## Approval Sheet

**Thesis Title:** MINIMIZING THE LOSS OF AMMONIA BY  
VOLATILIZATION FROM UREA AS INFLUENCED  
BY ADDITION OF DIFFERENT MATERIALS IN  
RICE SOILS

**Name :** *El-Sayed Saad Bastawissi Naeem*

*Approved by:*

**Prof. Dr. Ali A. Balba**

*Prof. of Soil Science,*

*Faculty of Agriculture, Kafr El-Sheikh, Tanta University.*

*Ali A. Balba*

**Prof. Dr. Sobhy A. Ghanem**

*Head of Research,*

*Rice Research and Training Center, Sakha, Kafr El-Sheikh.*

*Sobhy*

**Prof. Dr. Samir A. Mashali**

*Prof. of Soil Science,*

*Faculty of Agriculture, Kafr El-Sheikh, Tanta University.*

*S. Mashali*

**Dr. Abd El-Megeed R. Abd El-Megeed**

*Associate Prof. of Soil Science,*

*Faculty of Agriculture, Kafr El-Sheikh, Tanta University.*

*Abd El-Megeed*

(Committee in charge)

**Date :** 27 / 1 / 2002

## Acknowledgement

The researcher would like to express his deepest appreciation and sincere gratitude to Prof. Dr. Ali A. Balba, Prof. of Soil Chemistry and Prof. Dr. Samir A. Mashali, Prof. of Soil Chemistry, Soil Department, Faculty of Agriculture, Tanta University for their supervision, suggesting the research points, the problems of study, continuous interest, valuable criticism and guidance during the course of this study, and for their great help in preparing and reviewing the manuscript.

Thanks are also due to Dr. Ekhlās Alwakeil, Associate Prof. of Soil Science, Faculty of Agriculture, Tanta University for her cooperation and supervision.

Special thanks and deep appreciation are also due to staff members of Rice Research and Training Center, Sakha, Kafr El-Sheikh, specially Dr. Sobhy Ghanem and Dr. Ramzy Sherief for their great help and encouragement.

## CONTENTS

	Page
I- INTRODUCTION .....	1
II- REVIEW OF LITERATURE.....	4
II-1- Chemical properties of flooded soils. ....	4
II-2- Hydrolysis of urea.....	5
II-3- Ammonia volatilization.....	6
II-4- Factors affecting ammonia volatilization:.....	10
II-4-1-Soil pH .....	10
II-4-2-Temperature .....	12
II-4-3- Soil moisture.....	12
II-4-4-Ammonium concentration.....	14
II-4-5-Cation exchange capacity .....	14
II-4-6-Form and placement of applied fertilizer.....	16
II-4-7-Presence of plants .....	17
II-4-8-Urease inhibitors.....	17
III-MATERIALS AND METHODS .....	20
III-1-Materials.....	20
III-2-Experiments.....	21
III-3-Studied characters.....	23
III-3-1-During growth period .....	23
III-3-2-At harvest .....	23
III-4-Nitrogen content of rice grains.....	23
III-5- Calculated $\text{NH}_3$ losses and agronomic efficiency .....	24
III-6-Statistical analysis .....	25
IV-RESULTS AND DISCUSSION .....	26
IV-1-pH of Floodwater .....	26
IV-1-1-Surface application.....	26
IV-1-2-Incorporation with soil surface.....	31
IV-2-Ammonical-N in floodwater after fertilization with different rates of N.....	33
IV-2-1-Surface application .....	33
IV-2-2 Incorporation with soil surface.....	44
IV-3- Ammonia losses via volatilization .....	51
IV-3-1-Surface application .....	51
IV-3-2-Incorporation with soil surface.....	53
IV-4-Grain yield.....	56
IV-5-Agronomic efficiency .....	62
IV-6- Nitrogen uptake of rice grain .....	66
IV-7-Total nitrogen (ppm) in the soil after rice harvest. ....	70
VI-SUMMARY AND CONCLUSION .....	76
VI-REFERENCES.....	80
ARABIC SUMMARY	

## LIST of TABLES

		Page
1	Some physical and chemical properties of soil used.....	20
2	pH of floodwater as affected by addition of 110 kg N/ha from different urea forms and chemical compounds surface application .....	27
3	pH of floodwater as affected by addition of 220 kg N/ha from different urea forms and chemical compounds surface application .....	30
4	pH of floodwater as affected by addition of 110 and 220 kg N/ha from different urea forms and chemical compound incorporated into the soil . ....	32
5	Ammonical -N concentration (ppm) in floodwater as affected by addition of 110 kg N/ha from different fertilizer materials added surface application . ....	34
6	Ammonical -N concentration (ppm) in floodwater as affected by addition of 220 kg N/ ha from different fertilizer materials added surface application . ....	43
7	Ammonical -N concentration (ppm) in floodwater as affected by addition of 110 and 220 kg N/ha of urea with different materials incorporated into the soil.....	45
8	Total NH <sub>3</sub> losses (% of ammonical-N in floodwater) as affected by addition of 110 kg N/ha from different urea forms surface application. ....	52
9	Total NH <sub>3</sub> losses (% of ammonical-N in floodwater) as affected by addition of 220 kg N/ha from different urea forms surface application. ....	54
10	Total NH <sub>3</sub> losses (% of ammonical-N in floodwater) as affected by addition of 110 and 220 kg N/ha from different urea forms incorporated into the soil.....	55
11	Rice grain yield as affected by two rates of N applied either to soil surface or incorporated with soil.....	57
12	Agronomic efficiency as affected by two rates of N applied either to soil surface or incorporated with soil. ....	57
13	Nitrogen uptake of rice grains as affected by two rates of N applied either to soil surface or incorporated with soil. ....	67
14	Total nitrogen (ppm) in the soil after rice harvest .....	67
