

**ASSESSMENT OF FORAGE PRODUCTION AND
NUTRITIVE VALUES OF THE DOMINANT
RANGE PLANTS IN TWO DIFFERENT
LOCATIONS AT THE NORTH
WESTERN COAST OF
EGYPT**

BY

AWAD MAHMOUD AL-ASWAD

B. Sc. Agric. Eng. (Ecology& Forests), Aleppo University, Syria, 1998
M.Sc. Agric. Sc. (Agronomy), Ain Shams University, 2005

A thesis submitted in partial fulfillment

of

the requirements for the degree of

DOCTOR OF PHILOSOPHY

in

**Agricultural Science
(Agronomy)**

**Department of Agronomy
Faculty of Agriculture
Ain Shams University**

2009

Approval Sheet

**ASSESSMENT OF FORAGE PRODUCTION AND
NUTRITIVE VALUES OF THE DOMINANT
RANGE PLANTS IN TWO DIFFERENT
LOCATIONS AT THE NORTH
WESTERN COAST OF
EGYPT**

BY

AWAD MAHMOUD AL-ASWAD

B. Sc. Agric. Eng. (Ecology& Forests), Aleppo University, Syria, 1998
M.Sc. Agric. Sc. (Agronomy), Ain Shams University, 2005

This thesis for Ph. D. degree has been approved by:

Prof. Dr. El-Ghareib Abdalla El-Ghareib

Prof. of Agronomy, Faculty of Agriculture, Al-Azhar University

Prof. Dr. Sami Abd El-Kawi Habib

Prof. Emeritus of Agricultural Botany, Faculty of Agriculture, Ain
Shams University

Prof. Dr. Mohamed Hamed El-Agroudy

Prof. of Agronomy, Faculty of Agriculture, Ain Shams University

Prof. Dr. Tawakul Younis Rizk

Prof. Non Emeritus of Agronomy, Faculty of Agriculture, Ain Shams
University

Date of Examination: 11 / 3 / 2009

**ASSESSMENT OF FORAGE PRODUCTION AND
NUTRITIVE VALUES OF THE DOMINANT
RANGE PLANTS IN TWO DIFFERENT
LOCATIONS AT THE NORTH
WESTERN COAST OF
EGYPT**

BY

AWAD MAHMOUD AL-ASWAD

B. Sc. Agric. Eng. (Ecology& Forests), Aleppo University, Syria, 1998
M.Sc. Agric. Sc. (Agronomy), Ain Shams University, 2005

Under the supervision of :

Prof. Dr. Tawakul Younis Rizk

Prof. Non Emeritus of Agronomy, Department of Agronomy, Faculty
of Agriculture, Ain Shams University (Principal Supervisor)

Prof. Dr. Mohamed Hamed El-Agroudy

Prof. of Agronomy, Department of Agronomy, Faculty of Agriculture,
Ain Shams University

Dr. Nagi Hussien Mahmoud

Researcher, Plant Ecology & Range Management Department, Desert
Research Center

LIST OF TABLES

No.	Page
1 Means of some of the meteorological data of Marsa Matruh during the period extended from winter 2005 up to spring 2007.....	41
2 Soil physical properties of the five studied sites in Al-Omayed location.....	43
3 Soil chemical properties of the five studied sites in Fuka location.....	44
4 Botanical composition , palatability and duration of the native plant species under two seasons and different sites during the period extended from autumn 2005 till Spring 2007 in Fuka location.....	44
5 Numbers of families , species , palatability and life duration of native plants in Fuka location.....	47
6 Effect of seasons, sites and their interaction on the abundance percentage of the native plant species.....	49
7 Abundance percentage of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	50
8 Effect of seasons, sites and their interaction on the frequency percentage of the naturally grown plant species.....	52
9 Frequency percentage of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	53
10 Effect of seasons, sites and their interaction on the coverage percentage of the naturally grown plant species.....	55
11 Coverage percentage of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	56
12 Effect of seasons, sites and their interaction on the plant density of the naturally grown plant species.....	58

13	Plant density of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	59
14	Effect of seasons, sites and their interaction on the fresh forage yield (kg/m ²) of the naturally grown plant species.....	61
15	Fresh forage yield (kg/m ²) of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	62
16	Effect of seasons, sites and their interaction on the dry forage yield (kg/m ²) of the naturally grown plant species.....	64
17	Dry forage yield (kg/m ²) of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	65
18	Effect of seasons, sites and their interaction on the total carbohydrate percentage of the naturally grown plant species.....	66
19	Total carbohydrate percentage of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	68
20	Effect of seasons, sites and their interaction on the crude protein percentage of the naturally grown plant species.....	69
21	Crude protein percentage of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	70
22	Effect of seasons, sites and their interaction on the crude fiber percentage of the naturally grown plant species.....	71
23	Crude fiber percentage of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	73
24	Effect of seasons, sites and their interaction on the ash percentage of the naturally grown plant species.....	74

