س.س.س

Laparoscopic Vertical banded gastroplasty versus laparoscopic adjustable gastric banding for the treatment of morbid obesity

Thesis

Submitted in partial fulfillment of the MD degree in general surgery

By

Tamer Mohamad El-Gaabary

MB & Bch, Msc, General Surgery

Supervised by

Prof. Dr. Adel Ahmed Hosny

Professor of General Surgery
Faculty of Medicine
Cairo University

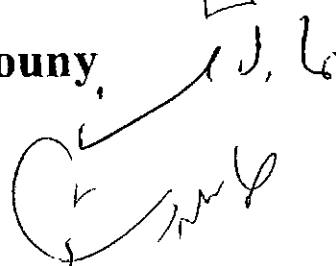

Prof. Dr. Faheem Ali El-Basiouny

Professor of General Surgery
Faculty of Medicine
Cairo University

Dr. Muhammad Said El-Marzouky

Lecturer of General Surgery
Faculty of Medicine
Cairo University

Faculty of Medicine – Cairo University
2011

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial matters. The text outlines various methods for organizing and storing data, including digital databases and physical filing systems.

2. The second section focuses on the role of communication in project management. It highlights the need for clear, concise, and timely communication among all team members. The document provides guidelines for effective communication, such as using appropriate channels, setting expectations, and providing regular updates. It also discusses the importance of active listening and feedback in fostering a collaborative environment.

3. The third part of the document addresses the challenges of resource allocation and management. It explains how to identify and prioritize tasks, allocate resources efficiently, and monitor progress. The text offers strategies for dealing with resource constraints, such as delegating responsibilities, seeking external support, and adjusting plans as needed. It also emphasizes the importance of maintaining a flexible and adaptable approach to resource management.

4. The final section discusses the importance of risk management in project planning and execution. It defines risk as any event or condition that could negatively impact the project's objectives. The document outlines a systematic approach to risk management, including identifying potential risks, assessing their likelihood and impact, and developing mitigation strategies. It also stresses the importance of regular risk assessments and communication throughout the project lifecycle.

