Chemistry Department

# **Biological synthesis of gold nanoparticles using extracts of some medicinal plants**

## **A Thesis**

"Submitted for the degree of Master of Science as a partial  
fulfilment for requirements of the master of Science"

By

***Amal Samir Abdel-Rahman Khidr***

**(B.Sc. Biochemistry/Chemistry, 2008)**

## **Supervisors**

***Dr. Mostafa M. H. Khalil***

*Professor of Chemistry  
Chemistry Department,  
Faculty of Science,  
Ain Shams University*

***Dr. Dina Y. Sabry***

*Lecturer of Chemistry  
Chemistry Department,  
Faculty of Science,  
Ain Shams University*

**2013**

Faculty of Science  
Chemistry Department

# **Biological synthesis of gold nanoparticles using extracts of some medicinal plants**

Thesis submitted by

**Amal Samir Abdel-Rahman Khidr**

For The Degree Of M.Sc Of Science In  
Inorganic Chemistry

To

Department of Chemistry  
Faculty of Science  
Ain Shams University  
**2013**

Faculty of Science  
Chemistry Department

## *Approval sheet*

Name of candidate: **Amal Samir Abdel-Rahman Khidr**

Degree: M.Sc. Degree In Chemistry

**Thesis Title: Biological synthesis of gold nanoparticles  
using extracts of some medicinal plants**

This Thesis has **been approved by:**

**1-Prof. Dr. Mostafa M. H. Khalil**

**2- Dr. Dina Y. Sabry**

*Approval*

Chairman of Chemistry Department

**Prof. Dr. Hamed Ahmed Younes Derbala**

**2013**

## Statement

This Thesis Is Submitted In Partial Fulfillment Of The M.Sc  
Degree, Faculty Of Science, Ain Shams University

In addition to the work carried out in this thesis the candidate,  
**Amal Samir Abdel-Rahman Khidr**, has attended postgraduate studies  
in the following topics and passed successfully in the final examination in  
the academic year 2009-2010:

621	Coordination Chemistry
622	Radiochemistry and Separation Techniques
623	Electrochemistry and Electrochemical Analysis
624	Group Theory and Computer Programming
625	Spectroscopic Methods for Structural and Analytical Chemistry
---	TOEFL

**Prof. Dr. Hesham A. Madian**

Chairman of Chemistry Department  
Faculty of Science-Ain Shams University

## *Dedication*

I dedicate this work to the Almighty God, who has made this work possible.

This thesis is dedicated to all the people who never stop believing in me. I also dedicate this thesis to my parents for their endless love, support and encouragement.

I also give special thanks to my sisters and friends, for their kind support and contribution to the success of my studies.

I want to express my profound gratitude to my Prof. Dr. Mostafa M.H. Khalil for his guidance and help.

*Amal Samir*

*First and foremost, I would like to thank God for given me the wisdom, knowledge and strength to complete this work successfully.*

*I would like to express my gratitude to my supervisor, **Prof. Dr. Mostafa M. H. Khalil**, Professor of Inorganic and Analytical Chemistry, Faculty of Science, Ain Shams University, for giving me the opportunity to work in this field and for giving me the chance to be one of his students. I learned from his insight a lot. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my master study. He did not only guide this work and find time to discuss with me but also gave me the confidence to express my ideas freely. His leadership, support, attention to details, hard work have set an example I hope to match some day. Actually he was more than a supervisor, he was a teacher who inspired me and pushed me forward.*

*Many thanks to **Dr. Dina Sabry**, Assistant Professor of Inorganic and Analytical Chemistry, Faculty of Science, Ain Shams University, for her help, supervising and support in the thesis.*

*I would also like to thank my Colleagues in the Chemistry Department, Faculty of Science, Ain Shams University for their help.*

Acknowledgement	i
List of Table	iii
List of Schemes	iv
List of Figures	v
List of Abbreviation	xv
Abstract	xvii
 <b>Chapter I: Introduction</b>	
1.1 What is nanotechnology?	1
1.2 Classification of nanoparticles	3
1.3 Metallic nanoparticles	4
1.4 Origin of surface plasmon resonance in noble metal nanoparticles	5
1.5 General synthetic routes of metallic nanoparticles	10
1.6 Methods for synthesise of metallic nanoparticles	11
1.6.1 Physical methods	14
1.6.2 Chemical methods	15
1.6.3 Biological Methods	20
1.6.3.1 Synthesis of gold nanoparticles using plant extracts	21
1.7 Mechanisms of biosynthesis of gold Nanoparticles using plant extract	27
1.8 Antioxidant compounds in <i>Salvia Officinalis</i> L leaves and <i>Foeniculum Vulgare</i> seeds	38
 <b>Aim of the work</b>	 43
 <b>Chapter II: Materials and Methods</b>	
2.1 Material	44
2.2 Analytical instruments	44
2.2.1 UV–visible spectral analysis	44
2.2.2 Transmission electron microscopy (TEM)	44
2.2.3 X-Ray diffraction	45
2.2.4 Fourier transform infrared spectroscopy	45
2.2.5 Thermogravimetric analysis	45
2.2.6 Antimicrobial activity assay	46
2.3 Sample preparation	47
2.3.1 Preparation of sage extract	47
2.3.2 Preparation of fennel extract	47

2.4 One-step synthesis of gold nanoparticles using extract	48
2.5 Synthesis of AuNPs	48
2.5.1 Using different sage extracts concentrations	48
2.5.2 Using different fennel extracts concentrations	50
2.5.3 Using different pH of sage extract	51
2.5.4 Using different pH of fennel extract	52
2.6. Samples preparation for antimicrobial assay	52
2.6.1 Using sage extract	52
2.6.2 Using fennel extract	53

### **Chapter III: Synthesis of gold nanoparticles using *Salvia Officinalis* leaves**

3.1 Effect of extract concentration	55
3.2. Effect of contact time	67
3.3. Effect of pH on nanoparticles synthesis	69
3.4. Effect of reaction temperature on AuNPs synthesis	74
3.5. The X-Ray diffraction study	75
3.6. Fourier transform infrared spectroscopy (FTIR)	77
3.7. Thermal gravimetric analysis	80
3.8. Antimicrobial Activity	81

### **Chapter IV: Synthesis of gold nanoparticles using *Foeniculum vulgare* seeds**

4.1 Effect of extract concentration	89
4.2. Effect of contact time	95
4.3. Effect of pH on nanoparticles synthesis	96
4.4. Effect of reaction temperature on AuNPs synthesis	102
4.5. The X-Ray Diffraction Study	104
4.6. Fourier transform infra-red spectroscopy (FTIR)	105
4.7. Thermal gravimetric analysis	110
4.8. Antimicrobial Activity	111

### **Conclusion**

### **Summary**

### **References**
