

**SERUM INHIBIN LEVELS IN CASES OF PREGNANCY
INDUCED HYPERTENSION**

THESIS

Submitted in Partial fulfillment of M.D Degree

IN

(Obstetrics and Gynecology)

BY

HAMDY MOHAMAD EDRIES MOHAMAD

M.B.B, Ch. M.S (Obstet & Gynecol).

UNDER SUPERVISION OF

PROF. DR.

Mohamad Abdel Halim Mehanna

Professor of Obstetrics and Gynecology

PROF. DR.

Ali Farid Mohamad Ali

Professor of Obstetrics and Gynecology

Department of obstetrics and Gynecology

PROF. DR.

Ahmad Abdel Halim El Tawil

Professor of Pathology

DR

Hanaa El Tayb Nasser

Assistant Professor of Biochemistry

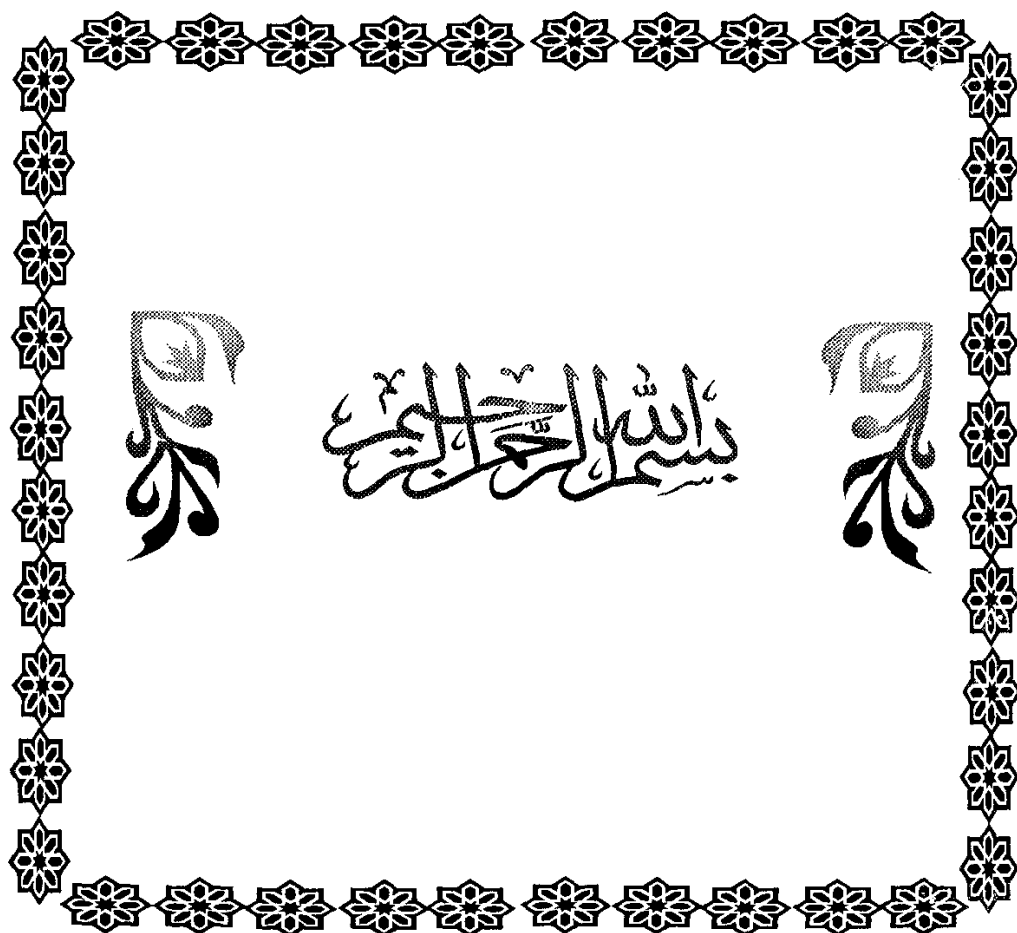

Department of Obstetrics and Gynecology.

