STUDIES ON THE DISEASES RESULTING FROM ENCYSTED METACERCARIOSIS IN SOME FRESHWATER FISHES

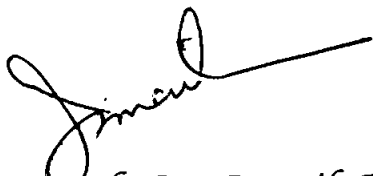

Thesis

Submitted for Partial Fulfillment for the Degree of M.V.Sc.

(Fish Diseases and Management)

By

Maather M. Monier Taha Elamie

Supervised by

Prof. Dr. Ismail A. M. Eissa Prof. Dr. Ahmed F. H. Badran

Prof. of Fish Diseases and Management

Prof. of Fish Diseases and

Head of Fish Diseases and Management

ACKNOWLEDGMENT

First and foremost thanks to God the most beneficent and merciful.

I am deeply indebted to my Prof. Dr. Ismail Abd-Elmonem M. Eissa Professor of Fish Diseases and Management and Head of Fish Diseases and Management Dept., Suez Canal University who suggested the idea of this work for his sincere indispensable help guidance, keen supervision and for his great support, useful suggestions and comments through out this work.

My deepest thanks and sincere gratitude to Prof. Dr. Ahmad Fekri H. Badran Professor of Fish Diseases and Management, Suez Canal University for his sincere help guidance, keen supervision and for his wise advice through out this work.

I would like to express my deep gratitude to Dr. Salafi Meselhy Afy Assistant Professor of Pathology, Suez Canal University, for his Valuable support in histopathological studies and Dr. Ahmad Anwar Assistant Professor of Parasitology, Suez Canal University for his sincere help in parasitological studies.

In the last, I would like to express my deepest thanks to my staff members for their valuable advices and help during the duration of this work.

LIST OF CONTENTS

INTRODUCTION.....	1
LITERATURE.....	3
MATERIAL AND METHODS.....	47
RESULTS.....	63
DISCUSSION.....	103
ENGLISH SUMMARY.....	115
REFERENCES.....	118
ARABIC SUMMARY.....	

LIST OF TABLES

Table no.		Page
1	: Localities, species and number of fishes used in this study.....	47
2	: Number and body weight of the examined fishes.....	48
3	: Number and total length of the examined fishes.....	48
4	: Schedule of experimental infection used in the first, second and third studied groups.....	57
5	: Schedule of experimental infection used in the in the fourth studied group.....	59
6	: Total prevalence of encysted metacercariae among infested fishes.....	70
7	: Seasonal prevalence of encysted metacercariae in the examined fish.....	71
8	: Prevalence of encysted metacercariae in relation to sex of the examined fish.....	72
9	: Comparative prevalence of encysted metacercariae among muscles and organs of <i>O. niloticus</i> and <i>C. lazera</i>	74
10	: Prevalence of encysted metacercariae in relation to weight of the examined fish.....	77
11	: Prevalence of encysted metacercariae in relation to length of the examined fish.....	79
12	: The main morphological differences between the collected and classified encysted metacercariae.....	95
13	: Different types of the recovered encysted metacercariae from the examined fish species	96

