**STUDIES ON SOME FUNGAL DISEASES
INFECTING ONION CROP IN EGYPT**

BY

Sawsan Mossad El-Sayed El-Abd

**A thesis submitted in partial fulfillment of the requirements
governing the award of the degree of**

**DOCTOR OF PHILOSOPHY OF AGRICULTURAL SCIENCES
(PLANT PATHOLOGY)**

Department of Agricultural Botany

From

Alexandria University

2002

Alexandria University
Faculty of Agric. (Saba-Bacha)

STUDIES ON SOME FUNGAL DISEASES INFECTING ONION CROP IN EGYPT

Presented by

SAWSAN MOSAAD EL-SAYED EL-ABD

For the degree of

**DOCTOR OF PHILOSOPHY IN AGRICULTURAL SCIENCES
(PLANT PATHOLOGY)**

Department of Agricultural Botany

Examiner's Committee:

Prof. Dr. Ibrahim Abdel-Salam El-Samra

Prof. of Plant Pathology, Fac. of Agric., Saba-Bacha, Alexandria University and Vice President of Alexandria University, Damanhour Branch

Approved

I. A. El-Samra

Prof. Dr. Farid Farid Abdel-Rahman Mehia

Prof. of Plant Pathology, Fac. of Agric., Kafr El-Sheikh, Tanta University

F. Mehia

Prof. Dr. Saad Mahmoud Mohamed Shama

Prof. of Plant Pathology, Fac. of Agric. Saba-Bacha, Alex. Univ.

Saad.

SUPERVISION'S COMMITTEE

Prof. Dr. Ibrahim Abdel-Salam El-Samra

**Professor of Plant Pathology and Vice President of Alexandria
University, Damanhour Branch**

Dr. Mostafa Abd-El-Azeem Abou-El-Soud Amer

**Lecturer of Plant Pathology
Faculty of Agriculture, Saba-Bacha, Alex. University.**

CONTENTS

	<u>Page No</u>
Chapter 1. INTRODUCTION	1
Chapter 2. REVIEW OF LITERATURE	3
Chapter 3. MATERIALS AND METHODS	49
3.1. Survey of onion diseases and their causal organisms.....	49
Sources of samples.....	49
3.2. Isolation of the causal organisms.....	49
3.2.1. Identification of the causal organisms.....	50
3.3. Pathogenicity tests.....	50
3.4. Effect of storage on the development of neck rot, white rot and black rot diseases.....	51
3.5. Biochemical changes associated with rots of onion bulbs..	52
3.5.1. Determination of sugars.....	53
3.5.2. Determination of phenolic compounds	54
3.5.3. Sulfur dioxide Extraction.....	54
3.5.3.1. Colour determination.....	55
3.5.4. Determination of total soluble solid (TSS)	55
3.5.5. Determination of vitamin C content.....	55
3.5.5.1. Vitamin C dye preparation	55
3.5.5.2. Oxalic acid preparation	55
3.5.5.3. Ascorbic acid standard solution preparation	55
3.5.5.4. Vitamin C determination	56
3.5.6. Bulb juice acidity	56
3.6. Growth regulators on foliar and post-harvest disease of onion	56
3.6.1. The effect of growth regulators on the linear growth, sporulation and sclerotia of <i>Botrytis allii</i> , <i>Sclerotium</i> <i>cepivorum</i> and <i>Aspergillus niger</i>	57
3.7. Chemical and biological control	58
3.7.1. Chemical control	58
3.7.1.1. <i>In vitro</i> experiment	58
3.7.1.1.1. Effect of different fungicides on the fungal growth.....	58
3.7.1.2. <i>In vivo</i> experiment	58
3.7.1.2.1. Seed treatment	58
3.7.1.2.2. Transplants treatment	60

3.7.1.2.3.	Effect of dusting with fungicides on controlling neck rot black mould and white rot onion bulb diseases.	60
3.7.2.	Biological control.....	61
3.7.2.1.	<i>In vitro</i> treatments	61
3.7.2.1.1.	Fungal isolate preparation.....	61
3.7.2.1.2.	Antagonistic action	62
3.7.2.2.	<i>In vivo</i> treatments	62
3.7.2.2.1.	Seed treatment	62
3.7.2.2.1.1.	Antagonistic agents preparation	63
A.	<i>Trichoderma harzianum</i> inoculum preparation	63
B.	Plant guard preparation	63
C.	Rizo-N preparation	63
3.7.2.2.1.2.	Soil and pots preparation	63
3.7.2.2.1.3.	Treatments	63
3.7.2.2.2.	Transplants treatment	64
3.8.	Histopathological studies on onion bulbs infected with the tested fungi.....	65
Chapter 4.	RESULTS AND DISCUSSION	69
4.1.	Survey investigations.....	69
4.2.a.	Isolation tests.....	71
4.2.b.	Identification of the causal organisms.....	73
4.3.	Pathogenicity tests.....	73
4.4.	Influence of storage temperatures and storage periods on disease index (DI) and infection percentages in bulb rot diseases.....	79
4.5.	Changes in phenolic compounds content in onion bulbs inoculated with rot agents under different storage conditions.....	87
4.5.1.	Effect of storage temperature	87
4.5.2.	Effect of storage period	91
4.6.	Change in sugars content in onion bulbs inoculated with rot agents under different storage condition.....	94
4.6.1.	Effect of storage temperature.....	94
4.6.2.	Effect of storage periods.....	96
4.7.	Effect of storage temperature and prolongation of storage periods on sulfur dioxide content in onion bulbs inoculated with different bulb rot fungal agents.....	99
4.7.1.	Effect of storage temperature	99
4.7.2.	Effect of storage periods.....	101

