during the course of this investigation.

My deepest appreciation and gratitude are offered to *Prof. Dr. A.S. Hamza*, Professor of Food Science, Central Laboratory for Food and Feed, Agric. Res. Centre for supervision, sincere guidance and continuous help during this investigation.

I am also offering my thanks to all members and friends of Central Laboratory for Food and Feed, Agric. Res. Center and of Bioteknologisk Institut in Kolding, Denmark for their interest and kind help.

Special thanks are also extended to my husband, father, mother, sisters and my sons for continuous encouragement.
