

Phytochemical and Biological Studies of Polysaccharides Isolated from Some Medicinal Plants

Thesis submitted by

Rania Samir Shaaban Mohamed

B.Sc. Pharmacy

Alexandria University

*For The Fulfillment of The Master Degree In
Pharmaceutical Sciences (Pharmacognosy)*

Under the supervision of

Abdel Nasser B. Singab, PhD

Vice Dean of Society Service Affairs
and Environmental Development.
Professor of Pharmacognosy, Faculty
of Pharmacy, Ain Shams University

Nagwa Mohammed Ammar, PhD

Professor of Pharmacognosy,
Pharmacognosy Department, National
Research Center

Sherweit Hamed El-Ahmady, PhD

Lecturer, Pharmacognosy Department, Ain Shams University

Pharmacognosy Departement

Faculty of Pharmacy

***Ain Shams University, Egypt
(2010)***

Materials, Apparatus and Methods

Introduction

Review of literature

References

General Summary

Recommendations

Part

**Phytochemical Investigation of
Polysaccharides Purified Fractions
from *A. vera* Leaves, *O. ficus indica*
Fruits, *T. indica* Seeds, and *C.*
paradisi Peels**

Part
Biological Investigation of
Polysaccharides Purified fractions
from *A. vera* Leaves, *O. ficus indica*
fruits, *T. indica* Seeds, and *C.*
***paradisi* Peels**

Part
Optimization of the Parameters of
Extraction of Polysaccharides from
the Seeds of *T. indica*

Results and Discussion

Part

Phytochemical Investigation of Polysaccharides Purified Fractions from *A. vera* Leaves, *O. ficus indica* Fruits, *T. indica* Seeds, and *C. paradisi* Peels
