Age related vascular and renal changes in female rats with metabolic syndrome

Thesis
Submitted for partial fulfillment of the
Doctorate Degree in Physiology

Presented by
Radwa Hassan Ali
Assistant Lecturer of Physiology
Faculty of Medicine – Ain Shams University

Supervised by

Prof. Dr. Nehal Mohamed Bahgat Gamil
Professor of Physiology
Faculty of Medicine – Ain Shams University

Prof. Dr. Amira Metwally Abd-El Rahman
Professor of Physiology
Faculty of Medicine – Ain Shams University

Prof. Dr. Mona Ahmed Ahmed
Professor of Physiology
Faculty of Medicine – Ain Shams University

Prof. Dr. Gehan Khalaf Megahed
Professor of Histology
Faculty of Medicine – Ain Shams University

Dr. Doaa Mohamed Abdel Wahed
Lecturer of Physiology
Faculty of Medicine – Ain Shams University

Faculty of Medicine
Ain Shams University
2017

تأثير العمر علي التغيرات التي تحدث في الأوعية الدموية و الكلي في إناث الفئران اللاتي يعانين من متلازمة الأيض

رسالة مقدمة من

الطبيبة/ رضوى حسن على

مدرس مساعد بقسم الفسيولوجي

كلية الطب- جامعة عين شمس

توطئة للحصول علي درجة الدكتوراه في العلوم الطبية الأساسية (الفسيولوجيا)

تحت إشراف

الأستاذة الدكتورة/ نهال محمد بهجت جميل

أستاذ الفسيولوجيا

كلية الطب- جامعة عين شمس

الأستاذة الدكتورة/ أميرة متولي عبد الرحمن

أستاذ الفسيولوجيا

كلية الطب- جامعة عين شمس

الأستاذة الدكتورة/ مني أحمد أحمد

أستاذ الفسيولوجيا

كلية الطب- جامعة عين شمس

الأستاذة الدكتورة/ جيهان خلف مجاهد

أستاذ الهستولوجي

كلية الطب- جامعة عين شمس

الدكتورة/ دعاء محمد عبد الواحد

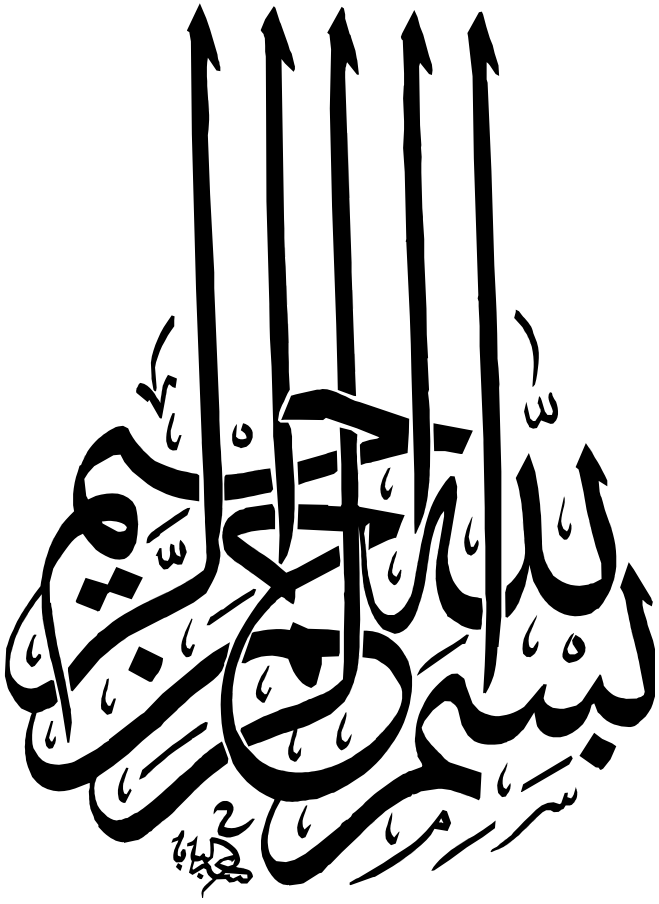
مدرس الفسيولوجيا

كلية الطب- جامعة عين شمس

قسم الفسيولوجي

كلية الطب- جامعة عين شمس

٢٠١٧



بسم الله الرحمن الرحيم

Acknowledgement

First of all, I thank **ALLAH** for blessing this work as a part of his generous help throughout my life.

I would like to express my sincere gratitude and deepest thanks to **Prof. Dr. Nehal Mohamed Bahgat Gamil**, Professor of Physiology, Faculty of Medicine, Ain Shams University, for suggesting and planning this work, and for her meticulous supervision, scientific support and judicious guidance throughout this work.

I would like to express my sincere gratitude and deepest thanks to **Prof. Dr. Amira Metwally Abd-El Rahman** Professor of Physiology, Faculty of Medicine, Ain Shams University, for her meticulous supervision and guidance.

I would like to display my indebtedness to **Prof. Dr. Mona Ahmed Ahmed**, Professor of Physiology, Faculty of Medicine, Ain Shams University, for her wise council, expert guidance, faithful advice, and keen supervision.