4.8.	Effect of storage temperature and storage periods on the weight of healthy and inoculated onion bulbs.	103
4.9.	Growth regulators in relation to onion diseases	106
4.9.1.	Effect of growth regulators on growth, sporulation and sclerotial formation of some onion bulb rot fungal pathogens	106
4.9.1.1.	Linear growth determinations.....	107
4.9.1.2.	Sporulation and sclerotial formation.....	109
4.9.2.	Effect of growth regulators on the incidence and development of onion diseases.	110
4.9.2.1.	In fields.....	110
4.9.2.2.	In stores.....	113
4.9.2.2.1.	Effect of treatment on % natural infection.....	113
4.9.2.2.2.	Effect of treatment on the incidence and development of infection in artificially inoculated bulbs.....	115
4.9.2.2.3.	Effect of treatment on sprouting.....	115
4.9.3.	Effect of treatment with growth regulators on the content of some chemical compounds of onion bulb.....	116
4.9.3.1.	Sugar content.....	117
4.9.3.2.	Phenol content.....	119
4.9.3.3.	Sulfur dioxide, vitamin C, total soluble solid % (T.S.S.) and titratable acidity.	122
4.10.	Chemical control of onion bulb rot diseases.....	125
4.10.1.	In vitro experiment.....	125
4.10.2.	In vivo experiments.....	128
4.10.2.1.	Effect of seed treatment pre and post-emergence damping-off.....	128
4.10.2.2.	Effect of onion transplants treatment with fungicides by dipping method on infection % with bulb rot diseases....	130
4.10.2.3.	Effect of bulb dusting with fungicides on controlling rot diseases during storage.....	133
4.11.	Biological control of onion bulb rot agents.....	136
4.11.1.	Effect of <i>T. harzianum</i> on growth, sporulation and sclerotia formation of onion bulb fungal rot agents.....	136
4.11.2.	Effect of biological control agents on controlling onion damping-off and bulb rot diseases in vivo.	140
4.11.2.1.	Damping-off.....	140
4.11.2.2.	Bulb rots.....	142
4.12.	Histopathological studies.....	146
4.12.1.	<i>F. oxysporum</i> f.sp. <i>cepae</i>	146

4.12.2.	<i>B. allii</i>	147
4.12.3.	<i>S. cepivorum</i>	152
4.12.4.	<i>A. niger</i>	152
Chapter 5: REFERENCES		158
Chapter 6: SUMMARY.....		187
ARABIC SUMMARY.....		

ACKNOWLEDGMENTS

The participation and contribution of individuals and institution towards the completion of this thesis is gratefully acknowledged.

Certainly, first and foremost, I am particularly grateful and indebted to my promoter, **Prof. Dr. Ibrahim A. El-Samra**, Professor of Plant Pathology and Vice President of Alexandria University, Damanhour Branch, for his keen interest in my study. His wise guidance, assistance and constant encouragement throughout the research and preparation of the manuscript have made this thesis possible.

My deep appreciation is expressed to my co-promoter **Dr. Mostafa A. A. Amer**, for his encouragement, guidance and valuable suggestions and helpful discussions, his kindly supervision especially his continued assistance in writing, revision and preparing the final manuscript of this thesis.

My special thanks also, due to Prof. Dr. Saad Mahmoud Shama Professor of Plant Pathology, Faculty of Agriculture, Saba-Bacha, Alex. University. I'm greatly indebted to him for his valuable, helpful advises and encouragement.

My appreciation is extended to Dr. M. El-Farnawany and Dr. H. Yonis, Agricultural Botany Department, Faculty of Agriculture, Saba-Bacha, Alex. University, for their great help, giving valuable solutions for my problems during this study.

My thanks are extended to all my friends and all the member of Agricultural Botany Department, Faculty of Agriculture, Saba-Bacha, Alex. University,

Last, but certainly not least, I wish to express my heartfelt thanks to my beloved husband, Ibrahim, my lovely children Adel, Omnia and Amira, for their moral sacrifice and their understanding and for sharing my many burdens in life.

Sawsan Mosaad El-Sayed El-Abd