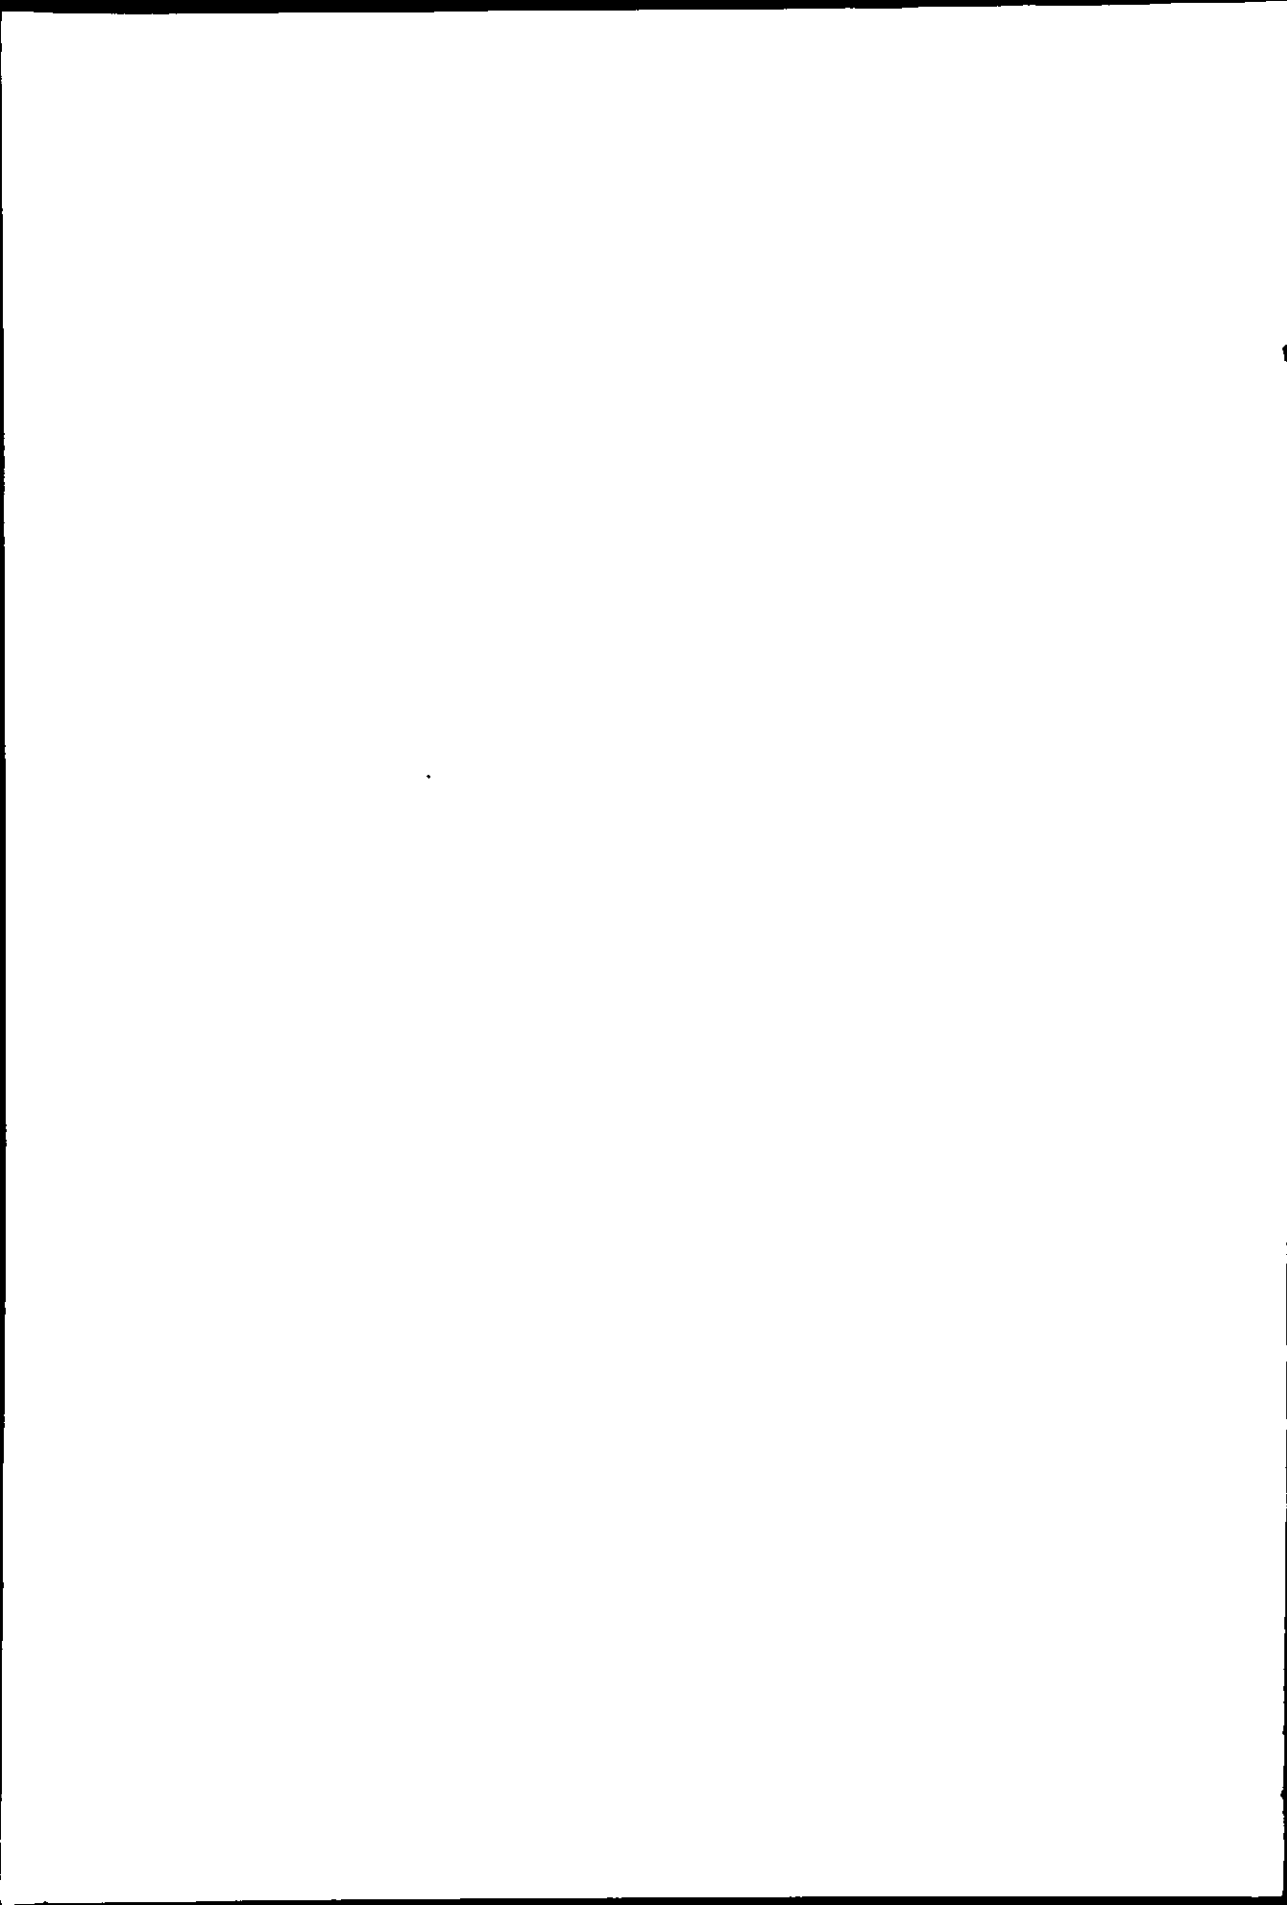

Acknowledgments

First of all, I would like to thank God for His grace and mercy, and for giving me the effort to complete this work.

I would like to express my deepest gratitude and greatest respect to Prof. Dr. Adel Ahmad Hosny, Professor of General Surgery, Faculty of Medicine, Cairo University, who spent much of his valuable time in meticulously revising this thesis and for his creativity in initiating and completing this work.

I am deeply indebted to Prof. Dr. Faheem Ali Elbasiouny, Professor of General Surgery, Faculty of Medicine, Cairo University, under whose supervision I had the honor to proceed with this work; his unlimited generosity in time and effort made this work possible.

Cordial thanks to Dr. Muhammad Said Elmarzouky, Lecturer of General Surgery, Faculty of Medicine, Cairo University, for his great help, assistance and directions throughout the period of this work.

List of Figures

Figure No.	Title	Page
1	Normal afferent signals. Controlling the mechanism of food intake and digestion.	8
2	Hypothesis of diabetes resolution after RYGB.	14
3	Laparoscopic vertical banded gastroplasty.	54
4	Laparoscopic adjustable gastric banding.	55
5	Sleeve gastrectomy.	58
6	Biliopancreatic diversion.	59
7	BPD with duodenal switch.	60
8	Roux-en -Y gastric hypass.	61
9	Clinical pathway.	65
10	Surgical techniques of LAGB.	68
11	Patient position.	95
12	Trocar position.	96
13	Retarction of the liver.	102
14	Creating the vertical gastric pouch.	102
15	Test for the patency of the staple line.	103
16	Placing the drain near the staple line.	103
17	Introducing the banding device	103
18	General view of LAGB .	103

List of Tables

Table No.	Title	Page