I would also like to thank **Prof. Dr. Gehan Khalaf Megahed**, Professor of Histology, Faculty of Medicine, Ain Shams University for her support keen supervision.

I would also like to thank **Dr. Doaa Mohamed Abdel Wahed** for her support keen supervision.

I would like to acknowledge my deepest gratitude and appreciation to **Prof. Dr. Bataa EL-Kafory**, the Head of Physiology Department, Faculty of Medicine, Ain Shams University, for her support and encouragement.

I would like to acknowledge my deepest gratitude and appreciation to **Prof. Dr. Faten Mahmoud Diab**, the former Head of Physiology Department, Faculty of Medicine, Ain Shams University, for her support and encouragement

This work was supported by Ain Shams Faculty of Medicine Grants Office, Grant No. 2106/35

Last but not least, I would like to thank all members of the Physiology Department for their cooperation and support.

TO MY

FAMILY

List of tables

Table no.	Title	Page
1-4	Values of initial and final systolic blood pressure (SBP, mmHg), diastolic blood pressure (DBP, mmHg), and mean arterial blood pressure (MAP, mmHg) in the different groups.	86-89
5	Cumulative values of the initial and final values of systolic blood pressure (SBP, mmHg), diastolic blood pressure (DBP, mmHg) and mean arterial blood pressure (MAP, mmHg) in the different groups.	90
6-11	Intraperitoneal glucose tolerance test (IPGTT) blood glucose levels (mg/dl) and area under the curve (AUC) in young control rat group (YC).	93-98
12	Cumulative values of Intraperitoneal glucose tolerance test (IPGTT) blood glucose levels (mg/dl) and area under the curve (AUC) in the different groups.	99
13-18	Values of initial and final body weight (BW, g), body mass index (BMI, g/cm2) and their percent of change (% change) in in the different groups.	103-108
19	Cumulative values of initial and final body weight (BW, g), body mass index (BMI, g/cm2) and their percent of change (% change) in the different groups	109
20-25	Values of initial and final Lee Index (LI, g/cm) and waist circumference (WC, cm) and their percent of change (% change) in the different groups.	110-115
26	Cumulative values of initial and final Lee Index (LI, g/cm) and waist circumference (WC, cm) and their percent of change (% change) in the different groups	116

Table no.	Title	Page
27-32	Aortic ring responses to potassium chloride (KCl), phenylephrine (PE), and acetylcholine (ACh)	122-127
33	Cumulative results of Aortic ring responses to potassium chloride (KCl), phenylephrine (PE), and acetylcholine (ACh) in different groups	128
34-39	Visceral fat weight (VF, g), visceral fat/ body weight (VF/BW, g/g), liver weight (LW, g), liver weight/body weight (LW/BW, g/g), kidney weight (KW, g) and kidney weight/body weight (KW/BW, g/g) in the different groups.	134-139
40	Cumulative values of visceral fat weight (VF, g), visceral fat/ body weight (VF/BW, g/g), liver weight (LW, g), liver weight/body weight (LW/BW, g/g), kidney weight (KW, g) and kidney weight/body weight (KW/BW, g/g) in different groups	140
41-46	Values of blood glucose level (initial and final) (mg/dl), plasma insulin level (µU/ml) and the homeostasis model assessment of insulin resistance (HOMA-IR) in the different groups.	143-148
47	Cumulative values of blood glucose level (initial and final) (mg/dl), plasma insulin level (µU/ml) and the homeostasis model assessment of insulin resistance (HOMA-IR) in different groups	149
48-53	Values of plasma triglycerides (initial and final) (TG, mg/dl), total cholesterol (TC, mg/dl), high density lipoprotein-cholesterol (HDL-c, mg/dl) and low density lipoprotein-cholesterol (LDL-c, mg/dl) levels and atherogenic index (AI) in young control rat group (YC).	153-158
54	Cumulative values of plasma triglycerides (initial and final) (TG, mg/dl), total cholesterol (TC, mg/dl), high density lipoprotein-cholesterol (HDL-c, mg/dl) and low density-lipoprotein cholesterol (LDL-c, mg/dl) levels and atherogenic index (AI)in the different groups	159

Table no.	Title	Page
55-60	Values of plasma creatinine (mg/dl), C-reactive protein (CRP, mg/l), malondialdehyde (MDA, nmol/ml), total antioxidant capacity (TAC, mM/l) and aortic tissue nitrite (U/gm) levels in the different groups	**163-168**
61	Cumulative values of plasma creatinine (mg/dl), C-reactive protein (CRP, mg/l), malondialdehyde (MDA, nmol/ml), total antioxidant capacity (TAC, mM/l) and aortic tissue nitrite (U/gm) levels in different groups	**169**

