South Valley University
Faculty of Science

STUDIES ON THE ELECTROCHEMICAL BEHAVIOUR OF SOME METALLIC ALLOYS IN AQUEOUS SOLUTIONS

A Thesis
Submitted to
Faculty of science
South valley university
Qena, Egypt

To
Fulfill the requirements for
The Degree of Philosophy of
Doctor (Ph. D.)
(Physical chemistry)

By
Ayman Mohammed zaky
B. Sc. in Chemistry (1984)
M. Sc. in Chemistry (1994)

2000

ACKNOWLEDGEMENT

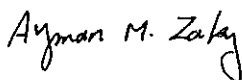

Acknowledgement

The author would like to express his deepest thanks to his advisors, Dr. Abd El Rehim and Dr. Assaf for their help during the work of this thesis. Greatest thanks are due to Dr. Howard W. Pickering, Distinguish Professor of Metallurgy for his kind help during the work in the two parts of the corrosion of electroplated Zn-Ni alloys for 26 months spent as a member of his research group in the Department and Material Science, College of Earth and Mineral Science, The Pennsylvania State university, USA. I would like to thank Dr. Konard G. Weil, visiting Professor in the Department of Material Science and Engineering for his help during the research work in USA.

Thanks are due to Dr. Hesham M. Rageh the Head of Chemistry Department and the Dean of the Faculty of Science at Qena.

I would like to thank all of the faculty and the stuff in the Chemistry Department, Faculty of Science, South Valley university. Thanks are due to all the staff of the Department of Material Science and Engineering and all the people working in the Material Characterization Laboratories, the Pensylvannia State University, USA.

CONTENTS

CONTENTS

Subject	Page
LIST OF TABLES	VII
LIST OF FIGURES	VIII
I. INTRODUCTION	1
I.1 Metallic Corrosion	1
I.2 The Corrosion Potential	3
I.3 Polarization	5
I.3.1 Concentration polarization, η_c	5
I.3.2 Anodic passivity or Resistance polarization (Ohmic polarization): η_R	7
I.3.3 Activation polarization, η_a	8
I.4 Passivity	10
I.5 Forms of corrosion	11
I.5.1 Uniform Corrosion	11
I.5.2 Galvanic Corrosion	12
I.5.3 Pitting corrosion	13
I.5.4 Crevice corrosion and deposit attack	14
I.5.5 Intergranular (or intercrystalline) corrosion	16
I.5.6 Stress corrosion cracking	17
I.5.7 Hydrogen induced cracking	18
I.5.8 Dealloying	19
I.5.8.1 Thermodynamic consideration	19
I.5.8.2 Phenomenological aspects	20
I.5.8.3 Theory of dealloying	22
I.5.8.3.1 Ionization - Redepositoin Mechanism	22
