

**Clinical Presentation and Outcome of
Active Pulmonary Tuberculosis patients
requiring Respiratory Intensive Care
admission**

Thesis

**Submitted for partial fulfillment of the Master Degree
in Chest Diseases and Tuberculosis**

Presented by

Mourad Fouda Bendary

M.B.B.CH

Supervised by

Prof. Mona Mansour Ahmed

Professor of Pulmonary Medicine

Faculty of Medicine

Ain shams University

Dr. Ashraf Mokhtar Madkour

Assistant Professor of Pulmonary Medicine

Faculty of Medicine

Ain shams University

Faculty of medicine, Ain shams University, 2014

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَنَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ ﴿٣٢﴾

صَدَقَ اللَّهُ الْعَظِيمُ

سورة البقرة آية (32)

A cknowledgment

*First and for most, thanks to **ALLAH** for all of his blessings and for granting me the ability to finish this work.*

*I am deeply indebted to my supervisor; **Prof. Mona Mansour Ahmed**; Professor of Chest Diseases, Ain Shams University whose guidance and instructions were invaluable.*

*I would like to express my gratitude to **Dr. Ashraf Mokhtar Madkour**; assist professor of Chest Diseases, Ain Shams University for his help and patience all through the time of the research.*

I forward my appreciation to all the staff of Chest department of Aim Shams University and Abbassia Chest Hospital; doctors and nurses for their tremendous efforts to help me to finish this research.

List of Contents

· Introduction	1
· Aim of the work	3
· Review of literature	
1. Historical background	4
2. Epidemiology	6
3. Pathology of tuberculosis	14
4. Diagnosis of tuberculosis	25
5. Comorbidities with TB	46
6. Treatment of tuberculosis	51
7. Multi-drug resistance of tuberculosis	64
8. Patients with active pulmonary tuberculosis requiring ICU admission	76
· Patients and methods	84
· Results	91
· Discussion	114
· Summary	121
· conclusion	123
· Recommendations	124
· References	125
· Arabic Summary	

List of tables

Table number	subject	Page
1	Estimates of the burden of the disease caused by TB in Egypt	10
2	Incidence, notification and case detection rates in Egypt	10
3	New smear positive cases as a treatment outcome in Egypt	11
4	Retreatment cases as a treatment outcome in Egypt	11
5	HIV testing and provision of CPT, ART and IPT in Egypt	11
6	Testing for MDR-TB and number of confirmed cases of MDR-TB in Egypt	12
7	New smear-positive case notification by age and sex in Egypt	12
8	First-line anti-tuberculous drugs	51
9	The mode of action and side effects of first-line anti-tuberculous drugs	52
10	Different patient categories and the corresponding treatment category used to treat them	52
11	Side effects of anti TB drugs and their management	59
12	The definitions of different expected outcomes	62
13	Number of bacilli required for the appearance of a mutant resistant to different anti-tuberculous drugs	66
14	Estimated bacterial populations within different TB lesions	67
15	Comparison between survivors and non-survivors as regards demographic characteristics	92

List of tables(Cont.)

Table number	subject	Page
16	Comparison between survivors and non-survivors as regards comorbidities	93
17	Comparison between survivors and non-survivors as regards history of pulmonary tuberculosis infection	94
18	Comparison between survivors and non-survivors as regards vital signs on admission	95
19	Comparison between survivors and non-survivors as regards radiological characteristics pulmonary tuberculosis	96
20	Comparison between survivors and non-survivors as regards to respiratory failure	97
21	Comparison between survivors and non-survivors as regards mechanical ventilation	98
22	Comparison between survivors and non-survivors as regards timing of admission and length of stay in ICU	98
23	Comparison between survivors and non-survivors as regards GSC and APACHE II score on admission	100
24	Comparison between survivors and non-survivors as regards causes of ICU admission	101
25	Comparison between survivors and non-survivors as regards ICU complications	102
26	Comparison between survivors and non-survivors as regards laboratory investigations on admission	104
27	Comparison between survivors and non-survivors as regards to ABG on admission	105
28	Prescriptive data of survivors and non-survivors as regards bacteriological diagnosis of pulmonary TB	106

List of tables (Cont.)