Faculty of Medicine

Ain shams university

1996

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

ACKNOWLEDGMENT

*I wish to take opportunity to thank all those people who have assisted me during the period covered by this work. First and foremost of these is my supervisors. **professor Dr. Mohamed Abd El- Halim Mehana** professor of obstetrics and Gynecology, and **professor Dr. Ali Farid Mohamed Ali** professor of obstetrics and Gynecology, Faculty of Medicine, Ain shams university for their valuable help, suggestion, criticism, cooperation, advice, meticulous guidance, valuable supervision and continuous encouragement in the preparation of this thesis.*

*I express my sincere gratitude for **professor Dr Ahmed Abdel Halim El-Tawil** professor of pathology and **Dr. Hanaa El- Tayb Nasser** Assistant professor of Biochemistry, Faculty of Medicine, Ain shams university. for providing me the chance to work within their laboratories and also for their continuous cordial encouragement, supervision, criticism and helpful suggestion.*

I am greatly indebted to our patients who had tolerated my work.

List of abbreviation

Angiotensin II	Angiotensin II
Adenosine diphosphate	ADP
<i>Alkaline phosphatase</i>	<i>ALP</i>
Atrial natriuretic peptide	ANP
Antithrombin III	AT III
Cyclic Adenosine monophosphate	CAMP
Complementary Deoxyribonucleic acid	CDNA
Central nervous system	CNS
Dessiminated intravascular Coagulopathy	DIC
Follicle stimulating hormone	FSH
Gonado tropic releasing hormone	GNRH
Human chorionic gonadotropin	<i>HCG</i>
Human chorionic Somatomammotropin.	HCS
Human placental lactogen	<i>HPL</i>
Intra-uterine growth retardation	IUGR
Lactic dehydrogenase	LDH
Luteinizing hormone	LH
Kilodalton	KDa
Mean arterial pressure	MAP
Messenger ribonucleic acid	mRNA
Plasminogen activator inhibitor 1	PAI1
Polycystic ovarian syndrome	PCO
Preeclampsia	PE
Pregnancy Induced Hypertension	PIH
Prostaglandin I 2	PGI2
Placental alkaline phosphatase	PLAP
Radioimmuno assays	RIAs
Serum glutamic oxalacetic Transaminase	SGOT
<i>Serum glutamic pyruvic transaminase</i>	SGPT
Transforming growth factor - β	TGF β
<i>Thromboxan A2</i>	TXA2

List of tables

	Page
<i>Table (1) Represents collected data of normal pregnancy (group I)</i>	<i>128</i>
<i>Table (2) Represents collected data of Mild (Group II Subgroup A.).....</i>	<i>131</i>
<i>Table (3) Represents collected data of Severe PIH (Group II Subgroup B.).....</i>	<i>133</i>
<i>Table (4): Represents serum inhibin level (ng/ml) in patients with normal pregnancy, mild and severe PIH.....</i>	<i>135</i>
<i>Table (5): Represents Comparison between serum inhibin level (ng/ml) in patients with Mild PIH versus normal pregnancy.</i>	<i>135</i>
<i>Table (6): Represents Comparison between serum inhibin level (ng/ml) in patients with, severe PIH versus normal pregnancy</i>	<i>135</i>
<i>Table (7): Represents Comparison between serum inhibin level (ng/ml) in patients with mild versus severe PIH.</i>	<i>136</i>
<i>Table (8): Represents Serum human placental lactogen (HPL) level (ug/ml) in patients with normal pregnancy, mild and severe pregnancy induced hypertension.....</i>	<i>137</i>
<i>Table (9): Represents Comparison between serum HPL level (ug/ml) in patients with mild PIH versus normal pregnancy.....</i>	<i>137</i>
<i>Table (10): Represents Comparison between serum HPL level (ug/ml) in patients with severe PIH versus normal pregnancy.</i>	<i>137</i>
<i>Table (11): Represents Comparison between serum HPL level (ug/ml) in patients with mild versus severe PIH.</i>	<i>138</i>
<i>Table (12): Represents Serum alkaline phosphatase level (Iu/L) in patients with normal pregnancy, mild and severe pregnancy induced hypertension.....</i>	<i>139</i>
<i>Table (13): Represents Comparison between serum alkaline phosphatase level (Iu/L) in patients with mild PIH versus normal pregnancy.....</i>	<i>139</i>

