Prof. Dr. Mamdouh M. Salama

Prof. Dr. Sayed El Gindi

Prof. Dr. Alaa El Din Abdel Hay

Acknowledgements

It is with great pleasure that I express my deepest and profoundest sense of gratitude and sincere thanks to Prof. Dr. Mamdouh Salama, Professor of Neurosurgery, Faculty of Medicine, Ain Shams University, Prof. Dr. Sayed El-Gindi, Professor of Neurosurgery, Military Medical Academy, and Prof. Dr. Alaa Eldin Abdel Hay, Professor of Neurosurgery, Faculty of Medicine, Ain Shams University who have given me their expert counsel and unrelenting encouragement time and time again during the preparation of this thesis. Each of them spent long hours with me in a meticulous review of this work, Without their valuable help. This work would have never been completed in a decent way. I'd also like to thank each of them for generously granting me permission to use their previous works and publications.

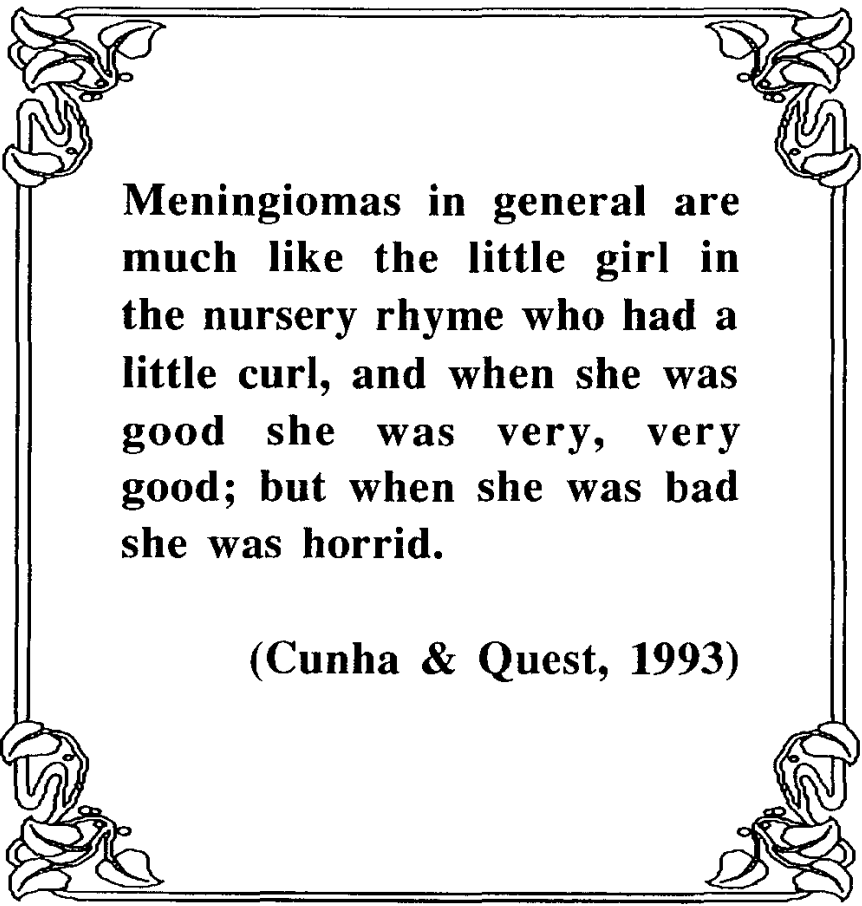

Words can never be enough to fulfill them what's their due, may ALLAH bless them all.

My heartfelt thanks are also due to Prof. Dr. Ismail Amin, Professor of Neurosurgery, Faculty of Medicine, Cairo University, for his enthusiastic encouragement and sincere help in the preparation of this work.

Finally, it is also a pleasure to acknowledge the help of my Professors and colleagues members of the Neurosurgery Department, Ain Shams University and Maadi Military Hospital for their dedicated help and support.

Arabic Summary	

Meningiomas in general are much like the little girl in the nursery rhyme who had a little curl, and when she was good she was very, very good; but when she was bad she was horrid.

(Cunha & Quest, 1993)
