

# Distribution Pattern of Natural Radionuclides in NorthEast

Libya Using Different Nuclear Techniques.

## ***Thesis***

Submitted to Faculty of Science, Ain Shams University, in  
Fulfillment of the Requirements of the Doctorate of  
Philosophy Degree in Nuclear Physics

By

***Areej Ibrahim Omar Hazawi***

Assistant Lecturer, Faculty of Science, Omar Al Muktar  
University, Al Bayda, Libya

***(2009)***

## ***Supervised by***

***Prof. Dr. Samir Y. El-Khamisy***

Physics Department, *Faculty of  
Science, Ain Shams University.*

***Prof. Dr. Nabil A. El-Faramawy***

Physics Department, *Faculty of  
Science, Ain Shams University*

***Prof. Dr. Soad A. El-Fiki***

Physics Department, *Faculty of  
Science, Ain Shams University.*

***Dr. Elsayed Salama Ahmed***

Physics Department, *Faculty of  
Science, Ain Shams University.*

***(2015)***

## **APPROVAL SHEET**

**Name :** Areej Ibrahim Omar Hazawi.

**Title:** Distribution pattern of natural radionuclides in northeast Libya using different nuclear techniques.

**Supervisors:**

**Prof. Dr. Samir Y. El-Khamisy**

Prof. of Nuclear, Physics Department, Faculty of Science,  
Ain Shams University.

**Prof. Dr. Soad A. El-Fiki**

Prof. of Nuclear, Physics Department, Faculty of Science,  
Ain Shams University.

**Prof. Dr. Nabil A. El-Faramawy**

Prof. of Nuclear, Physics Department, Faculty of Science,  
Ain Shams University.

**Dr. El-sayed Salama Ahmed**

Dr. of Nuclear, Physics Department, Faculty of Science,  
Ain Shams University.

### **Acknowledgement**

All gratitude is due to ALLAH the most merciful, who guided and gave me strength to complete this work.

I wish to express my sincere thanks and gratitude to my team of supervisors.

I wish to express my deep thanks to **Prof.Samir Y. El-Khamisy** professor of Nuclear physics at Physics Department, Faculty of Science, Ain Shams University, for his supervision, honest guidance, continuous encouragement and trustful help through the experimentation and writing the manuscript.

My great thanks to the **Prof. Dr. Soad A. El-Fiki** professor of Nuclear physics at Physics Department, Faculty of Science, Ain Shams University, for her supervision and valuable assistance during the progress of this work.

I wish to express my thanks to **Prof. Dr. Nabil A. El-Faramawy** professor of Nuclear physics at Physics Department, Faculty of Science, Ain Shams University,

I would like to thank with gratitude **Dr. El-sayed Salama Ahmed**, assistant professor of Nuclear Physics at Physics Department, Faculty of Science, Ain Shams University, for his kind supervision, kind encouragement, his continuous support and kind guidance throughout the present work.

I wish to express my deep thanks to my husband for his patience, encouragement and understanding and my deep

thanks with gratitude to all of my family specially my parents for their continuous support and encouragement during my research.

## شكر و تقدير

أتقدم بخالص الشكر و التقدير الى الأساتذة الذين قاموا بالإشراف:

أ.د/ سمير يوشع الخميسي      أستاذ الفيزياء الاشعاعيه-قسم الفيزياء

كلية العلوم-جامعة عين شمس

أ.د/ سعاد عبد المنعم الفقى      أستاذ الفيزياء الاشعاعيه-قسم الفيزياء

كلية العلوم-جامعة عين شمس

أ.د/نبيل على الفرماوى      أستاذ الفيزياء الاشعاعيه-قسم الفيزياء

كلية العلوم-جامعة عين شمس

د / السيد سلامة أحمد      مدرس مساعد الفيزياء الاشعاعيه-قسم الفيزياء

كلية العلوم-جامعة عين شمس

## Contents

<b>List of table</b>	<b>I</b>
<b>List of figures</b>	<b>III</b>
<b>Abstract</b>	<b>1</b>
<b>Introduction</b>	<b>2</b>
<b>Literature review</b>	<b>3</b>
<b>Aim of the work</b>	<b>15</b>
<b>Chapter 1:Theoretical Aspects</b>	
1.1 Radioactivity in nature	16
i) Primordial nuclides	16
ii) Cosmogenic radionuclides	17
iii) Artificial radionuclides	18
1.2 Sources of the natural radioactivity	19
1.3 Distribution of naturally occurring radionuclides	20
i) Igneous rocks	21
ii) Sedimentary rocks	21
iii) Metamorphic rocks	22
1.3.1 Radionuclides in rocks	22
1.3.2 Radionuclides in soil	23
1.3.3 Air born radioactivity	25
1.3.4 Radionuclides in fresh water and the ocean	27

1.4 Radiation hazard	28
1.5 Radon	28
1.5.1 Radon properties	29
1.5.2. Radon isotopes	29
1.5.3 Radon daughters	32
1.5.4 Radon Risks	34
1.5.5 Radon sources	35
1.5.6 Radon emanation	36
1.5.7 Radon transport	42
1.5.8 Radon concentration in air	42
1.5.8.1 Indoor radon concentration	43
1.5.8.2 Outdoor radon concentration	43
1.6 Radiation units	44
1.7 Radiation exposure and doses	48
1.7.1 Absorbed dose	48
1.7.2 Dose equivalent	49
1.7.3 Effective dose equivalent	50
1.7.4 Dose rate	51
1.7.5 Flux	52
1.8 Gamma ray properties and the reaction with the matter	52