1	Afferent signals controlling the mechanism of food intake and digestion	5
2	Efferent signals controlling the mechanism of food intake and digestion.	5
3	Morbidity of severe obesity .	27
4	Obesity comorbidity from the top of the head to the tip of the toes.	33
5	Decrease in obesity comorbidity after weight-loss surgery.	37
6	Mean sex of both groups.	107
7	Mean age of both groups.	107
8	Mean pre-operative weight and BMI.	107
9	Mean operative time.	108
10	Mean length of post-operative hospital stay.	108
11	Mean post-operative weight loss at 1,3,6,12 months.	108
12	Mean post-operative BMI at 6 and 12 months.	109
13	The percentage of EWL at 6 and 12 months.	109

List of Abbreviations

BMI	Body Mass Index.
BPD	Biliopacreatic Diversion .
CCK	Cholecystokinin.
CPAP	Continuous Positive Airway Pressure.
CSF	Cerebro Spinal Fluid.
DVT	Deep Venous Thrombosis.
GIP	Glucose-Dependent Insulinotropic peptide.
GLP-1	Glucagon Like Peptide.
GERD	Gastro- Esophageal Reflux Disease.
HDL	High Density Lipoprotein.
IAP	Intra Abdominal Pressure.
ICP	Intra Cranial Pressure.
IL	Interleukin.
IRS	Insulin Receptor.
JNK	Jun N- terminal Kinase.
JGA	Juxta – Glomerular Apparatus.
LAGB	Laparoscopic Adjustable Gastric Banding.
LDL	Low Density Lipoprotein.
MR	Melanocortin Receptors.
NALD	Non Alcoholic Liver Disease.
NASH	Non Alcoholic Steato-hepatitis.
NPYS	Neuropeptides.
OHS	Obesity Hypoventillation Syndrome.
OXM	Oxytomodulin.
PPS	Pancreatic Polypeptides.
PPY	Peptide Tyrosine-Tyrosine.
RDI	Respirator Disturbance Index.

REM	Rapid Eye Movement Sleep.
SAS	Sleep Apnea Syndrome.
SAGB	Swedish Adjustable Gastric Band.
SOS	Swedish Obesity Study.
TNF	Tumour Necrosis Factor.
VBG	Vertical Banded Gastroplasty.
WLS	Weight Loss Surgery.
