**Effect of Medication Safety Guidelines
on Prevention of Medication Errors
among Nurses in the Intensive
Care Unit**

Thesis

*Submitted in Partial Fulfillment of Doctorate Degree
In Medical Surgical Nursing (Critical Care Nursing)*

By

Shimaa Ibrahim Abd Elgwad

(B. Sc. N., 2005- M. Sc. N., 2015)

Assistant lecturer- Faculty of Nursing – Kafr elsheikh University

**Faculty of Nursing
Ain Shams University
2021**

**Effect of Medication Safety Guidelines
on Prevention of Medication Errors
among Nurses in the Intensive
Care Unit**

Thesis

*Submitted in Partial Fulfillment of Doctorate Degree
In Medical Surgical Nursing (Critical Care Nursing)*

Supervised by

Dr/ Kamelia Fouad Abdallah

*Professor of Medical Surgical Nursing
Faculty of Nursing – Ain Shams University*

Dr/ Mahasen Abd Elsattar

*Assistant Professor of Medical Surgical Nursing
Faculty of Nursing –Ain Shams University*

Dr/ Basma Khalil

*Assistant Professor of Medical Surgical Nursing
Faculty of Nursing –Ain Shams University*

**Faculty of Nursing
Ain Shams University**

2021

Acknowledgement

First, and foremost, deepest gratitude and thanks offered to **"ALLAH"**, the most merciful, for giving us the strength.

I would like to express my sincere gratitude to **Prof. Dr. Kamelia Fouad Abdallah** Professor of Medical Surgical Nursing, Ain Shams University, for her continuous support and guidance for me to present this work. I'm really honored to work under her generous supervision.

I acknowledge with much gratitude to **Assist. Prof. Dr. Basma Khalil** Assistant Professor of Medical Surgical Nursing– Ain Shams University, for her great supervision and unlimited help to accomplish this work.

I also ask God to bless **Professor Mahasen Abd Elsattar** and to give her best place in Heaven.

My sincere tributes and gratitude to my **Parents** who paved my way through their support, tolerance & devotion, also to my **Friends** for their help and support.

Also, I would like to thank all **Nurses** who participated in this work

. ✍ **Shimaa Ibrahim**

List of Tables

Table No.	Title	Page No
Table (1)	Frequency and percentage distribution of the studied nurses according to their demographic characteristics (n=59).	82
Table (2)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety overview, pre and post medication safety guidelines' application (n=59).	84
Table (3)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (drug labeling, packaging and nomenclature), pre and post application (n=59).	85
Table (4)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (drug storage, stock and standardization), pre and post application (n=59).	87

Table No.	Title	Page No
Table (5)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (environmental factors), pre and post application(n=59).	89
Table (6)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (Patients information), pre and post application(n=59).	91
Table (7)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (drug information),pre and post application (n=59).	93
Table (8)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (communication of drug information), pre and post application(n=59).	95
Table (9)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (staff competency and education), pre and post application(n=59).	97

Table No.	Title	Page No
Table (10)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (Patients education), pre and post application(n=59).	99
Table (11)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (quality process and risk management), pre and post application (n=59).	101
Table (12)	Frequency and percentage distribution of the studied nurses' knowledge regarding medication safety guidelines' components (drug device acquisition, usage and monitoring), pre and post application (n=59).	103
Table (13)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (drug labeling, packaging and nomenclature) pre and post application (n=47).	106

Table No.	Title	Page No
Table (14)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (drug storage, stock and standardization) pre and post application (n=47).	108
Table (15)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (environmental factors) pre and post application(n=47).	110
Table (16)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (patient information) pre and post application (n=47).	112
Table (17)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (drug information) pre and post application (n=47).	114

Table No.	Title	Page No
Table (18)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (communication of drug information) pre and post application (n=47).	116
Table (19)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (staff competency and education) pre and post application (n=47).	118
Table (19) Cont.	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (staff competency and education) pre and post application (n=47).	119
Table (20)	Frequency and percentage distribution of the studied staff nurses' practice concerning medication safety guidelines' components (Patients education) pre and post application (n=47).	121
Table (21)	Frequency and percentage distribution of the studied staff nurses' practice concerning (Drug device acquisition, usage and monitoring) pre and post application (n=47).	123

Table No.	Title	Page No
Table (22)	Frequency and percentage distribution of the studied head nurses' practice concerning medication safety guidelines' components (quality process and risk management) pre and post application (n=12).	125
Table (23)	Frequency and percentage distribution of the studied head nurses' practice concerning medication safety guidelines' components (drug device acquisition, usage and monitoring) pre and post application (n=12).	127
Table (24)	Frequency and percentage distribution of the medication errors types frequency rate pre and post guidelines' components application (n=59)	128
Table (25)	Frequency and percentage distribution of the satisfactory level of the studied nurses' knowledge pre and post medication safety guidelines' components application (n=59)	129
Table (26)	Frequency and percentage distribution of the satisfactory level of the studied nurses' practice pre and post medication safety guidelines' components application (n=47)	131

Table No.	Title	Page No
Table (27)	Relations between total mean score of the studied nurses' knowledge pre and post medication safety guidelines' components application and their demographic characteristics (n=59)	132
Table (28)	Relations between total mean score of studied nurses' practice pre and post medication safety guidelines' components application and their demographic characteristics	133
Table (29)	Correlation between the studied nurses' total scores of knowledge and practice and total frequency rate of medication errors' pre medication safety guidelines' components application.	134
Table (30)	Correlation between the studied nurses' total scores of knowledge and practice and total frequency rate of medication errors' post the medication safety guidelines' components application.	135