Table number	subject	Page
29	Comparison between survivors and non-survivors as regards to resistance to anti-TB drugs (MDR& XDR)	106
30	Comparison between survivors and non-survivors as regards to duration of treatment and treatment regimens	107
31	Risk factors for non-survival (Logistic regression model)	108
32	Performance of some suggested factors for prediction of non-survival	109
33	Value of some suggested factors for prediction of mortality	110
34	Value of female, renal impairment, far advanced lesion, mechanical ventilation and electrolytes disturbance for prediction of mortality	113

List of figures

Table number	subject	Page
1	Egyptian mummy in the British Museum	4
2	Progress in applying the Task Force framework for assessment of TB surveillance data, July 2012	6
3	Fate of the studied cases	91
4	Comparison between survivors and non-survivors as regards to sex	92
5	Comparison between survivors and non-survivors as regards to mean blood pressure	95
6	Comparison between survivors and non-survivors as regards spread of pulmonary tuberculosis	96
7	Comparison between survivors and non-survivors as regards to type of respiratory failure	97
8	Comparison between survivors and non-survivors as regards to timing of ICU admission	99
9	Comparison between survivors and non-survivors as regards to GCS and APACHE II score on admission	100
10	Comparison between survivors and non-survivors as regards electrolytes disturbance	102
11	Comparison between survivors and non-survivors as regards to mean PH	105
12	ROC curve of some suggested factors for prediction of non-survival	109
13	Value of Albumin ≤ 2.6 (gm/dl) for prediction of non-survival	110
14	Value of O ₂ saturation $\leq 85\%$ for prediction of non-survival	111
15	Value of GCS ≤ 12.0 (Score) for prediction of non-survival	111

List of figures (Cont.)

Figure number	subject	Page
16	Value of Urea ≥ 55.0 (mg/dL) for prediction of non-survival	112
17	Value of Creatinine ≥ 1.5 (mg/dL) for prediction of non-survival	112
18	Value of APACHE II ≥ 26 (Score) for prediction of non-survival	113

List of Abbreviations

β.	Regression coefficient
μg	Microgram
μl	Microliter
ADA	Adenosine deaminase
AF	Atrial fibrillation
AFB	Acid-fast bacilli
AIDS	Acquired immunodeficiency syndrome
APACHE II	Acute physiology and chronic health evaluation II
ARDS	Acute respiratory distress syndrome
ARF	Acute respiratory failure
ART	Antiretroviral therapy
AUC	Area under curve
BCG	Bacillus Calmette-Guérin
Cat I	Category I

List of Abbreviations (Cont.)

Cat II	Category II
CDC	Centers for disease control and prevention
CDR	Case detection rate
CI	Confidence interval
CLD	Chronic liver diseases
CMI	Cell-mediated immunity
COPD	Chronic obstructive pulmonary disease
CPT	Co-trimoxazole preventive therapy
CRF	Chronic renal failure
CT	Computed tomography
CTP	Child-Turcotte-Pugh
DA	Diagnostic accuracy
DCL	Disturbed conscious level

List of Abbreviations (Cont.)

DBP	Diastolic blood pressure
dl	Deciliter
DM	Diabetes mellitus
DNA	Double stranded nucleic acid
DOTS	Directly observed treatment strategy
DST	Drug susceptibility test
DR	Drug resistant
DRS	Drug resistance survey
DVT	Deep venous thrombosis
ESP	Extra-sensing power
GLC	Green light committee
GSC	Glasgow coma scale
Hb	Hemoglobin
HLA	Human leukocyte antigen

List of Abbreviations (Cont.)

HIO	Health insurance organization
HIV	Human immunodeficiency virus
HRCT	High resolution computed tomography
ICU	Intensive care unit
IFN-γ	Interferon-gamma
IGRA	Interferon-gamma release assay
INH	Isoniazid
INR	International normalized ratio
IPT	Isoniazid preventive therapy
IQR	Inter-quartile range
Kg	Kilogram
MDR-TB	Multi-drug-resistant tuberculosis

List of Abbreviations (Cont.)

Mg	Milligram
MGIT	Mycobacterial growth indicator tube
MHD	Maintenance haemodialysis
ml	Milliliter
mm	Millimeter
mmol	Millimole
MOF	Multiple organ failure
MTB	Mycobacterium tuberculosis
MV	Mechanical ventilation
NTP	National tuberculosis control programme
OR	Odds ratio
PA	Posteroanterior
PAS	Para-amino salicylic acid
PCR	Polymerase chain reaction
PNV	Predictive negative value

List of Abbreviations (Cont.)

PPD	Purified protein derivative
PPV	Predictive positive value
PT	Prothrombin time
PTT	Partial thromboplastin time
RIF	Rifampicin
RICU	Respiratory intensive care unit
RNA	Ribonucleic acid
RT	Renal transplantation
SBP	Systolic blood pressure
SD	Standard deviation
SE	Standard error
SGOT	Serum glutamate oxaloacetate transaminase
SGPT	Serum glutamate pyruvate transaminase
SVT	Supra ventricular tachycardia
TB	Tuberculosis
