## **Abstract:**

The present study was carried out in order to deal with the textile industry sector in Egypt from an environmental point of view with emphasising of the Hazardous Waste. Samples (Waste Water and Air Emission ) from 15 factories were taken from Shubra El-Kheima area for analysis and were compared with the standard levels , revealed to the reasons for any increase of concentration relating high pollutants in water for chemical substance in dyes .

## Acknowledgments

It gives me great pleasure to express my deepest gratitude to Prof. Dr. Mounir Abdu Ibrahim Salem, Prof. of Organic Chemistry, the Faculty of Science, Ain Shams University, and Dr. Mahmoud A. Hawehy, Associate Professor in the Institute of Environmental Studies & Researches, Ain Shams University for their supervision, support, valuable advice and helpful suggestions throughout the preparation of this thesis.

My thanks and gratefulness to Dr. Alaa A.Sarhan lecturer in Institute of Environmental Studies & Researches, Ain Shams University for his supervision and valuable advice throughout the preparation of this work.
