*Molecular markers and histopathological effects of some
fish parasites, in Egypt.*

A Thesis submitted

*In partial fulfillment for the requirement of the degree of
Master of Science (M. Sc) In Zoology*

By

Mona Ahmed Mohamed Soliman Farah

Supervisors

Prof. Dr.

Eglal A. Koura

Prof. of Protozoology &

Parasitology

Zoology Department

Girl's College for Arts, Science &

Education

Ain-Shams University

Prof. Dr.

Mohamed A. Rashed

Prof. of Genetics

Genetics Department

Faculty of Agriculture

APPROVAL SHEET

Name : Mona Ahmed Mohamed Soliman Farah

*Title : Molecular markers and histopathological
effects of some fish parasites, in Egypt.*

Scientific Degree : M.Sc. In Zoology

Supervisors

*Prof. Dr.
Eglal A. Koura
Prof. of Protozoology &
Parasitology
Zoology Department
Girl's College for Arts, Science &
Education
Ain-Shams University*

*Prof. Dr.
Mohamed A. Rashed
Prof. of Genetics
Genetics Department
Faculty of Agriculture
Ain-Shams University*

*Dr.
Hanan M. Ismail
Lecturer, Zoology Department,
Girl's College for Arts, Science & Education,
Ain Shams University*

QUALIFICATION

Name : *Mona Ahmed Mohamed Soliman*

Farah

Scientific Degree : *B.Sc.*

Department : *Zoology.*

College : *Girl's College for Arts, Science
and Education.*

University : *Ain Shams University.*

Graduation Year : *2007.*

ACKNOWLEDGMENT

All praise and thanks to Almighty **ALLAH**, Most Gracious; Most Merciful, for the immense mercy, which have resulted in accomplishing this research. May peace and blessings be upon **Prophet Mohammad** (PBUH), his family and his companions. I would like to express my deep thanks and sincere gratitude to my supervisor

Prof. Dr. Eglal A. Koura, Prof. of Protozoology & Parasitology, Zoology Department, Girl's College for Arts, Science & Education Ain-Shams University for her great efforts, suggesting the topic and planning the scheme of the present study, fruitful guidance, enrichment my background, enlightening me with her vast experience during the course of this work and for the refinement of the thesis. Her valuable help during the course of this study is greatly appreciated. I pray to almighty (**ALLAH**) to reward her in this life and the hereafter as well as May **ALLAH** assist me to do her some of the favours she did me.

I wish to express my great thanks and deep appreciation to **Prof. Dr. Mohamed A. Rashed**, Prof. of Genetics, Genetics Department, Faculty of Agriculture, Ain-Shams University for getting me involved with this subject, suggesting the topic and planning the scheme of the present study and for his guidance over the years of work. His constant encouragement made a huge difference in my work and enormously expanded the dimensions of the thesis.

Thanks to **Dr. Hanan M. Ismail**, Lecturer of Zoology, Zoology Department, Girl's College for Arts, Science & Education, Ain Shams University for her helpful guiding discussions and continuous support.

Also, I am so grateful to **Prof. Dr. Shadia M. Kadry** the Head of Zoology Department, Girl's College for Arts, Science & Education, Ain Shams University , to all staff members in the Department and to everybody who supported me with any kind of help and my sincere thanks to my friends for their efforts in helping me to finish this work .

There is no words are sufficient to express my gratitude thanks to my late **father**, my dear **mother**, my **husband**, and **all members of my family** for their continuous help, support and encouragement extended to me during the progress of this work.

TABLE OF CONTENTS

Title	Page
LIST OF TABLES	V
LIST OF FIGURES	VII
LIST OF PLATES	IX
ABSTRACT	XIII
CHAPTER I: INTRODUCTION	1
GOAL OF RESEARCH	6
CHAPTER II: REVIEW OF LITERATURE	7
1. Helminthology	7
A. GENUS: <i>Orientocreadium</i> Tubangui, 1931	7
B. GENUS: <i>Eumaseia</i> Mohamed, 1978	13
C. GENUS: <i>Astiotrema</i> Khalil, 1959	16
D. GENUS: <i>Polyonchobothrium</i> Woodland, 1925	22
E. GENUS: <i>Procamallanus</i> (Wedle, 1862) Baylis, 1923	25
2. Molecular studies	29
A. Protein electrophoretic studies	29
B. Isozymes electrophoretic studies	31
CHAPTER III: MATERIALS AND METHODS	38
A. Helminthology	38
1. Localities of examined fishes	38
1. Fish identification	38
2. Examination of fish and collection of parasite	41
3. Relaxation of helminth parasites	41
4. Fixation	42
5. Staining	42
6. Differentiation	43
7. Dehydration	43

