

Factors Affecting Total Rehabilitation Of Laryngectomized Patients

A dissertation submitted in partial fulfilment of doctoral degree
in phoniatrics

By

Elamer Samir Mohamed Abou-Elsaad

Assistant Lecturer of Phoniatrics (El-Mansoura Faculty of Medicine)

M.D.B.Sc. (El-Mansoura Faculty of Medicine) , M.Sc. (Ain Shams Faculty of Medicine)

Supervisors

Prof. Dr. Mohamed Nasser Kotby

Head of the E.N.T. Department and Phoniatrics Unit
Ain Shams Faculty of Medicine

57467

Dr. Waheid Hussein Tantawy

Ass. Prof. of Radiology
Ain Shams Faculty of Medicine

Dr. Nabil Ali Gad-Elhak

Ass. Prof. of Gastro-enterology Surgery
El-Mansoura Faculty of Medicine

Co-supervisor

Dr. Aliaa Ali Khidr

Lecturer of Phoniatrics
Ain Shams Faculty of Medicine

Faculty of Medicine
Ain Shams University
1998

بسم الله الرحمن الرحيم

وَعَلَّمَكَ مَا لَمْ تَكُن تَعْلَمُ
وَكَانَ فَضْلُ اللَّهِ عَلَيْكَ عَظِيمًا

صدق الله العظيم

سورة النساء ، الآية (١١٣)

**To Those Who Have Taken The Trouble Of Offering
Me Everything For Nothing
To
My Parents , My Wife and My Lovely Kids**

ACKNOWLEDGMENT

First and above all I thank “ **GOD ALMIGHTY** ” with whose help I have completed this work .

I would like to express my sincere thanks and gratitude to **Prof. Dr. Mohamed Nasser Kotby** ; Head of the E.N.T. Department and Phoniatic Unit , Faculty of Medicine , Ain Shams University , for his kind supervision , his enthusiastic encouragement and his continuous support all through my work . I am greatly indebted to him for giving me the opportunity to expand my practice in the United states .

I would like to extend my sincere gratitude to **Dr. JoAnne Robbins** , Associate Professor in speech pathology and swallowing disorders, for allowing me the benefit of her vast experience and her advanced technology in the field of swallowing disorders. I would never forget the friendliness and good natured-assistance I received from her and her colleagues at the Department of Communication Disorders and Swallowing Services in University of Wisconsin Hospital and Clinics and at the Swallowing Lab. in Veterans Administration Hospital , Madison , Wisconsin .

I am delighted to express my deepest gratitude to **Dr. Waheed Tantawey** , Assis. Prof. of Radiodiagnosis , Ain Shams University for his time , effort and support along the course of this work .

I would like also to extend my deepest gratitude to **Dr. Nabil Gad-ElHak** , Assis. Prof. of Gastroentrolgy Surgery , EL-Mansoura University for his help , advice and support along the course of this work .

I am greatly indebted to **Dr. Aliaa Khidr** , Lecturer of Phoniatics , Ain Shams University for her help , encouragement and continuous support along the course of this work and during my stay in the United States .

I would like to thank **Dr. Brian Goodman , Ph.D.** , A Biomathematician at Veterans Administration Hospital , Madison , Wisconsin , for his help and valuable comments in preparing the statistics of this work . Much appreciation to **Mrs. Saher Lasheen** , a Psychometrist at Phoniatic unit , Ain Shams University , **Mr. Magdy Haleem** , a Researcher at the Motility Unit , Gastroentrolgy Surgery Center , EL-Mansoura University and **Mr. Hussein Ahmed** , A Radiodiagnosis technician , Ain Shams University for their technical assistance along the course of this work .

Figure (41) : Manometric recording of LES pressures during swallowing of three laryngectomized patients .	201
Figure (42) : Manometric recording of UES pressure during esophageal phonation of a good esophageal speaker .	202
Figure (43) : Acoustic data of laryngectomized patients (fair & good esophageal speakers) vs control group .	211
Figure (44) : Acoustic data for fair and good esophageal speakers .	214
Figure (45) : Aerodynamic data for laryngectomized patients vs control group .	217
Figure (46) : Aerodynamic data for poor , fair and good esophageal speakers .	219
Figure (47) : Scatter plot of all-groups in the discriminant coordinate system .	262

List of Tables

	Page
Table (1) : Wepman et al. (1953) seven-point scale of speech proficiency .	55
Table (2) : Stages of esophageal speech development according to Snidecor (1978) .	56
Table (3) : Essential features for the ideal artificial laryngeal device .	110
Table (4) : Justifications provided in the literature against the use of an artificial laryngeal device.	125
Table (5) : Justifications provided in the literature for recommending and supporting the use of an artificial laryngeal device .	125
Table (6) : Criteria for candidacy to receive the TEP procedure .	139
Table (7 a , b) : Descriptive statistics for demographic data .	169
Table (8 a , b) : Descriptive statistics for physical data .	170
Table (9 a , b , c) : Descriptive statistics for preoperative , operative & postoperative data .	172,174
Table (10 a , b) : Descriptive statistics for esophageal speech therapy .	175,176
Table (11 a , b) : Descriptive statistics for subjective psychological data .	177
Table (12) : Descriptive statistics for formal psychometric testing .	179
Table (13) : Descriptive statistics for nasopharyngofiberscopic study .	183
Table (14 a , b) : Descriptive statistics for Video fluoroscopic study .	187,188
Table (15 a , b) : Descriptive statistics for manometric study (patients vs control) .	193
Table (16 a , b) : Descriptive statistics for manometric study (patient groups) .	197
Table (17 a , b , c , d , e) : Descriptive statistics for communicative outcome .	203-205,207,208
Table (18) : (a) Descriptive statistics for acoustic data (patients vs control) .	210
(b) Descriptive statistics for acoustic data of esophageal voice(patient groups) .	213
Table (19) : (a) Descriptive statistics aerodynamic data (patients vs control) .	216
(b) Descriptive statistics aerodynamic data of esophageal voice (patient groups) .	218
Table (20) : Descriptive statistics for social outcome .	220
Table (21) : Descriptive statistics for occupational & economic outcome .	221
Table (22 a , b) : Correlation between demographic and physical factors and rehabilitation outcome .	231,232
Table (23 a , b) : Correlation between operative / postoperative data and rehabilitation outcome .	233,234
Table (24 a , b , c) : Correlation between current post-operative problems and rehabilitation outcome .	235,236,237
Table (25) : Correlation between esophageal speech therapy data and rehabilitation outcome .	238
Table (26) : Correlation between formal psychometric testing and rehabilitation outcome .	239
Table (27) : Correlation between nasofiberscopic findings and communication outcome .	240
Table (28 a , b , c) : Correlation between video fluoroscopic findings and communication outcome .	241,242,243
Table (29 a , b) : Correlation between manometric measures and communication outcome .	244,245
Table (30) : Correlation between social and occupational outcomes and communication outcome.	248
Table (31 a , b) : Correlation between acoustic and aerodynamic measures and communication outcome .	254,255
Table (32) : (a) Unstandardized canonical discriminant function* discriminating proficiency outcome , (b) Canonical discriminant functions evaluated at group means (group centroids) for proficiency outcome , (c) Classification results .	260,261,263