25	Ash percentage of plant species in Fuka location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	75
26	Means of some of the meteorological data of Alexandria location during the period extended from winter 2005 up to spring 2007.....	77
27	Soil physical properties of the five studied sites in Al-Omayed location.....	78
28	Soil chemical properties of the five studied sites in Al-Omayed location.....	79
29	Numbers of families, species, palatability and life duration of native plants in Al-Omayed location.....	80
30	Botanical composition, palatability and duration of the native plant species under two seasons and different sites during the period extended from autumn 2005 till Spring 2007 in Al-Omayed location.....	81
31	Effect of seasons , sites and their interaction on the abundance percentage of the native plant species in Al-Omayed location.....	84
32	Abundance percentage of plant species in Al-Omayed location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	85
33	Effect of seasons , sites and their interaction on the frequency percentage of the naturally grown plant species.....	87
34	Frequency percentage of plant species in Al-Omayed location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	88
35	Effect of seasons, sites and their interaction on the coverage percentage of the naturally grown plant species.....	89
36	Coverage percentage of plant species in Al-Omayed location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	91

37	Effect of seasons, sites and their interaction on the plant density of the naturally grown plant species in Al-Omayed location.....	92
38	Plant density of plant species in Al-Omayed location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	93
39	Effect of seasons, sites and their interaction on the fresh forage yield (kg/m ²) of the naturally grown plant species in Al-Omayed location.....	95
40	Fresh forage yield (kg/m ²) of plant species in Al-Omayed location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	96
41	Effect of seasons, sites and their interaction on the dry forage yield (kg/m ²) of the naturally grown plant species in Al-Omayed location	97
42	Dry forage yield (kg/m ²) of plant species in Al-Omayed location as affected by sites and seasons	98
43	Effect of seasons, sites and their interaction on the total carbohydrate percentage of the naturally grown plant species.....	99
44	Total carbohydrate percentage of plant species in Al-Omayed location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	101
45	Effect of seasons, sites and their interaction on the crude protein percentage of the naturally grown plant species in Al-Omayed location	102
46	Crude protein percentage of plant species in Al-Omayed location as affected by sites and seasons	103
47	Effect of seasons, sites and their interaction on the crude fiber percentage of the naturally grown plant species in Al-Omayed location	104

48	Crude fiber percentage of plant species in Al-Omayed location as affected by sites and seasons	105
49	Effect of seasons, sites and their interaction on the ash percentage of the naturally grown plant species in Al-Omayed location.....	106
50	Ash percentage of plant species in Al-Omayed location as affected by sites and seasons during the period extended from autumn 2005 till spring 2007.....	107
51	Initial composition (DM , CP and CF) of the digested plant species.....	109
52	In situ digestibility of dry matter for the tested plant species during 24 and 72 hrs.....	110
53	In situ digestibility of crude protein for the tested plant species during 24 and 72 hrs.....	112
54	In situ digestibility of crude fiber for the tested plant species during 24 and 72 hrs.....	113

LIST OF FIGURES

No.	Page
1 The two areas (locations) under study (Fuka and Al-Omayed) at North Western Coast of Egypt.....	32
2 North Western Coast of Egypt and two study areas (Fuka and Al-Omayed locations).....	39
3 First location under study at North Western Coast of Egypt (Fuka area).....	40
4 Range plant families percentage in Fuka location.....	48
5 Effect of seasons and sites interaction on the abundance of plant species	51
6 Effect of seasons and sites interaction on the frequency % of plant species	54
7 Effect of seasons and sites interaction on the coverage % of plant species	57
8 Effect of seasons and sites interaction on the plant density (m^2) of plant species	60
9 Effect of seasons and sites interaction on the fresh forage yield (kg/m^2) of plant species	61
10 Effect of seasons and sites interaction on the dry forage yield (kg/m^2) of plant species	64
11 Second location under study at North Western Coast of Egypt (Al-Omayed area).....	76
12 Range plant families percentage in Al-Omayed location.....	83
13 Effect of seasons and sites interaction on the abundance % of plant species in Al-Omayed location.....	86
14 Effect of seasons and sites interaction on the frequency % of plant species	87
15 Effect of seasons and sites interaction on the coverage % of plant species in Al-Omayed location	90

16	Effect of seasons and sites interaction on the plant density (m^2) of plant species in Al-Omayed location	94
17	Effect of seasons and sites interaction on the fresh forage yield (kg/m^2) of plant species in Al-Omayed location	95
18	Effect of seasons and sites interaction on the dry forage yield (kg/m^2) of plant species in Al-Omayed location	99

ACKNOWLEDGMENT

The author wishes to express his sincere appreciation and gratitude to his major **Prof. Dr. Tawakul Y. Rizk** Professor of Agronomy, Agronomy Department, Faculty of Agriculture, Ain Shams University for suggesting the problem, valuable supervision, helpful suggestions and fruitful advice during the entire course of the work as well as his valuable effort during the preparation of the manuscript.

Deep gratitude are also due to **Prof. Dr. Mohamed H. EL-Agroudy** Professor of Agronomy, Agronomy Department, Faculty of Agriculture, Ain Shams University for his supervision and helpful assistance during the achievement of this work.

Sincere thanks and deep gratitude are due to **Dr. Nagi H. M. Baumi**. Researcher, Plant Ecology & Range Management Department Desert Research Center for his supervision, and help in the practical part of this work. Also, deep gratitude are due to **Dr. Khaled. Z. Kewan**. Mariut Research Station, Desert Research Center, for his help in biological evaluation of range plant species in this work.

Sincere thanks are expressed to all staff members of Agronomy Department, Faculty of Agriculture, Ain Shams University. Also great appreciation to my family in Syria and my dear wife for their help and support, I feel deeply grateful to my dear country Syria.