8. Clearing	43
9. Mounting	43
10. Drawing and measurements	44
Electron Microscopy Methods	44
i. Scanning Electron Microscopy (SEM)	44
ii. Transmission electron microscopy (TEM)	44
B. Histology	45
1. Preparation of fish tissue	45
2. Fixation	45
3. Tissue dehydration	45
4. Clearing	46
5. Embedding	46
6. Sectioning	46
7. Staining	46
C. Molecular study	46
A. SDS-Protein analysis	46
i. Protein extraction	46
ii. Protein stock solutions and electrophoresis	47
a) Gel buffers	47
• Resolving gel buffer	47
• Stacking gel buffer	47
• Acrylamide stock solution (30 %)	48
• Ammonium per-sulfate stock solution	48
• Sodium dodecyl sulfate stock solution	48
• Electrode buffer (Running buffer)	49
• Staining solution	49
• Destaining solution	49
b) Sample buffers	49
• Laemmli's buffer or SDS sample buffer (2X):	49
c) Gel preparation	50
d) Sample application	51
e) Electrophoresis conditions	51
f) Staining and destaining operation	51
B. Isozymes electrophoresis	52
i. Extraction of Isozymes	52
• Extraction buffer	52
ii. Isozymes stock solutions and electrophoresis	52

a) Gel buffers	52
• 30% acrylamide stock	53
• Gel buffer	53
• Electrode buffer (Running buffer)	53
• Ammonium per sulfate stock solution	53
b) Gel Preparation	54
c) Application of Samples	54
d) Electrophoresis Conditions	54
e) Enzymes Assay	54
f) Gel fixation	55
CHAPTER IV: RESULTS	56
I. Helminthology	56
General survey	56
Helminthological results	57
A. Trematoda	57
i. <i>Orientocreadium batrachoides</i>	57
• Histopathological effect of parasite	59
1- SEM results	59
2- TEM results	60
ii. <i>Eumaseinia aegyptiacus</i>	62
iii. <i>Astiotrema sudanensis</i>	65
B. Cestoda	68
• <i>Polyonchobothrium clarias</i>	68
C. Nematoda	70
• <i>Procamallanus laeviconchus</i>	70
II. Molecular Biology	104
A. SDS-PAGE	104
B. Native-PAGE Isozyme:	107
1. α -Estrase isozyme	107
2. Alcohol dehydrogenase (ADH)	108
3. Malate dehydrogenase (Mdh)	109
CHAPTER V: DISCUSSION	110
1. Helminthological discussion	110
A. Trematoda	110
i. <i>Orientocreadium batrachoides</i>	110

TABLE OF CONTENTS

• Histopathological effect of parasite	111
ii. <i>Eumaseinia aegyptiacus</i>	112
iii. <i>Astiotrema sudanensis</i>	113
B. Cestoda	114
• <i>Polyonchobothrium clarias</i>	114
C. Nematoda	115
• <i>Procamallanus laeviconchus</i>	115
2. Molecular discussion	115
 CHAPTER VI: SUMMARY AND CONCLUSIONS	 119
 CHAPTER VII: REFERENCES	 121
 CHAPTER VIII: ARABIC SUMMARY	 1

LIST OF TABLES

Table No.	Title	Page No.
Table (1)	Composition of a 12 % of resolving gel.	50
Table (2)	Prevalence of helminthes in different fish examined.	57
Table (3)	Comparison of the measurements (mm) of <i>Orientocreadium batrachoides</i> Tubangui, 1931 for the present study and other description of the same species.	61
Table (4)	Comparison of the measurements (mm) of <i>Eumaseenia aegyptiacus</i> Mohamed, 1978 for the present study and other description of the same species.	64
Table (5)	Comparison of the measurements (mm) of <i>Astiotrema sudanensis</i> Khalil, 1959 for the present study and other description of the same species.	67
Table (6)	Comparison of the measurements (mm) of <i>Polygonchobothrium clarias</i> Woodland, 1925 for the present study and other description of the same species.	69
Table (7)	Comparison of the measurements (mm) of <i>Procamallanus laeviconchus</i> (Wedle, 1862), Baylis, 1923 for the present study and other description of the same species.	71
Table (8)	SDS-PAGE binary data obtained from <i>Clarias lazera</i> fish normal and infected with different groups of parasites.	105
Table (9)	α -Estrase isozyme binary data obtained from muscle of <i>Clarias lazera</i> fish healthy and infected with different groups of parasites.	107
Table (10)	Alcohol dehydrogenase (Adh) isozyme binary data obtained from muscle of <i>Clarias lazera</i> fish healthy and infected with different groups of parasites.	108
Table (11)	Malate dehydrogenase (Mdh) isozyme binary data obtained from muscle of <i>Clarias lazera</i> fish healthy and infected with different groups of parasites.	109

