Inhibition of the corrosion of some metals by some azodyes and Schiff bases.

By
Usama Aly Zinhome
(B. Sc. Chemistry) Tanta University

A Thesis
*Submitted in partial fulfillment of the requirements for the
Degree of Master of Science (Physical Chemistry)*

Supervisors
Prof. Dr. R. M. Issa
Prof. of Physical and Inorganic Chemistry
Faculty of Science - Tanta University

Prof. Dr. L. H. Madkour
Prof. of Physical Chemistry
Faculty of Science - Tanta University

CONTENTS

AIM OF INVESTIGATION AND PROBLEM ORIENTATION	1
SUMMARY _____	2
CHAPTER I	
1. INTRODUCTION	
1.1 Preliminary considerations	6
1.2 Types of inhibitors.....	7
1.3 Corrosion Prevention	9
1.4 The Limitation and use of inhibitors.....	11
1.5 Correlation between inhibition and stability of organic compounds.....	11
1.6 Adsorption isotherm	13
1.7 Literature survey on the corrosion inhibition of copper.....	16
1.8 Literature survey on the corrosion inhibition of iron	21
1.9 Literature survey on the corrosion inhibition of copper and iron by Schiff base compounds	28
CHAPTER II	
2. EXPERIMENTAL	
2.1 Additives _____	31
2.2 Electrolytes _____	35
2.2.1 Nitric acid solution	35
2.2.2 Sodium hydroxide solution	35
2.3 Electrodes _____	35
2.3.1 Copper electrode	35
2.3.2 Iron electrode	36
2.4 Measurement methods _____	36
2.4.1 Weight-loss method	36
2.4.2 Thermometric method	37
2.4.3 Electrochemical method. (Polarization method)	37
2.5 Calculation of corrosion current _____	42
2.6 Calculation of the degree of surface coverage using the blocking technique _____	42

CHAPTER III

RESULTS AND DISCUSSION

PART (I) Inhibitory Effect of Some Mono and Bis-Azo Dyes on Corrosion of Copper In Nitric Acid and Sodium Hydroxide Solutions

44

SECTION (I) 3.1 Inhibition of the acid corrosion of copper with some azo dyes

44

3.1.1 Weight-loss measurements 44

3.1.2 Thermometric measurements 55

3.1.3 Polarization measurements 69

SECTION (II) 3.2 Corrosion inhibitors for copper in 2M NaOH solution

79

3.2.1 Weight-loss measurements 79

3.2.2 Polarization measurements 88

PART (II) Inhibitory Effect of Some Mono-and Bis Azodyes on Corrosion of Iron in Nitric Acid and Sodium Hydroxide Solutions

97

SECTION (I) 3.3 Inhibition of acid corrosion of iron with some azodyes

98

3.3.1 Weight-loss measurements 98

3.3.2 Thermometric measurements 108

3.3.3 Polarization measurements 122

SECTION (II) 3.4 Corrosion inhibitors for iron in 2M NaOH solution

131

3.4.1 Weight-loss measurements 131

3.4.2 Polarization measurements 139

PART (III) The Corrosion Inhibition of Copper and Iron By The Investigated Schiff Bases in Nitric Acid and Sodium Hydroxide Solutions

148

SECTION (I) 3.5 Inhibition of corrosion of copper by Schiff base compounds

148

3.5.1 Weight-loss measurements 148

3.5.2 Thermometric measurements 158

3.5.3 Polarization measurements 166

SECTION (II) 3.6 Inhibition of corrosion of iron by Schiff base compounds

175

3.6.1 Weight-loss measurements 175

3.6.2 Thermometric measurements 185

3.6.3 Polarization measurements 194

CHAPTER IV

4. GENERAL DISCUSSION _____ 203

4.1 Chemical structure of the inhibitors and corrosion inhibition 203

4.2 Kinetic-Thermodynamic Model of the corrosion inhibition 213