<i>Table (14): Represents comparison between serum alkaline phosphatase level (lu / L) in patients with severe PIH versus normal pregnancy</i>	<i>139</i>
<i>Table (15): Represents Comparison between serum alkaline phosphatase level (lu /L) in patients with mild versus severe PIH.....</i>	<i>140</i>
<i>Table (16): Represent placental thickness (cm) in patients with normal pregnancy, mild and severe PIH.....</i>	<i>141</i>
<i>Table (17): Represent comparison between placental thickness (cm) in mild PIH versus normal pregnancy</i>	<i>141</i>
<i>Table (18): Represent comparison between placental thickness (cm) in severe PIH versus normal pregnancy.....</i>	<i>141</i>
<i>Table (19): Represent comparison between placental thickness (cm) in mild PIH versus severe PIH.</i>	<i>142</i>
<i>Table (20): Represents placental weight (gms) in patients with normal pregnancy, mild and severe PIH.</i>	<i>143</i>
<i>Table (21): Represents comparison between placental weight (gms) in patients with mild PIH versus normal pregnancy</i>	<i>143</i>
<i>Table (22): Represents comparison between placental weight (gms) in patients with severe PIH versus normal pregnancy.....</i>	<i>143</i>
<i>Table (23): represents comparison between placental weight (gms) in patients with mild PIH versus severe PIH.....</i>	<i>144</i>
<i>Table (24): Represents comparison between previllous fibrin deposition in placenta of patients with mild PIH versus normal pregnancy</i>	<i>145</i>
<i>Table (25): Represents comparison between previllous fibrin deposition in placenta of patients with severe, PIH versus normal pregnancy.</i>	<i>145</i>
<i>Table (26): Represents comparison between previllous fibrin deposition in the placenta of patients with mild versus severe PIH.</i>	<i>145</i>
<i>Table (27): Represents comparison between thrombosis in placenta of patients with mild PIH versus normal pregnancy.</i>	<i>146</i>

Table (28): Represents comparison between thrombosis in placenta of patients with severe PIH versus normal pregnancy.	146
Table (29): Represents comparison between thrombosis in placenta of patients with mild versus severe PIH	146
Table (30): Represents comparison between calcification in placenta of patients with mild PIH versus normal pregnancy	147
Table (31): Represents comparison between calcification in placenta of patients with severe PIH versus normal pregnancy.	147
Table (32): Represents comparison between calcification in placenta of patients with mild versus severe PIH.....	147
Table (33): Represents comparison between infarction in placenta of the patients with mild PIH versus normal pregnancy	148
Table (34): Represents comparison between infarction in placenta of the patients with severe PIH versus normal pregnancy	148
Table (35): Represents comparison between infarction in placenta of patients with mild versus severe PIH.....	148
Table (36): Represents comparison between fibromuscular sclerosis of the fetal stem vessels in the placenta of women with mild PIH versus normal pregnancy	149
Table (37): Represents comparison between fibromuscular sclerosis of the fetal stem vessels in the placenta of patients with severe PIH versus. normal pregnancy.....	149
Table (38): Represents comparison between fibromuscular sclerosis of the fetal stem vessels in the placenta of patients with mild versus severe PIH.	149
Table (39) : Represents comparison between villous vessels in the placenta of patients with mild PIH, versus normal pregnancy	150

Table (40): Represents comparison between villous vessels in the placenta of patients with severe PIH versus normal pregnancy.....	150
Table (41): Represents comparison between villous vessels in the placenta of patients with mild versus severe PIH	150
Table (42): Represents comparison between villous edema in the placenta of patients with mild PIH versus normal pregnancy	151
Table (43): Represents comparison between villous edema in the placenta of patients with severe PIH versus normal pregnancy.....	151
Table (44): Represents comparison between villous edema in the placenta of patients with mild versus severe PIH.	151
Table (45): Represents comparison between stromal fibrosis in placenta of the patients with mild PIH. versus normal pregnancy	152
Table (46): Represents comparison between stromal fibrosis in placenta of the patients with severe PIH versus normal pregnancy.....	152
Table (47): Represents comparison between stromal fibrosis in placenta of patients with mild versus severe PIH.....	152
Table (48): Represents comparison between fibrinoid necrosis of the villi in the placenta of patients with mild PIH versus normal pregnancy.....	153
Table (49): Represents comparison between fibrinoid necrosis of the villi in the placenta of patients with severe PIH versus normal pregnancy	153
Table (50): Represents comparison between fibrinoid necrosis of the villi in the placenta of patients with mild versus severe PIH.	153
Table (51): Represents comparison between cytotrophoblastic hyperplasia in the placenta of patients with mild PIH versus normal pregnancy	154
Table (52): Represents comparison between cytotrophoblastic hyperplasia in the placenta