List of result figures

Figure no.	Title	Page no.
1	Initial and final systolic and mean blood pressure in the different groups	91
2	Intraprotenial glucose tolerance test blood glucose levels and area under the curve (AUC) in the different groups	103
3	Initial and final body weight and body mass index in the different groups	117
4	Initial and final Lee index and waist circumference in the different groups	118
5	Aortic ring responses to potassium chloride (KCL), phenylephrine (PE) and acetylcholine (Ach)	129
6	Aortic ring response to potassium chloride (KCL), phenylephrine (PE) and acetylcholine (Ach).	130
7	Aortic ring response to potassium chloride (KCL), phenylephrine (PE) and acetylcholine (Ach).	131
8	Aortic ring response to potassium chloride (KCL), phenylephrine (PE) and acetylcholine (Ach).	132
9	Absolute and relative weights of visceral fat, liver and kidney.	141
10	Blood glucose levels (Initial and final), plasma insulin level and the homeostasis model assessment of insulin resistance (HOMA-IR) in the different groups.	150
11	Plasma triglycerides (initial and final) and total cholesterol levels in the different groups.	160
12	Plasma levels of high density lipoprotein-cholesterol (HDL-c), low density lipoprotein-cholesterol (LDL-c) and atherogenic index in the different groups	161
13	Plasma levels of creatinine and C-reactive protein in the different groups	170
14	Plasma levels of malondialdehyde, total antioxidant capacity and aortic tissue nitrite in the different groups	171

Figure no.	Title	Page no.
15	Correlations between HOMA-IR and final systolic blood pressure and mean blood pressure and aortic Nitrite content in rats of different groups.	175
16	Correlations between HOMA-IR and aortic ring responses potassium chloride, phenylephrine and, ACh/KCL%, ACh/PE% in rats of different groups.	176
17	Correlations between HOMA-IR and visceral fat weight/ body weight and final plasma level of triglycerides and high density lipoprotein-cholesterol (HDL-c) in rats of different groups	177
18	Correlations between HOMA-IR and plasma levels of creatinine and C-reactive protein and malondialdehyde and total antioxidant capacity in rats of different groups	178
19	Correlations between aortic nitrite content and the aortic response to potassium chloride (KCL) and phenylephrine in rats of different groups	179
20	Correlation between plasma level of C-reactive protein and plasma creatinine level in rats of different groups.	180
21	Correlations between visceral fat weight / body weight and final systolic blood pressure and mean blood pressure ACh/KCL% and ACh/PE% in rats of different groups	181
22	Correlations between Visceral fat weight / body weight and aortic nitrite content and plasma level of triglycerides and high density lipoprotein-cholesterol (HDL-c) in rats of different groups.	182
23	Correlations between visceral fat weight/body weight and plasma level of creatinine and C-reactive protein and malondialdhyde and total antioxidant capacity in rats of different groups.	183
24	Photomicrograph of descending aorta of the different groups stained with hematoxylin and eosin (X 400)	185
25	Photomicrograph of descending aorta of the different groups stained with Orcein (X 400)	187
26	A photomicrograph of part of descending aorta stained of the different groups with stained Mallory (X 400)	189
27	Photomicrograph of kidney tissue stained with hematoxylin and eosin of different groups (X400)	191
28	Photomicrograph semithine of kidney tissue stained with toluidine blue of different groups (X1000)	193
29	Photomicrograph of liver tissue stained with H&E of different groups (X400)	195
30	Photomicrograph of liver tissue stained with toluidine blue of different groups (X1000)	197

List of Abbreviations

AACE	The American association of Clinical Endocrinology
ACh	Acetylcholine
ADP	Adenosine diphosphate
AHA	American Heart Association
ATP	Adenosine triphosphate
BMI	Body mass index
CDK	Chronic kidney disease
CDV	Cardiovascular diseases
Cr	Creatinine
CRP	C-reactive protein
eGFR	Estimated glumerolar filtration rate
EGIR	European Group for the Study of Insulin Resistance
FFA	Free Fatty Acids
GLUT	Glucose Transporter
HDL-c	High density lipoprotein cholesterol
HOMA-IR	Homeostasis model assessment of insulin resistance

ICAM -1	Intercellular adhesion molecule-1
IDF	International Diabetes Federation
IFG	Impaired fasting glucose
IGT	Impaired glucose tolerance
IL-1	Interleukin-1
IL-6	Interleukin-6
IPGTT	Intraperitoneal glucose tolerance test
IRS-1	insulin receptor substrate 1
KCL	Potassium Cholorid
KS	Kidney stones
LDL-c	Low density lipoprotein cholesterol
MDA	Malondialdehyde
MetS	Metabolic syndrome
NALP3	NACHT, LRR and PYD domains-containing protein 3
NCEP-ATP III	National Cholesterol Education Program of Adult Treatment Panel III
NHANES III	National Health and Nutrition Examination Survey
NHLBI	National Heart, Lung and Blood institution
NO	Nitric oxide

PE	Phenylephrine
PI3K	Phosphatidyl inositide 3-kinases
RAS	Renin Angiotensin Aldosterone System
ROS	Reactive oxygen species
T2DM	Type 2 Diabetes Mellitus
TAC	Total Antioxidant Capacity
TGs	Triglycerides
TNF-α	Toumer Necrosis Factor α
VLDL	Very low density lipoprotein
WHO	World Health Organization