LIST OF PLATES

Plate No.	Title	Page No.
Plate (1)	Light micrographs of adult <i>Orientocreadium batrachoides</i> Tubangui, 1931 infecting the catfish <i>Claris lazera</i> (Cuvier & Valenciennes 1840).	73
Plate (2)	Photomicrographs of histological sections (Hx & E) of the gut of the catfish <i>Claris lazera</i> (C. & V. 1840) infected with <i>O. batrachoides</i> Tubangui, 1931.	74
Plate (3)	Photomicrographs of histological sections (Hx & E) of the gut of the catfish <i>Claris lazera</i> (C. & V. 1840) infected with <i>O. batrachoides</i> Tubangui, 1931.	75
Plate (4)	Photomicrographs of histological sections (Hx & E) of the gut of the catfish <i>Claris lazera</i> (C. & V. 1840) infected with <i>O. batrachoides</i> Tubangui, 1931.	76
Plate (5)	Photomicrographs of histological section (Hx & E) of the gut of the catfish <i>Claris lazera</i> (C. & V. 1840) infected with <i>O. batrachoides</i> Tubangui, 1931 and Light micrographs of semithin section of <i>O. batrachoides</i> Tubangui, 1931 (x:200) passing through the two intestinal caeca (Ic) and the ovary (Ov).	77
Plate (6)	Scanning electron micrographs of <i>Orientocreadium batrachoides</i> Tubangui, 1931 infecting the gut of catfish <i>Claris lazera</i> (C. & V. 1840).	78
Plate (7)	Scanning electron micrographs of <i>Orientocreadium batrachoides</i> Tubangui, 1931 infecting the gut of catfish <i>Clarias lazera</i> (C. & V. 1840)	79
Plate (8)	Scanning electron micrographs of <i>Orientocreadium batrachoides</i> Tubangui, 1931 infecting the gut of catfish <i>Clarias lazera</i> (C. & V. 1840).	80
Plate (9)	Light micrographs of semithin section of <i>O. batrachoides</i> Tubangui, 1931 showing the layers of the body wall (Bw) in different parts of its body.	81
Plate (10)	Light micrographs of semithin sections of <i>O. batrachoides</i> Tubangui, 1931 showing the ventral sucker.	82

Plate (11)	Transmission electron micrographs (TEM) of the body wall of <i>O. batrachoides</i> Tubangui, 1931.	83
Plate (12)	Transmission electron micrographs of the body wall of <i>O. batrachoides</i> Tubangui, 1931.	84
Plate (13)	Light micrographs of semithin sections of <i>O. batrachoides</i> Tubangui, 1931.	85
Plate (14)	Light micrograph of semithin section of <i>O. batrachoides</i> Tubangui, 1931 showing a part of cirrus pouch , X400 and TEM of the cirrus pouch	86
Plate (15)	Transmission electron micrographs (TEM) of <i>O. batrachoides</i> Tubangui, 1931 showing The ventral sucker (Vs) and a part of genital atrium (Ga).	87
Plate (16)	Light micrographs of semithin section of <i>O. batrachoides</i> Tubangui, 1931 showing the ovary (Ov), X1000 and Transmission electron micrographs (TEM) of <i>O. batrachoides</i> Tubangui, 1931 passing through the ovary (Ov).	88
Plate (17)	Light micrograph of semithin section of <i>O. batrachoides</i> Tubangui, 1931 showing the vitelline gland (Vg) and TEM of the vitelline gland (Vg).	89
Plate (18)	Transmission electron micrographs (TEM) of <i>O. batrachoides</i> Tubangui, 1931 showing vitelline glands at different magnifications.	90
Plate (19)	Transmission electron micrographs of the testes of <i>O. batrachoides</i> Tubangui, 1931.	91
Plate (20)	Light micrographs of semithin section of <i>O. batrachoides</i> Tubangui, 1931 passing through the intestinal caeca (Ic), X1000 and Transmission electron micrographs of <i>O. batrachoides</i> Tubangui, 1931 passing through the intestinal caeca.	92
Plate (21)	Transmission electron micrographs (TEM) of <i>O. batrachoides</i> Tubangui, 1931 passing through the intestinal caeca (Ic).	93
Plate (22)	Light micrographs of adult <i>Eumaseia aegyptiacus</i> (Mohamed, 1978) infecting the gut of catfish <i>Clarias lazera</i> (Cuvier & Valenciennes 1840).	95

Plate (23)	Light micrographs of adult <i>Astiotrema sudanensis</i> (Khalil, 1959) infecting the gut of Bolti Akhdar <i>Tilapia zillii</i> .	97
Plate (24)	Scanning electron micrographs of <i>Astiotrema sudanensis</i> (Khalil, 1959) infecting the gut of Bolti Akhdar <i>Tilapia zillii</i> .	98
Plate (25)	Light micrographs of Scolex of <i>Polyonchobothrium clarias</i> (Woodland, 1925) infecting the gut of cat-fish <i>Clarias lazera</i> (Cuvier & Valenciennes 1840).	100
Plate (26)	Light micrographs of adult <i>Polyonchobothrium clarias</i> (Woodland, 1925) infecting the gut of cat-fish <i>Clarias lazera</i> (Cuvier & Valenciennes 1840).	101
Plate (27)	Light micrographs of the nematode <i>Procamallanus laevisconchus</i> (Wedle, 1862) Baylis, 1923 infecting the gut of cat-fish <i>Clarias lazera</i> (Cuvier & Valenciennes 1840).	103