1.8.1 photoelectric effect	53
1.8.2 Compton scattering	55
1.8.3. Pair production	56
1.8.4 Gamma attenuation coefficient	59
a) Absorber mass thickness	61
b) Buildup factor	61
1.9 Biological effects of radiation	62
1.9.1 Physical and prechemical stage	63
1.9.2 Chemical stage:	64
1.9.3 Biological stage	65
1.10 Establishment of limits of exposure	65
1.11 Exposure pathways	68
1.11.1 External exposure	70
1.11.2 Internal exposure	71
1.12 Health effects	73
<b>Chapter 2: Experimental Techniques and Measurements</b>	
2.1 Description of the study area	76
2.2 Experimental procedures	77
2.2.1 Soil samples	77
2.2.2 Water samples	78

2.3 Detection techniques	81
2.3.1 The detector	81
2.3.2 High voltage power supply	83
2.3.3 Preamplifier	83
2.3.4 Amplifier	83
2.3.5 Multichannel analyzer	84
2.4 Energy calibration	84
2.5 Energy resolution	85
2.6 Detection efficiency	87
2.7 Experimental setup	89
2.8 Evaluation of radiation hazards	93
2.8.1 Radium equivalent $Ra_{eq}$	93
2.8.2 External hazard index $H_{ex}$	93
2.8.3 The absorbed dose and effective dose rate $D, D_{Eff}$	93
2.9 Radon measurements using CR-39	94
2.9.1 Etching methodology and its optimum conditions	95
2.9.2 Counting of tracks	96
2.9.3 Calibration of CR-39 detector	97

2.9.4 Radon exhalation rates	98
2.9.5 Effective radium content	99
2.9.6 Emanation power (a)	100
<b>Chapter 3: Results and Discussion</b>	
Background measarements and detection system optimization	102
3.1.1 Introduction	102
3.1.2 The intrinsic properties	103
3.1.3 Nature of gamma background radiation in Ain Shams university	106
3.2. Radioactivity concentration in soil samples	110
3.2.1 Absorbed dose rates	120
3.2.2 Annual effective dose equivalent from soil	122
3.2.3 Radium equivalent and hazard indices calculations for soil	123
3.3. Radioactivity concentration in water samples	128
3.4. Radon measurements	135
3.4.1Measurements of Rn exhalation rates	135
3.4.2Measurements of effective radium content	136
3.4.3 Measurements of emanation power	137
<b>Conclusion</b>	<b>139</b>
<b>References</b>	<b>142</b>
<b>Arabic Summary</b>	<b>155</b>

## List of Table

Table	Title	Page No
Table 1.1	Natural radioactive series	20
Table 1.2	Radionuclides in rocks	23
Table 1.3	Radionuclides in soil	24
Table 1.4	The radioactivity concentrations of some radionuclides in fresh water and the ocean (Bq / kg)	28
Table 1.5	Some radon properties	31
Table 1.6	Radon and thoron and their daughters	33
Table 1.7	Coefficients of diffusion, D, for radon in various porous media	38
Table 1.8	The ratio between IUS and non IUS units	46
Table 1.9	Quality factor values for various types of radiation	47
Table 1.10	Relationship between quality factor and LET	51
Table 1.11	ICRP dose limits for occupational and public	66
Table 1.12	Probability coefficients for stochastic effects	67
Table 1.13	Maximum permissible concentrations of radio-isotopes in water and air for occupational exposure for a 40 hour week.	69
Table 2.1	Relative intensities of gamma-rays from $^{226}\text{Ra}$ with its short-lived gamma-emitting daughters	91
Table 3.1	Experimental and calculated values of S for several H.P.Ge detectors.	105
Table 3.2	Intensity ( $I=\text{photon/s}$ ) and absorbed dose (PGy/d) of the background spectra.	109

Table 3.3	Dose rate (nGy/d) in the present study compared with the previous data.	110
Table 3.4	Activity concentration in Bq/kg for soil sample collected along the northeast coast of libya.	112
Table 3.5	The activity concentration of $^{238}\text{U}$ and $^{210}\text{Pb}$ Bq/kg in some soil samples at depths 5-10 and 50-70 cm.	117
Table 3.6	The activity ratios of $^{226}\text{Ra}/^{238}\text{U}$ , $^{210}\text{Pb}/^{238}\text{U}$ , and $^{210}\text{Pb}/^{226}\text{Ra}$ .	118
Table 3.7	The average activity concentration in Bq/kg of the radionuclides under investigation for different depth and the minimum and maximum values given in parentheses.	119
Table3.8	Comparison of average activity concentrations values in (Bq/kg) for Ra-226,Th-232 and K-40 in soil samples for different countries	120
Table 3.9	Values of radium equivalent, external hazard indice, representative level index ,absorbed dose and effective dose equivalent	127
Table3.10	The mean activity concentration in (Bq/L) for water samples that collected from four location in Al-Bayda region	130
Table3.11	The range and mean concentration in Bq/L for three types of water in Al-Bayda region	131
Table 3.12	Effective dose equivalent in well and tap water (mSv/y).	133
Table3.13	Physio –chemical characteristics of some water samples in study area	134
Table 3.14	Track density, areal exhalation rate and mass exhalation rate values of the soil samples	136
Table 3.15	Effective radium content and emanation power values of the soil samples	138
