ACKNOWLEDGMENT

I am very much indebted to **Professor Ahmed M.Kaddah**, Department of Chemistry, Ain Shams University for his keen interest, helpful assistance and criticism.

A lot of gratitude is dedicated to **Dr. Alyaa A. Shalaby**, Department of Chemistry, Ain Shams University and to **Dr. Youssry M. Naguib**, Department of Chemistry, Suez Canal University for their kind and great helps.

I wish to express my sincere gratitude to **Professor Dietrich Döpp**, Department of organic Chemistry Duisburg University for his professional guidance during my first steps in the field of photochemistry. He was always kind enough to suggest the lines of research and to follow the progress of the work with valuable help, encouragement, meticulous supervision and continuous advises, also for providing all the facilities to accomplish this humble work successfully.

I am deeply appreciated to **Professor Henkel, G.**, University of Duisburg for performing the X-ray crystal structure analyses.

Also, I would like to acknowledge **Mrs. Renate Brülls**, **Mr. Manfred Zahres** and **Mr. Winfried van Hoof**, for their efforts to carry out the elemental analyses as well as spectral measurements in the Department of Organic Chemistry, Duisburg University.

CONTENTS

Subject	Page
List of Tables	
List of Figures	
Summary	i
Introduction	1
- The Scope of Photo Electron Transfer (PET)	1
- Dynamic quenching processes of excited states	2
- Typical photochemical conversions of π - deficient azaheterocycles	10
- Role of amines in PET	47
Discussion of the original Work	62
- Aims of the present investigation.....	62
- Energetic considerations.....	63
- Synthesis of the starting materials.....	66
- The UV-Spectra of phenylated azines under investigation	73
- Preparative photoconversions of phenyl- ated azines in neat triethylamine.....	74
Experimental	121
References	144
Arabic Summary	—

LIST OF TABLES

Table No.	Page
(4.1) Values of ΔG_{SET}	65
(4.2) Selected bond lengths of compd. (rac-239)..	93
(4.3) Selected bond angles of compd.(rac-239)...	94
(4.4) Selected bond lengths and angles of compd. (263).....	110
(4.5) Integrated quantum yields (ϕ_{conv} & ϕ_{p}) of compd. (236)	118
(4.6) Integrated quantum yields (ϕ_{conv}) of compd. (193)	119
(5.1) Chromatographic separation for the photo- reaction of compd. (193).....	125
(5.2) Chromatographic separation for the photo- reaction of compd. (218).....	127
(5.3) Chromatographic separation for the photo- reaction of compd. (236)	128
(5.4) Chromatographic separation for the photo- reaction of compd. (236).....	129
(5.5) Chromatographic separation for the photo- reaction of compd. (197).....	132
(5.6) Chromatographic separation for the photo- reaction of compd. (197).....	132
(5.7) Retention times of compds. (227a),(236),(237), (238) and (239).....	135
(5.8) Quantitative HPLC measurements.....	136
(5.9) Monitoring of % conversion of compd. (193)	138
(5.10) Quanta of light absorbed by compd. (193) at a different time intervals.....	139
