DYNAMIC MODELING OF MSF DESALINATION PLANTS

By
Mahmoud Samy Ahmed Shousha
B. Sc., M. Sc. Mechanical Engineering

A Thesis Submitted to the
Faculty of Engineering at Cairo University
Mechanical Power Engineering Department
In Partial Fulfillment of the
Requirements for the Degree of
DOCTOR OF PHILOSOPHY
in
MECHANICAL ENGINEERING

Under The Supervision of
Prof. Dr. Abdalla Sayed A. Hanafi
Mechanical Power Engineering Department
Faculty of Engineering, Cairo University

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
September 2001

DYNAMIC MODELING OF MSF DESALINATION PLANTS

By
Mahmoud Samy Ahmed Shousha
B. Sc., M. Sc. Mechanical Engineering

A Thesis Submitted to the
Faculty of Engineering at Cairo University
Mechanical Power Engineering Department
In Partial Fulfillment of the
Requirements for the Degree of
DOCTOR OF PHILOSOPHY
in
MECHANICAL ENGINEERING

Approved by the
Examining Committee:

Prof. Dr. : Abdalla Sayed A. Hanafi

Prof. Dr. : Essam Khalil Hassan Khalil

Prof. Dr. : Essam Hamed Atta

NOMENCLATURE	xvii
ACKNOWLEDGEMENT	xxx
ABSTRACT	xxxi
 CHAPTER 1: INTRODUCTION	 1
1.1 Importance of MSF Desalination Process.....	2
1.2 Development of MSF Plant Size.....	2
1.3 Scope of Present Work.....	4
 CHAPTER 2: REVIEW OF PREVIOUS WORK	 6
2.1 Introduction.....	6
2.1.1 Classification of Models.....	6
2.1.1.1 Mathematical Models.....	7
2.1.1.2 Physical Models.....	7
2.1.1.3 Pilot Plants.....	9
2.2 Review of the Steady State Modeling and Simulation of Multistage Flash (MSF) Distillation Process.....	9
2.3 Review of the Dynamic Modeling and Simulation of Multistage Flash (MSF) Distillation Process.....	29
2.4 Comprehensive Review of the Assumptions that were Considered for the Development of the Steady State and the Dynamic Models..	48
 CHAPTER 3: DYNAMIC MODELING EQUATIONS	 57
3.1 Multistage Flash Desalination Process.....	57

3.2	Multistage Flash (MSF) Process Modeling.....	61
3.2.1	Flash Stage (One of the Middle Stages) Dynamic Model	63
	Equations.....	
3.2.1.1	The Brine Pool (Flashing Brine) Model Equations.	63
3.2.1.2	The Vapor Space Model Equations.....	65
3.2.1.3	The Product Tray Model Equations.....	68
3.2.1.4	The Tube Bundle Model Equations.....	70
3.2.2	The First Heat Recovery Flash Stage Dynamic Model	71
	Equation.....	
3.2.3	The Last Heat Recovery Flash Stage Dynamic Model	73
	Equations.....	
3.2.4	The Last Heat Reject Flash Stage Dynamic Model	74
	Equations.....	
3.2.5	The Model Equations of the Mixers and Splitters.....	75
3.2.5.1	The Makeup Seawater - Brine Recycle Mixer.....	75
3.2.5.2	The Brine Recycle - Brine Blow Down Splitter.....	76
3.2.5.3	The Reject Seawater – Makeup Splitter.....	77
3.2.5.4	The Reject Seawater – Recycle Seawater Splitter...	78
3.2.5.5	The Recycle Seawater – Seawater mixer.....	79
3.2.6	Calculation of the Rate of Heat Transfer to Cooling Brine	
	Inside the Tube Bundle.....	79
3.2.6.1	Total Rate of Heat Transfer.....	80
3.2.6.2	Evaluation of the Tube Bundle Overall Heat	
	Transfer Coefficient	82
3.2.6.2.1	The Vapor Side Heat Transfer	
	Coefficient.....	83
3.2.6.2.2	The Cooling Brine Side Heat Transfer	
	Coefficient.....	85
3.2.6.2.3	The Tube Fouling Layer Heat Transfer	
	Resistance.....	87
3.2.7	The Vapor in the Flash Chamber Above the Brine Pool and	

Flashing Brine Pool Temperature Correlations.....	90
3.2.8 The Pressures and Temperatures Formulas and Correlations Upstream and Downstream of The Demisters.....	93
3.2.8.1 The Pressure and Temperature Relations Upstream and Downstream the Demister.....	93
3.2.8.2 The Pressure Drop Due to the Vapor Flow Through the Wire Mesh of the Demisters.....	95
3.2.9 Mass Holdups Calculations of the Brine Pool, Cooling Water Inside the Tube Bundle, Distillate in the Distillate Channel and The Mixture of Gases in the Vapor Space.....	96
3.2.9.1 Mass Holdup of the Brine Pool.....	96
3.2.9.2 Mass Holdup of the Cooling Water Inside the Tube Bundle.....	97
3.2.9.3 Mass Holdup of the Distillate in the Distillate Channel.....	97
3.2.9.4 Mass Holdup of the Mixture of Gases in the Vapor Space.....	98
3.2.10 Calculation of the Vapor and Liquids Mass Flow Rates to, from and inside the Flash Stages.....	102
3.2.10.1 Calculation of the Vapor Release Flow Rate of the Brine and the Product Vapors.....	102
3.2.10.2 Calculation of the Enter-Stage brine, Distillate, Condensate and the Cooling Water Inside the Tube Bundle Flow Rates.....	104
3.2.11 The Brine Heater Dynamic Model Equations.....	107
3.2.11.1 The Shell and Sump Model Equations.....	107
3.2.11.2 The Brine Heater Tube Side Model Equations.....	109
3.2.11.3 The Brine Heater Mass Holdups Model Equations.....	109
3.2.11.4 Calculation of the Rate of Heat Transfer to the Cooling Brine Inside the Brine Heater Tube Bundle.....	111
3.2.11.5 Calculation of the Condensate Flow Rate.....	112

3.2.11.6	The Pressure and Temperature Relations in the Brine Heater.....	113
CHAPTER 4: SOLUTION OF THE DYNAMIC MODEL EQUATIONS.		114
4.1	Introduction to the Solution Technique.....	114
4.2	Solution of the Dynamic Model Equations.....	115
4.2.1	Development of an Algorithm to Solve the Model Equations	116
4.2.2	The Methodology Utilized to Solve the Mass, Salt and Heat Balance Equations Simultaneously.....	117
CHAPTER 5: APPLICATION OF THE DEVELOPED DYNAMIC MODEL ON A TYPICAL PLANT.....		125
5.1	Introduction.....	125
5.2	Description of the Typical Plant.....	125
5.2.1	Evaporator Vessel.....	126
5.2.2	Brine Heater.....	128
5.2.3	Deaerator.....	129
5.3	The Steady State Heat and Mass Balance of the Typical Plant.....	133
CHAPTER 6: RESULTS AND DISCUSSIONS.....		138
6.1	Introduction.....	138
6.2	Effect of Seawater Inlet Temperature Disturbance.....	139
6.3	Effect of Seawater Inlet Mass Flow Rate Disturbance.....	144
6.4	Effect of Steam Pressure to Brine Heater Disturbance.....	149
6.5	Comparison with Previous Work.....	154
CHAPTER 7: SUMMARY AND CONCLUSIONS.....		210
7.1	Summary.....	210
7.2	Conclusions.....	210
7.3	Recommendations for Future Work.....	212

REFERENCES.....	213
