EVALUATION OF CHRONIC RESPIRATORY EFFECTS DUE TO INHALATION OF POLYMER FUMES IN PLASTIC MANUFACTURE

Thesis

Submitted for Partial Fulfillment of
Master Degree in
Chest Diseases

By

Ehab Thabet Aziz
M.B., B. Ch.

Supervised By

Prof. Dr. Manal Hosny Ahmed
*Professor of Chest Diseases
Faculty of Medicine, Ain Shams University*

Prof. Dr. Moneir Hassan Eldidi
*Professor of Pathology
National Cancer Institute, Cairo University*

Dr. Mohamed Ali Farrag
*Lecturer of Chest Diseases
Faculty of Medicine, Ain Shams University*

**Faculty of Medicine
AIN SHAMS UNIVERSITY
2001**

B 0541

TO MY FAMILY

Acknowledgement

Before and above all thanks to Q.Q.Q.

It is a great honor to me to express my sincere gratitude to professor **Manal Hosny**, Prof. of chest diseases, Ain Shams University for here encouragement, guidance and generous advice which made this work possible.

I would like to express my deep thanks and supreme gratitude to professor **Maneir Elidi**, Prof. of pathology, National Cancer Institute Cairo University for his great effort.

My hearty thanks and supreme gratitude to Doctor **Mohammad Farag**, lecturer of chest diseases, Ain Shams University for his close supervision and valuable instructions throughout this work.

CONTENTS

	Page
Introduction and Aim of the Work	1
Review of Literature	
Occupational lung diseases	4
Clinical aspects and pathogenic mechanisms of noxious gases	33
Plastic industry	60
Biochemical aspect of polymers	73
Vinyl chloride	80
Patients and Method	87
Results	93
Discussion	115
Summary	122
Conclusion and Recommendations	125
References	127
Arabic Summary	--

LIST OF TABLES

No.	Title	Page
1	Patho-physiologic responses of respiratory tract to particles, mites and gases	5
2	Factors influence the effects of inhaled agents	6
3	Classification of OLD	7
4	Predominant radiographic patterns of the various OLD.	13
5	Patterns of abnormal spirometry in various OLD	14
6	Characteristic patterns of disordered respiratory function	15
7	American Thoracic Society rating of the severity of impairment	16
8	Occupations at risk of asbestos exposure	20
9	Industries with high risk of silica exposure	30
10	Approach to differential diagnosis of silicosis	32
11	Definitions of types of inhaled substances	38
12	Principles plastic materials	64

No.	Title	Page
13	Thermal degradation products of some plastics	72
14	American Thoracic Society rating of the severity of impairment	89
15	Characteristic patterns of disordered respiratory function	89
16	Mean values of FEV ₁ in the studied group and control group	96
17	Mean values of FVC in the studied group and control group	96
18	Mean values of FEV ₁ /FVC in the studied group and control group	97
19	Mean values of PEF in the studied group and control group	97
20	Mean values of FEF 25/75 in the studied group and control group	98
21	Mean values of VC in the studied group and control group	98
22	Mean values of MEF50 in the studied group and control group	99
