# Study on the Effect of Lead as an Environmental Pollutant on the Blood Components of Experimental Animals

Thesis presented by  
*Venees Farouk Yassa Salib*

(B.V.Sc. 1994 Cairo University)

For the degree of M.V.Sc  
(Clinical Pathology)

Under Supervision of

*Dr. Mohamed I. Dessouky*  
Prof. of Clinical Pathology  
Faculty of Veterinary Medicine  
Cairo University

*Dr. Alaa Raafat Ahmed*  
Assist. Prof. of Clinical Pathology  
Faculty of Veterinary Medicine  
Cairo University

*Dr. Youssef L. Awad*  
Chief of Research of Biochemistry  
Animal Health Res. Inst., Dokki-Giza

(2001)

Department Of Clinical Pathology

### *Approval Sheet*

This is to approve that the dissertation presented by *Venees Farouk Yassa* to Cairo University , for the degree of Master degree in Veterinary Science (Clinical Pathology ) has been approved by the examining committee :

1- *Professor Dr. Mohamed Osama Tawfic*

Professor of Clinical Pathology .  
Faculty of Veterinary Medicine  
Zagazig University

*M. O. T. B.*

2- *Professor Dr. Moustafa Mahmoud Bashandy*

Professor of Clinical Pathology .  
Faculty of Veterinary Medicine  
Cairo University

*Moustafa*

3- *Professor Dr. Mohamed Ibrahim Dessouky*

Professor of Clinical Pathology .  
Faculty of Veterinary Medicine  
Cairo University

*M. I. Dessouky*

# “CONTENTS”

	<u>Page</u>
I – INTRODUCTION	1
II – REVIEW OF LITERATURE	3
- Incidence of lead toxicity among animals	3
- Effect of lead on hematological parameters	5
- Effect of lead administration on serum biochemical parameters	11
- Effect of lead on some serum minerals	15
- Histopathological alterations in lead poisoning	18
- Lead residue in different tissues	22
III – MATERIAL and METHODS	25
- Plan of work	25
- Field study	25
- Samples and methods of examination	26
- Experimental work	32
- Methods of examination	34
- Statistical analysis	39
IV – RESULTS	40
- Results of the field study	40
- Results of experimental study	41
V – DISCUSSION	65
VI – SUMMARY and CONCLUSION	78
VII – REFERENCES	82

## LIST OF TABLES

	<b>Page</b>
Table (1): Chemical analysis of underground water used for drinking of rabbits.	45
Table (2): Chemical composition of commercial rabbit ration in the investigated farm.	45
Table (3): Daily intake of the investigated rabbits from minerals as compared with the ideal requirements.	46
Table (4): Hemogram of investigated rabbits as compared with reference values.	47
Table (5): Total and differential leukocytic counts of investigated rabbits as compared with reference values.	48
Table (6): Concentration of serum minerals of the investigated rabbits as compared with normal reference values.	49
Table (7): Amount of minerals and lead residue (mg / 100 g dry matter) in bone, liver and kidneys of investigated rabbits.	49
Table (8): Erythrogram of control and lead acetate treated rats at different time intervals.	50
Table (9): Leukogram of control and lead acetate treated rats at different time intervals.	51
Table (10): Serum biochemistry of control and lead acetate treated rats at different time intervals.	52
Table (11): Serum and tissue residues of lead in control and lead acetate treated rats.	53

## LIST OF FIGURES

	<b>Page</b>
Fig. (1): Lead residue in bone, liver and kidneys of investigated rabbits.	54
Fig. (2): Total erythrocyte count of the control and lead acetate treated rats.	55
Fig. (3): Hemoglobin concentration of the control and lead acetate treated rats.	55
Fig. (4): Packed Cell Volume (PCV %) of the control and lead acetate treated rats.	56
Fig. (5): Reticulocyte % of the control and lead acetate treated rats.	56
Fig. (6): Total leukocytic count of the control and lead acetate treated rats.	57
Fig. (7): Neutrophil count of the control and lead acetate treated rats.	57
Fig. (8): Lymphocyte count of the control and lead acetate treated rats.	58
Fig. (9): Serum ALT level of the control and lead acetate treated rats.	58
Fig. (10): Serum AST level of the control and lead acetate treated rats.	59
Fig. (11): Serum iron concentration of the control and lead acetate treated rats.	59
Fig. (12): Serum lead concentration of the control and lead acetate treated rats.	60
Fig. (13): Lead residue in tissues of the control and rats exposed to lead acetate for 10 weeks.	61
Fig. (14): Lead residue in tissues of the control and rats exposed to lead acetate for 20 weeks.	61

## LIST OF FIGURES (Cont.)

	<b>Page</b>
Fig. (15): Liver of rat administered lead acetate 100 mg / l drinking water for 20 weeks (H & E stain, X 400).	62
Fig. (16): Liver of rat administered lead acetate 200 mg / l drinking water for 20 weeks (H & E stain, X 400).	62
Fig. (17): Brain of rat administered lead acetate 100 mg / l drinking water for 20 weeks (H & E stain, X 400).	63
Fig. (18): Brain of rat administered lead acetate 200 mg / l drinking water for 20 weeks (H & E stain, X 400).	63
Fig. (19): Kidney of rat administered lead acetate 200 mg / l drinking water for 20 weeks (H & E stain, X 100).	64
Fig. (20): Blood film showing basophilic stippling of red blood cells of the rat groups administered lead acetate in drinking water (Wright's stain, X 1000).	64

---

## **“ACKNOWLEDGEMENT”**

Thanks are due first and above all to our almighty **“GOD”** who gave me the ability and patience to finish this work.

I would like to express my deepest gratitude and sincere thanks to **Prof. Dr. Mohamed Ibrahim Dessouky**, Professor of Clinical Pathology, Fac. Vet. Med., Cairo Univ., for his kindness, useful suggestions, continuous help and supervision throughout this work.

Sincere thanks and deep gratitude to **Prof. Dr. Youssef L. Awad**, Chief of Research of Biochemistry, Animal Health Res. Inst., Dokki-Giza, for his supervision, helpful comments and sincere advises.

Deep appreciation is expressed to **Dr. Alaa Raafat Ahmed**, Assistant Professor of Clinical Pathology, Fac. Vet. Med., Cairo Univ., for his supervision, encouragement and helpful comments.

I wish to record my cardinal thanks and gratitude to **Prof. Dr. Maher El-Deeb**, Chief of Research of Biochemistry, Animal Health Res. Inst., Dokki-Giza, for his continuous help.

Sincere thanks and deep gratitude to **Prof. Dr. Eva Roshdi**, Chief of Research of Biochemistry, Animal Health Res. Inst., Dokki-Giza, for her encouragement and offering facilities.

My cardinal thanks and deep gratitude to **Dr. Adel Nabih**, Researcher of Parasitology, Regional Animal Health. Res. Lab., Giza-Egypt, for his help in performing parasitological examination.

Sincere gratitude to **Dr. Eman Bakr**, Lecturer of Pathology, Fac. Vet Med., Cairo Univ., for her cooperation and help in performing histopathological examination.

Thanks are due to all staff members, technicians and workers of Clinical Pathology Department, Fac. Vet. Med., Cairo Univ., for their help and encouragement.

-----

# *Introduction*