LIST OF FIGURES

	Page
Fig. (1): (a) Black spots on the whole body of <i>Oreochromis niloticus</i> fish. (b) Magnifying photo showing black spots on the head and the membranous portion of the pectoral fin.....	65
Fig. (2): <i>Oreochromis niloticus</i> showing presence of yellow cyst on the external body surface.....	66
Fig. (3): <i>Clarias lazera</i> showing skin erosions and ulceration.....	66
Fig. (4): (a), Grayish white nodules of encysted metacercariae in muscles of <i>Clarias lazera</i> . (b) Magnifying photo showing such metacercariae.....	67
Fig. (5): <i>Oreochromis niloticus</i> fish showing grayish-opaque cyst on the anterior kidney.....	68
Fig. (6): <i>Clarias lazera</i> showing grayish-white cyst in the anterior kidney.....	68
Fig. (7): Prevalence of encysted metacercariae among infested fishes.....	71
(Fig 8): Seasonal prevalence of encysted metacercariae in the examined fish...	72
(Fig 9): Prevalence of encysted metacercariae in relation to sex of the examined fish.....	73
(Fig 10): Comparative prevalence of encysted metacercariae among muscles and organs of <i>O. niloticus</i> and <i>C. lazera</i>	75
Fig. (11): Prevalence of encysted metacercariae in relation to weight of the examined fish.....	78
Fig. (12): Prevalence of encysted metacercariae in relation to length of the examined fish.....	80
Fig. (13): (a) Unstained Heterophyid encysted metacercaria in the gill of <i>Oreochromis niloticus</i> (X 100). (b) Unstained Heterophyid encysted metacercariae in the liver of <i>Clarias lazera</i> (X 100).	83
Fig. (14): (a) Clinostomatid excysted metacercaria. (b) Euclinostomatid excysted metacercaria.	84
Fig. (15): Unstained prohemistomatid encysted metacercariae in the muscles of <i>Clarias lazera</i> (a) (X 100), (b) (X 250).....	85
Fig. (16): (a) Prohemistomatid encysted metacercaria in muscles of <i>Oreochromis niloticus</i> (X 250). (b) Prohemistomatid excysted metacercaria in muscles of <i>Clarias lazera</i> (X 250). (c) Prohemistomatid excysted metacercaria from muscles of <i>Clarias lazera</i> (X 250).	86
Fig. (17): Cyanodiplostomatid encysted metacercariae from muscles of <i>Clarias lazera</i> (X 100).	87
Fig. (18): (a) Diplostomatid encysted metacercariae in the gills of <i>Oreochromis niloticus</i> (X 250). (b) Diplostomatid excysted metacercaria from muscles of <i>Clarias lazera</i> (X 25).	88

Fig. (19):	<i>Posthodiplostomum cuticola</i> encysted metacercaria in the fins of <i>Oreochromis niloticus</i> (a) (X100), (b) (X40), (C) (X400). (d) <i>Posthodiplostomum cuticola</i> encysted metacercariae from the surrounding tissues of the eye (X 25)	89
Fig. (20):	Gills of <i>Oreochromis niloticus</i> showing multiple encysted metacercariae in the primary gill lamellae (a) (X100) and (b) (X 100). (c) Muscles of <i>Clarias lazera</i> showing unidentified encysted metacercariae (X25). (d) Muscles of <i>Oreochromis niloticus</i> showing unidentified encysted metacercariae (X 400).....	90
Fig. (21):	(a) Heart of <i>Clarias lazera</i> showing unidentified encysted metacercaria (X 100). (b) Kidney of <i>Clarias lazera</i> showing unstained and unidentified encysted metacercariae (X 100).....	91
Fig. (22):	Liver of <i>Clarias lazera</i> showing unidentified encysted metacercariae. (a) (X 100) and (b) (X 400).....	92
Fig (23):	(a) <i>Prohemistomum vivax</i> (adult trematode) obtained from experimentally infested chickens (4-5weeks old) (X 100). (b) <i>Mesostephanus appendiculatus</i> (adult trematode) obtained from experimentally infested chickens (4-5weeks old) (X 100).....	97
Fig. (24):	Gills of <i>Oreochromis niloticus</i> showing cross section of encysted metacercaria in the gill arch together with fibrous tissue capsule, edema and mononuclear leukocytic infiltration. H & E stain, (X 100).	100
Fig. (25):	Muscles of <i>Clarias lazera</i> showing cross section of parasitic cysts surrounded by connective tissue capsule, edema, pressure atrophy and hyaline degeneration as well as some mononuclear cells. H & E stain, (X 250).	100
Fig. (26):	Heart of <i>Clarias lazera</i> showing cross section of the parasitic cyst surrounded by connective tissue capsule and degenerated as well as necrotic myocardial muscles. H & E stain, (X 250).....	101
Fig. (27):	Liver of <i>Clarias lazera</i> showing cross section of encysted metacercaria surrounded by thick connective tissue capsule, melanomacrophage cells, degenerated hepatocytes. H & E stain, (X 250).....	101
Fig. (28):	Liver of <i>Clarias lazera</i> showing cross section of the parasitic cyst in the portal area surrounded by fibrous tissue proliferation, edema and mononuclear leukocytic infiltration. H & E stain, (X 250).....	102
Fig. (29):	Kidney of <i>Clarias lazera</i> showing the parasitic cyst surrounded by connective tissue capsule and degenerated as well as necrotic renal tubules with mononuclear cells infiltration. H & E stain, (X 250).....	102
