Management of Hydrocephalus

An Essay:

Submitted For Partial Fulfillment Of Master Degree In General Surgery.

Presented By:

Ahmad Mofreh Abdel-Mageed Elmezain

M.B;B.CH.

Supervised By:

Prof.Dr. Ahmad Alaa Eldin Abdel-Mageed.

Professor of General Surgery.

Faculty of Medicine

Ain Shams University.

Dr. Mohammad Ali Nada.

Assist.Prof .of General Surgery.

Faculty of Medicine

Ain Shams University.

(2013)

أساليب تشخيص وعلاج استسقاء المخ

بحث:

توطئة للحصول على درجة الماجستير في الجراحة العامة

مقدم من:

أحمد مفرح عبد المجيد المزين

بكالوريوس الطب والجراحة

تحت إشراف

أ.د . أحمد علاء الدين عبد المجيد

استاذ الجراحة العامة

كلية الطب

جامعة عين شمس

د . محمد د على ندا

استاذ مساعد الجراحة العامة

كلية الطب

جامعة عين شمس

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا

عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

(البقرة - ٣٢)

Acknowledgement

All Praise be to Allah, the Lord of the worlds and peace and blessings of Allah be upon the noblest of the Prophets and Messengers, our Prophet Muhammad peace and blessings be upon him, his folks and his companies.

I would like to express my most sincere thanks to

Prof.Dr.

Ahmad Alaa Eldin Abdel-Mageed

Professor of General Surgery, Faculty of Medicine,

Ain Shams University.

For his gracious supervision, valuable guidance, generous help, support and continuous encouragement through the whole research.

**I would like also to express my most sincere thanks and
deepest gratitude to**

Dr.

Mohammad Ali Nada

Assistant Professor of General Surgery, Faculty of Medicine,

Ain Shams University.

For his remarkable effort, valuable comments and sincere advices.

Dedication

First of all I'd like to dedicate this work to my parents, brothers, sisters, father-in-law & mother-in-law, brother-in-law & sister-in-law for their great support & encouragement.

And to my wife, who dedicated her time and effort to support me till this work is done.

Last but not least, to my dear professor Dr. Alaa Elshobokshy for his continuous support and encouragement

Ahmad Mofreh

2013

I n d e x

1. Acknowledgement.....	I
2. Dedication	II
3. Index.....	III
4. List of figures.	VII
5. List of tables.....	XV
6. List of abbreviations.....	XVI
7. Aim of the work.	1
8. Introduction.	2
9. Anatomical, Histological and Physiological Considerations	4
a. Anatomical Considerations.....	4
• Embryology	4
• Topography and relations of the ventricular system.....	5
▪ The Lateral Ventricle	5
▪ The 3 rd Ventricle	6
▪ Cerebral Aqueduct	6
▪ The 4 th ventricle.....	6
b. Histological Considerations.....	7
c. Physiological Considerations.....	8
• The amount of CSF.....	8
• Secretion of CSF.....	8
• Circulation of CSF.....	9
• Absorption of the CSF	9

Management of Hydrocephalus

• Physical characters and composition of CSF.....	9
• Pressure of CSF	10
• Function of the CSF.....	11
10. Hydrocephalus	12
• Definition.....	12
• History	13
• Frequency	13
• Types of hydrocephalus	14
• Pathophysiology.....	15
• Causes of hydrocephalus.....	16
• Diagnosis of hydrocephalus.....	19
▪ Clinical examination	19
▪ Physical examination	23
▪ Investigations	25
• Ultrasound	25
• Transcranial Doppler.....	26
• CT scan (Computed Tomography).....	27
o CT scan and MRI& criteria.....	28
• MRI (Magnetic Resonance Imaging).....	30
• Plain skull X-ray.....	32
• Investigations of normal pressure hydrocephalus.	33
o CT scan or MRI.....	33
o Isotopic cisternography	33

Management of Hydrocephalus

o Neuropsychological assessment.....	33
o Infusion tests	33
o CSF flow dynamics	34
o Simulate shunting.....	34
o Positron Emission Tomography (PET)	34
• Diagnostic Procedures.....	36
o Spinal tap (Lumbar puncture)	36
o Tympanic membrane displacement.....	36
o Ophthalmologic examination	37
• Prevention.....	38
• Treatment	52
▪ Medical	52
▪ Surgical	52
o CSF shunts.....	52
o Temporary CSF drainage procedures	53
o 3rd ventriculostomy	53
o General preoperative care	54
o General postoperative care.....	56
o Discharge planning of VP shunt	59
o Follow-up care	60
o Prognosis.....	60
o Contraindications	62
▪ Operative	65
o Definitive CSF shunts	65

Management of Hydrocephalus

• Ventriculoperitoneal shunting (VPS).....	65
▪ Programmable valves	66
• The ventriculoatrial shunting (VAS).....	69
• Lumboperitoneal shunting (LPS).....	70
• Ventriculopleural shunting (VPLS)	72
o Temporary CSF shunts	75
• Ventriculo-Subgaleal shunting (VSGS).....	75
• Ommaya reservoir.....	79
• External ventricular drainage (EVD)	80
o Temporary CSF drainage procedures	81
• Ventricular Tap (Ventriculostomy).....	83
• Subdural Tap.....	82
o Endoscopy.....	83
• Endoscopic 3 rd Ventriculostomy (ETV).....	83
• Endoscopic choroid plexus cauterization (ECPC)	88
• ETV/CPC	90
• Endoscopic placement of proximal catheter	93
▪ Complications	94
o General complications	94
o Complications associated with specific measures ..	111
11. References.....	122
12. Summary	132
13. Arabic summary.....	135

List of Figures

Title of Figure		Page
Fig (1):	Multi-compartmental model of ventricular volume regulation.	5
Fig (2):	Artist's concept of circuit diagram of cerebral blood flow and CSF production and flow.	5
Fig (3):	The ventricular system.	6
