ACKNOWLEDGEMENT

First of all, I would like to express my deepest gratitude and thanks to GOD, whose magnificent help was the main factor in accomplishing this work.

I am deeply indebted to great many people for having provided me with a tremendous amount of support and assistance, both personal and professional, throughout the process of the study, while living away from my home country of Syria. I wish to offer my whole-hearted thanks to my great family whom I love and miss so much; my father, mother, brothers, sisters and also my fiancé ,whom always supported me, and gave me more of abundant love and care.

I would like to express my deepest gratitude, appreciation and respect to Prof. Dr. Gamalat El-Sayed Mansy, Professor of Pediatric Nursing, Faculty of Nursing, Alexandria University, for being behind the valuable guidance, endless help, continuous motivation, constant moral support, and encouragement. I feel greatly honored to have been working under her supervision.

I am indebted to Dr. Nehad Sabry M Basiouny, Lecturer of Pediatric Nursing, Faculty of Nursing, Alexandria University, for her sincere advice, tremendous support, valuable guidance, personal attention, sustained encouragement, and extreme patience throughout the work of this study.

My thanks also to all the staff of Diabetes Mellitus Out-Patient Clinic and Medical Department in Children University Hospital at El-Shatby and Student Health Insurance Hospital at Sporting in Alexandria, and administrators and faculty members in the four participating schools in the study for their help, and all healthy and diabetic adolescents who shared in this study that were so kindly cooperated while carrying out this study.

Last, but not least, I wish to offer my appreciation to my friends, who support me in my difficult years.
